

### Contents

<b>LIST OF CONTRIBUTORS</b> . . . . .	v
<b>PREFACE</b> . . . . .	vii

#### Chapter 1. Proton Radiography

**A. M. KOEHLER AND H. BERGER**

I. Introduction . . . . .	1
II. Previous Work in Charged Particle Radiography . . . . .	3
III. Principles of the Technique . . . . .	7
IV. Apparatus and Technology . . . . .	20
V. Applications . . . . .	26
VI. Conclusions . . . . .	28
References . . . . .	29

#### Chapter 2. Information Theory Applied to Industrial Radiography

**R. HALMSHAW**

I. Introduction . . . . .	31
II. The Radiographic Image . . . . .	32
III. The Radiological System as a Communication Channel . . . . .	36
IV. Factors which limit the Information in the Image . . . . .	37
V. Considerations of the Radiographic Image in Terms of Frequency . . . . .	46
VI. Information Capacity . . . . .	55
VII. Theory of an Overall Radiographic Performance . . . . .	62
References . . . . .	63

#### Chapter 3. Computer and Optical Processing of Pictures

**C. J. TAYLOR AND B. R. PULLAN**

I. Introduction . . . . .	65
II. Picture Transforms . . . . .	67
III. Optical Implementation of Picture Transforms . . . . .	70
IV. Digital Computer Implementations . . . . .	77
V. Future Developments . . . . .	85
References . . . . .	86

## Chapter 4. Electroluminescent Storage and Display Panels for Radiography

P. W. RANBY

I. Introduction and Background . . . . .	89
II. General Principles of Electroluminescence . . . . .	91
III. Control of Electroluminescence . . . . .	97
IV. Image Storage Panels . . . . .	103
V. d.c. Operated Panels . . . . .	113
VI. Conclusion . . . . .	118
References . . . . .	118

## Chapter 5. Magnetic Flux Analysis Techniques

N. DAVIS

I. Introduction . . . . .	121
II. Stray Flux Techniques . . . . .	122
III. Stress Measurement . . . . .	125
IV. Magneto-Metallurgy . . . . .	131
V. Flux collapse . . . . .	144
VI. Conclusion . . . . .	147
References . . . . .	148

## Chapter 6. Eddy Current Test for Tubing Flaws in Support Regions

H. LIBBY

I. Introduction . . . . .	151
II. Multiparameter Eddy Current Test Techniques . . . . .	152
III. General Transformation Method . . . . .	154
IV. Signal Pattern Rotation Transform Technique . . . . .	165
V. Analytical Confirmation of Performance . . . . .	176
VI. Summary . . . . .	182
VII. Further Direction . . . . .	183
References . . . . .	184

## Chapter 7. Optical Holographic Interferometry

J. E. SOLLID

I. Introduction . . . . .	185
II. Historical Review . . . . .	186
III. Theory and Physical Principles . . . . .	188
IV. Application of Holography to Nondestructive Testing . . . . .	201
V. Critical Comments . . . . .	206
VI. Potential for Development . . . . .	209
References . . . . .	219

**Chapter 8. Non-coherent Optical Techniques for Surface Survey**

**J. P. DUNCAN**

I. Introduction . . . . .	224
II. Optical Systems . . . . .	225
III. Surface . . . . .	229
IV. Surface Marking by Optical Projection . . . . .	237
V. Grating Projection Systems . . . . .	247
VI. Photogrammetry . . . . .	263
VII. Summary . . . . .	265
References . . . . .	268

**Chapter 9. Vibration Monitoring**

**E. DOWNHAM**

I. Introduction . . . . .	270
II. The Limitations of Generalized Vibration Criteria . . . . .	272
III. Vibratory Exciting Forces and Instabilities in Rotating Machinery . . . . .	279
IV. The Characteristic Response of Machines and Support Structures to Vibratory Forces . . . . .	295
V. Instrumentation for Vibration Monitoring and Diagnosis . . . . .	303
VI. Prediction of Wear . . . . .	312
VII. The Ultimate Goal . . . . .	314
References . . . . .	314

**Chapter 10. Means of Visualizing Ultrasound**

**D. M. MARSH**

I. Introduction . . . . .	317
II. Visualization of Ultrasound . . . . .	318
III. Simulation of Ultrasound in the Computer . . . . .	358
Appendix . . . . .	364
References . . . . .	366

**Chapter 11. The Reduction and Display of Ultrasonic Data**

**D. S. DEAN AND D. YOUNG**

I. Introduction . . . . .	369
II. Direct Plotting of Scanned Data . . . . .	370
III. Imaging Systems . . . . .	374
IV. Specialized Data Reduction and Display. . . . .	376
References . . . . .	391

**Chapter 12. Ultrasonic Image Synthesis**

L. KAY

I. Introduction . . . . .	393
II. The Nature of a Defect . . . . .	394
III. Some Fundamentals Relating to Imaging . . . . .	395
IV. The Concept of Spatial Frequencies . . . . .	398
V. Practical Ultrasonic Imaging . . . . .	402
VI. Some Imaging Results . . . . .	410
VII. General Conclusions . . . . .	416
References . . . . .	417

**Chapter 13. Electromagnetic Generation of Ultrasound**

E. R. DOBBS

I. Introduction . . . . .	419
II. Basic Theory . . . . .	421
III. Experimental . . . . .	425
IV. Coil Design . . . . .	429
V. Applications . . . . .	432
References . . . . .	441
<b>AUTHOR INDEX . . . . .</b>	<b>443</b>
<b>APPLICATIONS INDEX . . . . .</b>	<b>451</b>
