

## CONTENTS

	Page
Preface	iii
Contributors	viii
1. Techniques for Strain Characterization of Materials	1
2. Alumina-Silica System	23
3. Properties of Zirconia Toughened Mullite Creamics	35
4. Compaction Behavior and Mechanical Characteristics of Ceramic Powders	65
5. Molten Salt Corrosion of SiC and Si <sub>3</sub> N <sub>4</sub>	99
6. Dynamic Properties of Epoxy Resins	137
7. Planar-Random Fiber Composites	179
8. Modeling Porous Glass Wool Composite Strength	207
9. Corrosion Phenomena in Glass-Fiber-Reinforced Thermosetting Resins	231
10. Fracture Toughness of Fiber-Reinforced Composites	269
11. The Crush of Fiber-Reinforced Plastics	307
12. Fabrication and Properties of Lignocellulosic	339
13. Thermochemical Expansion of Polymer Composites	387
14. Bending, Vibration, and Buckling of Laminated Plates	413
15. Laser Cutting of Reinforced Materials	451
16. Preparation of High-Density Ferrites	469
17. Design Optimization of Metal Matrix Composites	495
18. Aluminum Cast Metal Matrix Composite	555
19. Diffusion in Liquid Metal Systems: A Predictive Approach	601
Index	629
