
CONTENTS

Preface		xiii
1 / Fundamentals of Biodegradable Polymers		1
	D. L. KAPLAN, J. M. MAYER, D. BALL, J. McCASSIE, A. L. ALLEN, P. STENHOUSE	
1. Introduction	1	
2. Definitions	4	
3. Key Elements to Biodegradation	6	
4. Measurement Methods	9	
5. Naturally Occurring Biodegradable Polymers	10	
6. Synthetic Biodegradable Polymers	24	
7. The Future	34	
8. Acknowledgements	35	
9. References	36	
2 / Starch-Based Materials		.43
	G. L. LOOMIS, A. R. HOPKINS, E. R. GEORGE	
1. Starch	43	
2. Poly(vinyl alcohol)	45	
3. Biodegradable Compositions	46	
4. References	51	
3 / Solubility and Gelatinization Properties of Starch-Mineral Complexes		.53
	A. S. HUANG, X.-X. LIU	
1. Introduction	53	
2. Complex Formation	54	
3. Water Solubility and Hydrophilicity	55	
4. Thermal Properties	58	

5. Conclusion 60

6. References 60

4 / Degradable Plastics Made from Starch and Protein 63

J.-L. JANE, S.-T. LIM, I. PAETAU

1. Introduction 63

2. Preparation of Plastic Materials 65

3. Plastics Made from Various Starches 65

4. Effects of Processing Conditions on Properties of the
Plastics 67

5. Differential Scanning Calorimetry (DSC) of Starch-Protein
Mixtures 68

6. Effects of Cross-Linking Agents 68

7. Effects of Lubricants 70

8. Effect of Material Acidity (pH) 71

9. Acknowledgements 72

10. References 72

**5 / Biodegradable Graft Copolymers and Composites
from Forest Products 75**

J. J. MEISTER, A. ARANHA, A. WANG, M.-J. CHEN

1. Introduction 75

2. Experimental Procedures 81

3. Results and Discussion 83

4. Conclusions 93

5. Acknowledgements 95

6. References 95

**6 / Design, Synthesis, and Properties of
Biodegradable Composites 97**

S. J. HUANG, M. F. KOENIG, M. HUANG

1. Introduction 97

2. Experimental 98

3. Results and Discussion 99

4. Conclusions 109

5. Acknowledgement 109

6. References 109

**7 / Synthesis and Susceptibility to Enzymes of
Pullulan Derivatives 111**

D. H. BALL, E. T. REESE, P. J. STENHOUSE

1. Introduction 111

2. Approach 112

3. Acknowledgements 117

4. References 118

8 / Bacterial Polyesters and Their Biodegradation	119
M. R. TIMMINS, D. F. GILMORE, R. C. FULLER, R. W. LENZ	
1. Introduction	119
2. Environmental Studies	122
3. Microbial Studies	124
4. Molecular-Scale Investigations	125
5. Results	126
6. References	130
9 / Biodegradation of Cellulose Acetates	133
C. M. BUCHANAN, R. M. GARDNER, R. J. KOMAREK, S. C. GEDON, A. W. WHITE	
1. Introduction	133
2. Background	134
3. Results and Discussion	136
4. References	139
10 / Effects of Moisture and Various Plasticizers on the Mechanical Properties of Extruded Starch	141
R. L. SHOGREN	
1. Introduction	141
2. Plasticizers for Starch	142
3. Summary	147
4. References	147
11 / Starch-Based Blown Film	151
P. J. STENHOUSE, J. M. MAYER, M. J. HEPFINGER, E. A. COSTA, P. A. DELL, D. L. KAPLAN	
1. Introduction	151
2. Materials	152
3. Preparation of Films	153
4. Properties of Films	154
5. Conclusions	157
6. References	158
12 / The Effect of Crystalline Morphology on Enzymatic Degradation Kinetics	159
M. PARIKH, R. A. GROSS, S. P. MCCARTHY	
1. Introduction	159
2. Experimental Approach	160
3. Biodegradation Testing	162
4. Discussion of Results	162
5. Conclusion	169
6. Acknowledgements	169
7. References	169

13 / Thermoplastic Processing of Starch: Melt-Spinning of Starch-Based Fibers	171
S. SIMMONS, C. E. WEIGAND, R. J. ALBALAK, R. C. ARMSTRONG, E. L. THOMAS	
1. Introduction	171
2. Experimental	176
3. Results and Discussion	180
4. Conclusions/Direction for Future Studies	203
5. Acknowledgements	204
6. References	205
14 / Processing Biological Polymers in the Liquid Crystalline State	209
C. VINEY, A. HUBER, P. VERDUGO	
1. Introduction	209
2. Materials and Sample Preparation	210
3. Results	214
4. Discussion	218
5. Conclusions	221
6. Acknowledgements	222
7. References	222
15 / The Processing of Poly(3-Hydroxybutyrate-co-3-Hydroxyvalerate)– PHBV	225
D. KEMMISH	
1. Introduction	225
2. Production Technology	226
3. Physical Properties	226
4. Biodegradation	227
5. Key Processing Characteristics	228
6. Conventional Thermoplastic Processing Techniques	229
7. References	232
/16 / Biodegradable Materials and Packaging– Environmental Test Methods and Needs	233
J. M. MAYER, D. L. KAPLAN	
1. Introduction	233
2. Degradability Overview	234
3. Packaging Materials and Biodegradability	234
4. Deterioration Testing	235
5. Biodegradation Testing	236
6. Toxicity Testing	242
7. Conclusions	244
8. References	244

