

CONTENTS

	Page
POLYMERES/ POLYMERS:	
“Mecanismes et cinetiques de reticulation de systemes thermodurcissables en presence de renfort – relations structures proprietes thermiques”	35
“Modified bismaleimides for carbon fibre composites”	43
“Enhanced bonding of fiber reinforcements to thermoset resins”	51
“influence of the thickening agents and some external parameters to the formulation on the viscosimetric kinetics of the preimpregnated polyester”	57
FIBRES:	
“The modulus of alumina fibres containing mesopores dependence of orientation distribution”	65
“Statistical mechanical breakdown of single fibres and microcomposites using video microphotographic techniques”	71
“The strength of tungsten-cored silicon-carbide fibres and the influence of a polymer matrix”	79
MATRICES CERAMIQUES / CERAMIC MATRIX:	
“Fibre reinforced alumina ceramic composites by sol-gel processing”	87
“Silicon carbo-nitride ceramic matrix composites by polymer pyrolysis”	93
“Composites a matrice ceramique, nouveaux materiaux a tres hautes performances”	99
“Interface characterization in ceramic matrix composites fabricated using FCV1 techniques”	NC
“Resistance to crack growth in fibre reinforced cement: effect of fibre properties”	111
“Thermo-mechanical characterization of ceramic composites made of a las glass-ceramic matrix reinforced with silicon carbide (nicalon) fibers”	121
“Interface characterization by transmission electron microscopy and Auger electron spectroscopy in tough SiC fiber (nicalon)-SiC matrix composite with a boron nitride interphase”	129
MATRICES METALLIQUES / METAL MATRIX:	
“Cast fibre reinforced aluminium alloy microstructures”	139
“The influence of thermal cycling on the properties of Si ₃ N ₄ whisker reinforced aluminium alloy composites”	145
“Fracture of Al-SiCw metal matrix composites”	151
“Physicochemical aspects of the K ₂ ZrF ₆ process allowing the spontaneous infiltration of SiC (or C) preforms by liquid aluminium”	157
“Mechanisms for mechanical property enhancement of fibre reinforced metals using a hybrid technique”	165
“Powder metallurgical production of whisker reinforced magnesium”	171
“Vibratory orientation of short reinforcing fibers in metal matrix composites”	177
“Titanium matrix composites reinforced by C.V.D. filaments: a review of their thermo-mechanical capabilities”	185
“A comparative study of the mechanical behaviour of zinc reinforced by stainless steel filaments manufactured via two different processes”	193
“Creep rupture of 1100 series Al/SiC Particulate MMC”S”	199
“Microstructural stability of fibrous composites based on magnesium-lithium alloys”	205

“Microstructural development and mechanical behaviour of SiC whisker-reinforced Mg-Li alloys”	213
“Particle reinforced magnesium alloys”	221
“Heat-treatment effects in δ – alumina fibre reinforced aluminium alloy 6061”	227
“Hot working behavior of discontinuous SiC/Al Composites obtained by rheocasting”	233

INTERFACES:

“Etude de l’interface fibre-clastomerc dans Ics composites a monofilament”	243
“Greffage electrochimique de fonctions aminees en surface de fibres de carbone : effet sur la tenacite d’un composite carboneepoxy”	249
“Etude des proprietes de surface de fibres aramides par chromatographic gazeuse inversc : effet de divers traitements:	NC
“Elaboration en continu d’umn depot mince de carbure refractaire en surace des fibres de carbone : caracterisation de la fibre C/SiC”	257
“Sputter deposition of diffusion barrier coatings on SiC monofilaments for use in Ti-based composites”	265
“Sims analysis of SiC coated and uncoated nicalon fibers”	273
“The effect of surface treatment on the interfacial strength of corrosion resistant glass fibres in a vinylester resin”	279
“Effects of matrix microstructure changes after annealing on fracture properties of polypropylenc/glass fibres injection molded composites”	287
“Compatibilite chimique entre le magnesium et les fibres de carbone”	293

CONCEPTION ET CALCUL / DESIGN AND ANALYSIS:

“Etude de la fissuration d’un materiau composite verre-epoxyde unidirectionnel sollicite en traction”	301
“Design and analysis of orthotropic composite materials through a mixed mode cohesive crack simulation”	309
“Contact behaviours of laminated composite thin shells and a rigid ball”	315
“Design and analysis of statically and dynamically loaded composite dandwich panels”	NC
“Large deflection initial failure of laminated rectangular plates”	321
“Post-buckling of flat stiffened graphite/epoxy panels under cyclic compression”	333
“Finite element analysis of composite panel flutter”	341
“Optimising the geometry of energy absorbing composite tubes with particular reference to rail vehicle application”	347
“Stresses in the joint of an end fitting to a composite torque tube”	353
“Strength and responsite of composite plates containing an open hole and subjected to compressive loading”	359
“Design analysis of web-core composite sandwich panels”	NC
“Integrally woven sandwich-structures”	365

ELABORATION / PROCESSING:

“A model for pressure bag technology”	NC
“The development and application of the multi live-feed moulding process for the production of injection mouldings containing laminated and other specific fibre orientation distributions”	375
“Fabrication of fiber reinforced ceramic composites”	381
“Processing parameters influence on the morphology and mechanical properties of sheet moulding compounds”	389
“The manufacture of ultra-lightweight large diameter composite pistons”	395
“Design of domes by use of the filament winding technique”	401

