Introduction .....	1
Part A	
Physical Principles of Ultrasonic Testing of Materials	
1. Waves .....	5
1.1 Oscillations and Waves .....	5
1.2 Modes and Forms of Waves .....	8
1.3 Composite and Standing Waves. Interference .....	12
1.4 Formulas and Numerical Data .....	17
2. Plane Sound Waves on Boundaries .....	23
2.1 Perpendicular Incidence on Single. Plane Interfaces ....	23
2.2 Perpendicular Incidence on Multiple Interfaces. Plate and Gap .....	26
2.3 The Law of Refraction .....	30
2.4 The Acoustic Pressure Values at Boundaries .....	32
2.5 Reflection in a Right-Angled Edge and in a Corner ....	40
2.6 Splitting of Surface and Boundary Waves .....	42
2.7 Acoustic Propagation in Plates. Plate Waves .....	43
3. Geometric Ultrasonic Optics .....	46
3.1 Limits of Validity .....	46
3.2 Acoustic Pressure Distance Law for Spherical and Cylindrical Waves .....	47
3.3* Reflection and Refraction of Spherical Waves on Plane Surfaces .....	48
3.4* Curved Interfaces as Concave Mirrors and Lenses .....	51
3.5* Spherical Waves in Hollow and Solid Cylinders .....	57

---

\* The sections marked with an asterisk are less important for beginners.

## VIII Contents

4. Wave Physics of Sound Field. The Sound Beam .....	62
4.1 Elementary Description .....	62
4.1.1 Flat Oscillators .....	62
4.1.2* Focussed Radiators .....	75
4.2* Zone Construction of Sound Fields .....	80
4.3 Sound Field by Non-Uniform Excitation of the Radiator and Pulse Excitation .....	86
5. Echo and Shadow of an Obstacle in the Sound Field .....	90
5.1 Echo of a Plane Reflector at Right Angles to the Axis of the Sound Beam of a Piston Oscillator (DGS Diagram)	90
5.2 Shadow of a Circular Disc Reflector at Right Angles to the Acoustic Axis .....	96
5.3 Obliquely Oriented Flaws. Reflection by Edge Waves ..	98
5.4 Other Types of Reflectors .....	101
5.5 Natural Reflectors. Roughness .....	102
5.6* Effect of the Reflector on the Frequency Distribution of the Pulse .....	105
6. Attenuation of Ultrasonic Waves in Solids .....	107
6.1 Absorption and Scattering .....	107
6.2* Attenuation in Metals. Anisotropy and Cast Structure ..	113
7. Piezoelectric Methods of Generation and Reception of Ultrasonic Waves .....	119
7.1 The Piezoelectric Effect .....	119
7.2 The Piezoelectric Plate as Transmitter and Receiver of Ultrasonic Waves .....	124
7.3* The Piezoelectric Transducer with Pulse Excitation ....	132
7.4 Piezoelectric Materials .....	142
8.* Other Methods for Transmitting and Receiving Ultrasound ...	150
8.1 Mechanical Effects .....	151
8.2 Thermal Effects .....	151
8.3 Electrostatic Methods .....	154
8.4 Methods Based on Non-Magnetic Effects of the Electric Current .....	156
8.5 Electrodynamical Methods .....	157
8.6 Magnetostrictive Methods .....	162
8.7 Optical Methods .....	165

**Part B**  
**Methods and Instruments for the Ultrasonic Testing of Materials**

9. Intensity Methods . . . . .	174
9.1 Principle. Classification and Differentiation as Compared with the Transit-Time Methods . . . . .	3.74
9.2 Instruments for Intensity Measurements . . . . .	179
9.3 Instruments for Sound-Image Methods . . . . .	181
9.4* Ultrasonic Holography . . . . .	185
10. Pulse-Echo Method . . . . .	193
10.1 History and Principles . . . . .	193
10.2 Construction and Mode of Operation of a Pulse-Echo Instrument . . . . .	197
10.2.1 Sweep Section with CR Tube . . . . .	198
10.2.2 Transmitter Unit . . . . .	202
10.2.3 The Amplifier . . . . .	205
10.2.4 Distance Scale and Time Markers . . . . .	214
10.2.5 Noise Suppression . . . . .	218
10.3 The Probes . . . . .	219
10.3.1 Normal Probes . . . . .	219
10.3.2 Angle Probes . . . . .	228
10.4 Properties of Pulse-Echo Instruments and Probes . . . . .	235
10.4.1 Properties of the Image Unit . . . . .	236
10.4.2 Properties of the Amplifier . . . . .	237
10.4.3 Properties of the Sound Field . . . . .	241
10.4.4 The Distance Adjustment . . . . .	244
10.5 Instruments of the Pulse-Echo Method . . . . .	245
10.6 Methods and Auxiliary Instruments for Electronic Data Processing . . . . .	247
10.7 Methods and Auxiliary Instruments for Documentation . . . . .	252
10.8* Frequency-Modulation Method . . . . .	263
11. Transit-Time Method . . . . .	265
11.1 Transit-Time Methods with Continuous Sound (Resonance Method). Principles and Instruments . . . . .	265
11.2 Transit-Time Methods Using Pulses . . . . .	269
11.2.1 Comparative Method. Interferometer . . . . .	269
11.2.2 Frequency Measuring Methods . . . . .	272
11.2.3 Electronic Transit-Time Measurements . . . . .	278
11.2.4* Phase Measuring Method . . . . .	286

