

CONTENTS

Overview	1
----------	---

ANALYSIS

Automated Design of Composite Plates for Improved Damage Tolerance	5
Composite Interlaminar Fracture Toughness : Three-Dimensional Finite-Element Modeling for Mixed Mode I, II, and Fracture	23
Sublaminar-or Ply-Level Analysis of Composites and Strain Energy Release Rates of End-Notch and Mixed-Mode Fracture Specimens	41
A Cumulative Damage Model for Continuous Fiber Composite Laminates with Matrix Cracking and Interply Delaminations	57
Interlaminar Fracture Analysis of Composite Laminates Under Bending and Combined Bending and Extension	81

IMPACT AND COMPRESSION

Effect of Adhesive Layers on Impact Damage in Composite Laminates	97
The Correlation of Low-Velocity Impact Resistance of Graphite-Fiber-Reinforced Composites with Matrix Properties	124
The Sandwich Column as a Compressive Characterization Specimen for Thin Laminates	143
Instability-Related Delamination Growth in Thermoset and Thermoplastic Composites	161
Two-Dimensional Delamination Growth in Composite Laminates Under Compression Loading	180
An Experimental Study of a Curved Composite Panel with a Cutout	191

MATERIALS CHARACTERIZATION

Characterizing the Tensile Stress-Strain Nonlinearity of Polyacrylonitrile-Based Carbon Fibers	205
Development of a standard Quality-Control Test Method for Determining the Fiber Strength of Graphitized Roving	217
The Development of a Satisfactory, Simple, Shear Fatigue Test for Unidirectional E-Glass Epoxy	227
Height-Tapered Double Cantilever Beam Specimen for Study of Rate Effects on Fracture Toughness of Composites	241
A Constant ΔG Test for Measuring Mode I Interlaminar Fatigue Crack Growth Rates	259

FAILURE MECHANISMS

Growth of Elliptic Delaminations in the Laminates Under Cyclic Transverse Shear Stresses	281
Analytical and Experimental Investigation of the Notched Strength of Thick Laminates with Surface Notches	298
Analysis of Delamination Growth from Matrix Cracks in Laminates Subjected to Bending Loads	322
Interlaminar Fracture Processes in Resin Matrix Composites Under Static and Fatigue Loading	340
Failure Mechanism of Delamination Fracture	356

NONDESTRUCTIVE EVALUATION

The Use of Acoustic Emission to detect the Onset of Interlaminar Shear Failure in Short Beam Fatigue Specimens	369
Damage Assessment by Acousto-Ultrasonic Technique in Composites	380

FILAMENT WOUND AND WOVEN COMPOSITES

Viscoelastic/Damage Modeling of Filament-Wound Cylindrical Pressure Vessels	401
Residual Stress and Strength Loss in Filament-Wound Composites	413
Strength of Woven-Fabric Composites with Drilled and Molded Holes	423
Mechanical Behavior of Braided Composite Materials	438
Author Index	455
Subject Index	457