COMPORTEMENTS MECANIQUES / MECHANICAL PROPERTIES:

“Statistical inference about stress concentrations in fibrematrix composites”	411
-------------------------------------------------------------------------------	-----

“A standard for interlaminar fracture testing of composites”	419
“Impulse and random tests for the modal parameters evaluation for a CFR panel”	425
“Effet des conditions d’elaboration sur le comportement mecanique, statique et dynamique de materiaux composites hautes performances a matrice thermoplastique semicristalline”	431
“Mechanical strength properties for anisotropic composites”	441
“High performance composites made of solid thermoplastic powder impregnated fiber bundles”	445
“Effect of fibre volume fraction on tensile fatigue behaviour of UD glass/epoxy composite”	451
“Matrix selection for GRP fatigue loaded structures”	457

FISSURATION / CRACK:

“Influence of the fibre-matrix interface on the matrix crack development in carbon-epoxy cross-ply laminates”	465
“Analysis of thick laminates using effective moduli”	473
“Microfractography of carbon fibre-reinforced bismaleimides”	481
“Porosity in advanced composite materials : its evaluation and effects on performances”	487
“Matrix cracking in cross plied thermosetting and thermoplastic composites during monotonic tensile loading”	493

ENDOMMAGEMENT ET FATIGUE / DAMAGE AND FATIGUE :

“Damage development in carbon fibre reinforced composite laminates under compressive static and fatigue loading”	501
“Damage tolerance of carbon fibre reinforced plastic sandwich panels”	509
“Static and fatigue fracture of composites in complex state of stress”	515
“Damage development in CFRP and its detection”	521
“Stiffness changes during fatigue of angle-ply glass / polyester of high quality under very large number of cycles”	529
“3D-fabrics for composite sandwich structures”	535

FLUAGE / CREEP :

“Non linear viscoelasticity applied for the study of durability of polymer matrix composites”	545
“Comportement au fluage de stratifies polyester/verre E destines a des applications navales”	551

VIEILLISSEMENT / AGEING :

“Thermal fatigue of carbon fibre/bismaleimide matrix composites”	563
“The influence of temperature and moisture on cross-ply cracking in CFRP in terms of matrix fracture strain and interface strength”	571
“Artificial ageing of fibre reinforced composite materials-three stage method”	587
“Aspects of the thermal degradation of PMR-15 based composites”	595
“The hygromechanical degradation of aramid-epoxy composites”	603
“Fatigue behaviour of GFRP : some considerations about interfaces”	609
“Systematic fretting wear and fretting fatigue studies on carbon fibre/epoxy laminates”	615
“Influence of moisture on the compression behaviour of composites”	621
“Moisture diffusion into two-phase matrix resins for fibre composites”	627
“Influence du vieillissement sur le comportement au perlage de tubes verre-resine”	635
“Moisture absorption in fluence on the mechanical properties of carbon/epoxy composites”	643

FRACTURE :

“The influence of fiber bundle reinforcement on the fracture mechanical behaviour of polycarbonate and epoxy”	651
“Prediction of impact behaviour concerning CFRP laminates”	NC
“Trigger mechanisms in energy absorbing glasscloth-epoxy tubes”	657

HYBRIDES / HYBRIDS :

“The effect of agglomeration and the residual stress state on the performance of graded particulate hybrid glass fibre composites”	665
“Compressive behaviour of unidirectional glass/carbon hybrid laminates”	671
“Fatigue of hybrid composites”	677

MODELISATION, SINGULARITES / MODELING :

“An analytical investigation on the thermally induced response of composites in the absence of thermal equilibrium”	687
“A tentative interpretation of the CFRP mechanical characteristics based upon the fibre/matrix relations at the interface A case study”	693
“Endommagement en compression et en traction autour d’un trou d’un materiau composite carbone/epoxy”	699
“The influence of specimen geometry and test conditions on the tensile and fracture mechanics properties of GRP”	705
“Semi-empirical modelling of stress rupture data on glass reinforced plastics”	713
“A model of laminated composite plates assuring the continuity of displacements and transverse shear stresses”	721
“Free-edge stress singularity computation”	725
“Evaluation d’un nouvel element fini pour l’analyse statique ou dynamique des plaques composites”	733

CISAILLEMENT / SHEAR “

“An experimental-analytical investigation of intralaminar shear properties of unidirectional CFRP”	741
“On the end notched flexure (ENF) test for the mode II interlaminar toughness of continous fibre reinforced composites”	NC
“Interlaminar fracture testing of carbon fibre/peek composites Validity and applications”	747

METHODES NON DESTRUCTIVES / NON DESTRUCTIVE TECHNIQUES :

“La tomodensitometrie : methode non-destructive efficace d’observation des endommagements dans les materiaux composites”	NC
“Measuring strain in carbon fibre composite laminates using the Raman optomechanical strain gauge”	759
“Raman optomechanical studies on fibres and composites”	765
“Développement de methodes de controle par emission acoustique des structures composites”	771
“Cure characteristic determination using microelectronic dielectric sensors”	779
“The use of laser moire interferometry in the study of deformation fields in composites and adhesives”	785
“NDE of thick GFRP composites through ultrasonic waveform detection”	793

CHOC / IMPACT :

“Inertial effects in twin skinned GRP laminates subjected to impact loading in a three point bend configuration”	803
“The effect of crystallinity on the impact properties of advanced thermoplastic composites”	809