12.* Sound Emission Analysis .....	287
Part C	
General Testing Technique	
13. Coupling, Choice of Probe and Measuring Frequency .....	289
13.1 Condition and Preparation of Surface .....	289
13.2 Curved Surfaces .....	290
13.3 Coupling Media .....	293
13.4 Checking of Coupling .....	296
13.5 Coupling through Intermediate Layers .....	297
13.6 Ultrasonic Frequency and Type of Probe .....	304
14. Interference Effect of Boundaries. Complex Sound Paths and Screen Patterns .....	307
14.1 Effect on the Sound Field by Boundaries Parallel to the <b>Beam Axis</b> .....	307
14.2 Secondary Echoes Produced by Split-Off Transverse Waves .....	311
14.3 Triangle Reflections .....	314
14.4 61° Reflection .....	316
14.5 Screen Patterns when Testing a Plate .....	318
14.6 Interfering Echoes through Surface Waves .....	324
15. Testing by Means of Transverse, Surface and Plate Waves ...	326
15.1 Transverse Waves .....	326
15.2 Surface Waves .....	332
15.3 Plate Waves .....	336
16. Determination of Shape and Size of Flaws .....	338
17. Interference by External High-Frequency and Ultrasonic Sources .....	344
18. Organization of the Test. Staff and Training Problems .....	348
19. Testing Installations and Evaluation of Test Results .....	353

Part D

Special Test Problems

20. Flaw Detection on Metallic Specimens .....	357
20.1 Heavy Forgings .....	357
20.2 Worked Parts of Machines .....	371
21. Railway Material .....	381
21.1 Axles .....	381
21.2 Rails .....	388
21.3 Miscellaneous Railway Material .....	396
22. Plate and Strip .....	399
22.1 Medium and Heavy Plate .....	399
22.2 Strip and Sheet .....	413
23. Semi-Finished Products: Rods, Billets and Wires .....	427
23.1 Rod Material .....	427
23.2 Billets .....	435
23.3 Wires .....	437
24. Pipes and Cylinders .....	439
25. Castings .....	458
26. Welded Joints .....	466
26.1 Butt-Welded Joints .....	466
26.1.1 Testing Method, General .....	466
26.1.2 Plate Thickness, Beam Angle and Testing Fre- quency .....	470
26.1.3 Flaw-Locating Methods .....	473
26.1.4 Nature, Shape and Size of Defect .....	481
26.1.5 Recording and Automation .....	486
26.2 Fillet Welds .....	496
26.3 Spot Welds .....	500
26.4 Other Forms of Weided Joints .....	501
27. Joints Produced by Rivetting, Glueing and Shrinking .....	505
27.1 Rivet'-Hole Testing .....	505
27.2 Laminar Joints Produced by Soldering, Brazing, Glueing, Plating, etc. ....	507
27.3 Shrink Fits .....	516

## XII Contents

28. Nuclear Reactors .....	518
29. Metals and their Special Testing Problems .....	52G
29.1 Steel .....	52G
29.2 Cast Steel .....	528
29.3 Cast Iron .....	529
29.4 Light Metals .....	53G
29.5 Copper and Copper Alloys .....	540
29.6 Other Non-Ferrous Metals .....	641
29.7 Sintered Metals .....	543
30. Testing Problems on Non-Metallic Specimens .....	545
30.1 Ceramic Materials and Glass .....	646
30.2 Plastics .....	551
30.3 Rubber .....	554
30.4 Rock, Abrasive Wheels and Carbon .....	555
30.5 Concrete .....	658
30.6 Wood and Leather .....	5G3
30.7 Bacon and Meat .....	565
31. Determination of Position, Shape and Level .....	5G9
32. Measuring Methods Using Ultrasound .....	573
32.1 Measurement of Wall and Layer Thicknesses .....	573
32.2 Measurement of Acoustic Velocity .....	580
32.3 Measurement of Attenuation and Scatter of Sound .....	587
32.4 Measurement of Surface Hardness .....	595
33. Standardization .....	598
Appendix. Formulas, Diagrams and Tables .....	605
Bibliography .....	622
Index .....	659
