Preface	vii

Chapter 1. Acoustic Emission

P. H. HUTTON AND R. N. ORD

I. Introduction and Background	1
II. Theoretical Aspects and Physical Principles	4
III. System Study	11
IV. Applications	23
V. Areas for Further Development	28
VI. Acknowledgements	30
References	30

Chapter 2. Ultrasonic Spectroscopy

O. R. GERICKE

I. Introduction	31
II. Theory	34
III. Instrumentation.	40
IV. Applications	48
V. Future Developments.	58
References	61

Chapter 3. Ultrasound Imaging Systems

J. E. JACOBS

I. Introduction	63
II. Optical and Mechanical Techniques	65
III. Electronic Systems	68
IV. Considerations in Ultrasonic Inspection Systems	77
V. Applications of Ultrasound Imaging Systems	79
VI. Summary	87
References	88

Chapter 4. Ultrasonic Critical Angle Reflectivity

F. L. BECKER AND R. L. RICHARDSON

I.	List of Symbols.	.	.	91
II.	Introduction	.	.	94
III.	Theory	.	.	95
IV.	Experiment	.	.	113
V.	Conclusions	.	.	129
VI.	Acknowledgement	.	.	130
	References	.	.	130

Chapter 5. Ultrasonic Holography

E. E. ALDRIDGE

I.	List of Symbols.	.	.	133
II.	Introduction	.	.	134
III.	Theory of Holograms.	.	.	135
IV.	Ultrasonic Holograms	.	.	139
V.	Applications and Limitations of Ultrasonic Holography.	.	.	147
VI.	Acknowledgements	.	..	150
	Appendix I.	.	.	150
	Appendix II	.	.	152
	References	.	.	154

Chapter 6. Optical Holography and Coherent Light Techniques

A. E. ENNOS

I.	List of Symbols.	.	.	155
II.	Introduction	.	.	156
III.	The Holographic Process	.	.	157
IV.	Interferometry with Holograms	.	.	162
V.	Deformation Studies by Hologram Interferometry.	.	.	164
VI.	Engineering Inspection of Shape by Interference Holography	.	.	168
VII.	Holography Applied to Vibration Analysis	.	.	171
VIII.	Fatigue Detection by Holography	.	.	174
IX.	Laser Speckle Effects and their Uses in Testing	.	.	176
X.	Practical Limitations of Coherent Light Methods of Testing	.	.	178
	References	.	.	179

Chapter 7. Data Handling Techniques

C. W. Cox

I.	List of Symbols.	.	.	182
II.	Background	.	.	185
III.	State of the Art.	.	.	185
IV.	The Scanning Test	.	.	186
V.	Characterization of Signals	.	.	192

CONTENTS

xi

VI. Time-Bandwidth Considerations	207
VII. Transducer Output Noise	213
VIII. Spectral Processing	217
IX. Decision Processes	224
X. Pattern Recognition	231
XI. Generalized Filters	235
XII. Digital Processing	238
References	239

Chapter 8. Direct-View Radiological Systems

R. HALMSHAW

I. Introduction	241
II. Types of System	242
III. principles of Operation of Image Intensifier Systems	245
IV. Determination of Performance	246
V. Radiological Performance of Image Intensifier Systems	256
VI. Industrial Applications	261
VII. Future Developments.	264
References	266

Chapter 9. Neutron Radiography

H. BERGER

I. Introduction	269
II. Techniques for Neutron Radiography	272
III. Applications of Neutron Radiography	297
IV. Further Research on Neutron Radiography	307
V. Acknowledgements	308
References	309

Chapter 10. A Communication Network Approach to Sub-millimetric
Wave Techniques in Nondestructive Testing

W. H. B. COOPER

I. Introduction	316
II. One-dimensional Electromagnetic Waves in Loss-free Media	318
III. A Generalized Form for the Basic Equations of the Transport Process	320
IV. Electromagnetic Waves in Conducting Media	321
V. Electromagnetic Waves in Conducting Media from a Microscopic Point of View	323
VI. Electromagnetic Waves in a Conducting Medium in the Presence of a Strong Steady Magnetic Field	325
VII. The Wave-like Properties of Heat Flow in Solids	328
VIII. Longitudinal Acoustic Waves in Fluids and Solids.	329
IX. Reflections due to Discontinuities	331
X. The Impedance Concept Applied to Two-dimensional Media	337
XI. Some Electrical Analogues of the Transport Processes of Table I	339
References	344

Chapter 11. Multiparameter **Eddy** Current Concepts

H. L. LIBBY

I.	Introduction	345
II.	Three Concepts of the Multiparameter Principle	347
III.	Separation of Parameters	357
IV.	Instrumentation.	365
V.	Test Results	371
VI.	Future Potential	381
VII.	Acknowledgements	382
	References	382

Chapter 12. Pulsed **Eddy** Currents

D. L. WAIDELICH

I.	Introduction	383
II.	Early Work	384
III.	Conclusions	411
	References	411

Chapter 13. Microwave Techniques

D. S. DEAN AND L. A. KERRIDGE

I.	Introduction	417
II.	Propagation of Microwaves	419
III.	Microwave Components	421
IV.	Applications	427
V.	Microwave Visualization Techniques	436
VI.	Future Microwave Techniques	438
	References	439

Chapter 14. Infrared Techniques

W. D. LAWSON AND J. H. SABEY

I.	Introduction	443
II.	Infrared Radiation	443
III.	Atmospheric Transmission	448
IV.	Infrared Detection	450
V.	Detector Cooling	454
VI.	Optical Components	455
VII.	Infrared Systems	457
VIII.	Characteristics of Infrared Sensing	467
IX.	Infrared Applications.	470
	References	478
	AUTHOR INDEX	481
	APPLICATIONS INDEX	489