/17 /	Biodegradation Kinetics in Marine and Soil Systems	247
	J E MCCASSIE, J. M. MAYER, R E STOTE, A E SHUPE, P. J. STENHOUSE, P. A. DELL, D L KAPLAN	
	1. Introduction	247
	2. Materials and Methods	248
	3. Results and Discussion	251
	4. References	256
18 /	Cellulose Acetate Biodegradability in Simulated Aerobic Composting and Anaerobic Bioreactor Environments as Well as by a Bacterial Isolate Derived from Compost	257
	R. A GROSS, J.-D. GU, D. T. EBERIEL, M NELSON, S P MCCARTHY	
	1. Introduction	257
	2. Experimental	259
	3. Results and Discussion	266
	4. Summary of Results	276
	5. Acknowledgements	278
	6. References	278
19 /	Fate and Effects of a Starch-Based Biodegradable Plastic Substitute in the Marine Environment	281
	B. K SULLIVAN, C. A OVIATT, G KLEIN-MACPHEE	
	1. Introduction	281
	2. Methods	283
	3. Results	286
	4. Conclusions	294
	5. References	295
20 /	Microbial Degradation of a Starch-Based Biopolymer in the Marine Environment	297
	C. O. WIRSEN, H. W. JANNASCH	
	1. Introduction	297
	2. Materials and Methods	299
	3. Results and Discussion	301
	4. Conclusions	309
	5. Acknowledgements	309
	6. References	309
/21 /	Laser and Infrared Techniques for Characterization of Biodegradable Polymers	311
	R. W. GAULDIE, S. K. SHARMA, T. F. COONEY, M. L. SYKES, L. WANG, S. Y. WANG	
	1. Introduction	311
	2. Laser Confocal Microscopy of Starch-Based Polymers: Crystalline/Amorphous Domains and Starch-Water Interaction	312

Contents

3. Spectroscopic Measurements 319
4. Conclusions 328
5. Acknowledgements 330
6. References 330

22 / The Undersea Fluorescence Confocal

Microscope Probe 333

D. O'CONNOR, J. BABINEC, J. BOSEL, T. CONLON, T. COPSON,
R. GAULDIE, D. HARRIS, J. JOLLY, L. MARUTANI, J. LAM, R. TOM

1. Introduction 333
2. The Undersea Confocal Microscope System 333
3. Probe—Principle of Operation 334
4. Hardware 335
5. Status 340
6. Acknowledgements 342
7. References 342

**23 / The Use of Stimulable Bioluminescence from Marine
Dinoflagellates as a Means of Detecting Toxicity in the
Marine Environment 343**

D. LAPOTA, G. J. MOSKOWITZ, D. E. ROSENBERGER, J. G. GROVHOUG

1. Introduction 343
2. Material and Methods 345
3. Results 348
4. Conclusion 353
5. Acknowledgements 354
6. References 355

/ 24 / Edible Food Barrier Coatings 357

K. R. CONCA, T. C. S. YANG

1. Introduction 357
2. Characterization 358
3. Preparation Methods 359
4. Film Materials 360
5. Future Needs 366
6. Subjective Evaluation 367
7. Objective Analysis 367
8. Objectives for Future Study 368
9. References 368

**25 / Nutrient Composition and Nutritional Availability of
Selected Carbohydrate Polymers 371**

M. E. KUNKEL, A. SEO, K. B. KOLB, T. A. MINTEN

1. Literature Review 371
2. Materials and Methods 373

3. Results and Discussion 375

4. References 379

/26 / Military Applications for Biodegradable Materials 381

J. M. ROSS

1. Introduction 381

2. Discussion 383

27 / Navy Consumers' Attitudes toward Marine

Environmental Problems and Biodegradable Materials . . . 389

T. N. MALAFI. M. A. DEVINE

1. The Importance of Marketing and Education in the
Biodegradable Materials and Packaging
Program 389

2. An Investigation of Sailors' Beliefs about Marine
Environmental Problems and Biodegradable
Materials 391

3. Conclusions and Recommendations 396

4. References 399

/28 / Designing for Responsible Disposal 401

S. A. MOJO

Index 407
