

CONTENTS

	Page
1 Introduction	1
1.1 The technical and economic significance of atmospheric corrosion	1
1.2 The meaning of the concept of atmospheric corrosion	2
1.3 Important unanswered questions regarding atmospheric corrosion	3
2 The Atmosphere as a Corrosive Environment	5
2.1 Definition of the concept of 'atmosphere'	5
2.2 The chemical composition of the atmosphere	5
2.3 Physical properties of the atmosphere important in corrosion	10
2.4 Microclimate	13
3 Mechanisms and Kinetics of Atmospheric Corrosion	15
3.1 Oxidation mechanisms and kinetics in dry atmospheres at Environmental temperatures	15
3.2 Atmospheric corrosion as special case of metal corrosion in an electrolyte	19
3.3 Formation and destruction of electrolyte layers	21
3.4 Electrochemical reactions in atmospheric corrosion	24
3.5 Mechanisms of action of atmospheric impurities	32
3.6 Properties of solid corrosion products and their influence on the course of Atmospheric corrosion	47
3.7 The kinetics of atmospheric corrosion	51
3.8 The long-term course of corrosion	57
4 Non-uniform and Structural Corrosion Phenomena	75
4.1 Pitting corrosion	75
4.2 Grain boundary corrosion	76
4.3 Stress Corrosion Cracking	78
5 Principles of Protection Against Atmospheric Corrosion	85
5.1 Derivation of protection methods	85
5.2 Destimulation of the atmosphere	87
5.3 Corrosion inhibitors for protection against atmospheric corrosion	89
5.4 Aoolying to increase atmospheric corrosion resistance	92
5.5 Protection by metallic coatings	95
5.6 Protection by organic coatings	106
5.7 Inorganic non-metallic coatings	116
5.8 Combined coatings	119
6 Principles of Methods for Investigation of Atmospheric Corrosion	121
6.1 The significance of test methods in atmospheric corrosion protection	121
6.2 Principles of investigation methods	121
6.3 Testing in natural atmospheres	122
6.4 Atmospheric corrosion testing in the laboratory	142
7 Technical and Scientific Considerations in Atmospheric Corrosion Protection	155
7.1 Determination of scientific and technical aims	155
7.2 Consideration of the aggressiveness of the atmosphere	156
7.3 Choice and implementation of corrosion protection	160
7.4 Protection measures for products in the period before use	172
7.5 Ideas on choice of measures for atmospheric corrosion protection	174
Index	189
