## Part I Application and Manufacture of Oil and Gas Transmission Line Pipe 1

- 1 General Information on Oil and Gas Line Pipe 3
  - 1.1 Development perspectives of transmission via pipelines 3
  - 1.2 Pipeline parameters 9
  - 1.3 Pipeline safety 19
  - 1.4 Effect of pipeline parameters on line pipe quality requirements 22
  - 1.5 Line pipe standards and properties 28
- 2 The Most Important Processes for the Manufacture of Oil and Gas Line Pipe 31
  - 2.1 General information on processes for pipe and prematerial production 31
  - 2.2 Manufacture of longitudinally welded pipe 34
  - 2.3 Manufacture of spirally welded pipe 40
  - 2.4 Manufacture of multi-layer pipe 44
- 3 Defects in Oil and Gas Line Pipe
  - 3.1 Classification of defects 47
  - 3.2 Plate and strip defects 47
  - 3.3 Material defects in the weld 53
  - 3.4 Dimensional deviations in pipe 58
  - 3.5 Defects in the weld contour 61

## Part II Non-destructive Testing Methods for Oil and Gas Transmission Line Pipe – General 65

- 4 Ultrasonic Testing 67
  - 4.1 Ultrasonic waves in solids 67
  - 4.2 Piezoelectric US-transducers 72
  - 4.3 Electromagnetic US-transducers 81
  - 4.4 Active ultrasonic testing techniques 85
  - 4.5 Passive ultrasonic testing techniques 92

## XII *Contents*

<b>5</b>	<b>Electromagnetic Technique</b>	95
5.1	Electromagnetic fields and waves	95
5.2	Electrostatic testing techniques	97
5.3	Magnetostatic testing techniques	98
5.4	Assessment of the micro-structure and mechanical properties of ferromagnetic steels using magnetic techniques	105
<b>6</b>	<b>Radiographic Technique</b>	109
6.1	Ionising radiation	109
6.2	X-ray and gammagraphic testing techniques	118
<b>Part III Equipment for On-line Non-destructive Testing of Oil and Gas Transmission Line Pipe</b> 127		
<b>7</b>	<b>Non-destructive Testing of Plate and Strip</b>	129
7.1	Test requirements and principles	129
7.2	Testing techniques	130
7.3	Ultrasonic testing equipment for plate and strip	141
7.4	Equipment for testing the mechanical properties of rolled plate using the magnetic pulse technique	175
7.5	Development trends in techniques and equipment for non-destructive plate and strip testing	178
<b>8</b>	<b>Non-destructive Testing of the Weld</b>	183
8.1	Test requirements and principles	183
8.2	Testing techniques	186
8.3	Equipment for ultrasonic testing of the weld	188
8.4	Equipment for radiographic testing of the weld	206
8.5	Development trends in techniques and equipment for non-destructive testing of the weld	214
<b>9</b>	<b>Non-destructive Testing of the Pipe Body and Ends</b>	221
9.1	Test requirements and principles	221
9.2	Testing techniques	222
9.3	Equipment for magnetic particle examination of pipe	225
9.4	Development trends in techniques and equipment for non-destructive testing of the pipe body and ends	232
<b>10</b>	<b>Quality Assurance System for Pipe Production</b>	233
10.1	Organization principles	233
10.2	In-process measuring and testing steps	236
10.3	Computer-assisted quality assurance	239
10.4	Non-destructive testing methods within the framework of quality assurance	246
