

## CONTENTS

	Page
Introduction	1
OUTDOOR EXPOSURE RESULTS	
Atmospheric Corrosion of Weathering Steels	7
Eight-Year Atmospheric Corrosion Performance of Weathering Steel in Industrial, Rural, and Marine Environments	45
Discussion	59
General, Localized, and Stress-Corrosion Resistance of a Series of Copper Alloys in Natural Atmospheres	60
Atmospheric Corrosion Tests of Copper and Copper Alloys in Sweden 16-Year Results	85
Discussion	105
Atmospheric Corrosion of Copper Alloys Exposed for 15 to 20 Years	106
Aluminum Alloy Performance in Industrial Air-Cooled Applications	116
Discussion	134
Effect of 1 Percent Copper Addition on Atmospheric Corrosion of Rolled Zinc After 20 Years' Exposure	135
Atmospheric Corrosion Test Results for Metallic-Coated Steel Panels Exposed in 1960	163
Discussion	184
Corrosion Performance of Decorative Electrodeposited Nickel and Nickel Iron Alloy Coatings	186
Discussion	213
Comments on the Corrosion Performance of Decorative Nickel-Iron Coatings	214
Discussion	221
MODELING, CHARACTERIZATION, AND CORRELATIONS	
Corrosion Aggressivity of Atmospheres (Derivation and Classification)	225
Calibration of Atmospheric Corrosion Test Sites	250
Measurement of the Time-of-Wetness by Moisture Sensors and Their Calibration	267
Discussion	284
Evaluation of the Effects of Microclimate Differences on Corrosion	286
Reproducibility of Electrochemical Measurements of Atmospheric Corrosion Phenomena	309
Discussion	338
Predication at Long Terms of the Atmospheric Corrosion of Structural Steels from Short-Term Experimental Data	339
Effect of Atmospheric Pollutant Gases on the Formation of Corrosive Condensate on Aluminum	359
Accelerated Atmospheric-Corrosion Testing	374
Index	405
