MECHANICAL PROPERTIES OF COMPOSITES	
The Microstructure of Composites	3
The Behavior of Single Fine SiC and Al ₂ O ₃ Fibers at High Temperature	9
The Relationship Between Compressive Strength and Stiffness Loss of	1.4
Graphite Epoxy Composite Laminates	14
Static Mechanical Properties of Thermoplastic Matrix Composites	20
XPS Analysis of Carbon Fibre Surfaces and the Interfacial Properties of	26
Epoxy Resin Composites	26
Stress-Strain Behavior of Kevlar-Epoxy Angle-Ply Laminates Under	22
Compression Along the Thickness Direction	32
Stress-Strain-Time Relationship of SiC Yarns	38
Thermal Mechanical Properties of SiC Yarn	44
Effect of Moisture Absorption on the Mechanical Properties of Advanced Composites The Tensile Characteristics of Coreless and Carbon-core Silicon Carbide	50
Fibers Exposed to Some Environments	56
Mechanical Properties of Single Filament Composites Containing a High	
Toughness Metallic Filament Produced by Glass-Coated Melt Spinning	62
Thermoelastic Behavior of Injection-Molded Thermoplastic Composites	68
Weibull Analysis of Carbon Fibre Strength	75
The Efect of Reinforcement on Interfacial Bonding and Mechanical	
Properties of Fiber Strength	80
The Effect of Curing Conditions on the Equilibrium Moisture Levels and	
Residual Dicyandiamide (DICY) in GRP Laminates	87
A Thermodynamic Theory of Rate Independent Thermoplasticity of	
Fiber-Reinforced Materials	94
Effect of Fibre and Resin Properties on Stress Gradients Around Openings in FRP	
Orthotropic Plates	100
Effect of Hydrostatic Pressure on the Tensile, Compressive and Shear	
Stress-Strain Behavior of Nylon 6-Glass Fiber Composites	106
Pyrolyzed Resinous Matrices for Composites	112
The Stress Corrosion of Glass Fibres and Epoxy Composites in Aqueous Environments	118
Strain Capabilites and Strain Rate Effects in Epoxy Resins and Laminates	124
The Ageing Properties of GRP	130
Elastic Moduli or Unidirectional Carbon Fiber Composites	135
ANALYSIS AND DESIGN OF COMPOSITE STRUCTURES	
Viscoelastically Damped Multilayered Plates	143
Tension and Compression of the Beams and the Plates Made from Quadratic	4.40
Order Nonlinear Materials	148
A Refined Theory for Laminated Anisotropic Cylindrical Shell	154
Nonlinear Analysis of Composite Laminates Accounting for Elastic-Plastic	
Material Behavior	162
The Effect of Nonlinear Behavior of Composite Materials on Load	4.60
Capability of Laminate	168
Nonlinear Vibration and Postbuckling of Orthotropic Rectangular Plate with	
Two Adjacent Edges Clamped and the Other Edges Simply Supported	174
Hybrid and Textile Structural Composites: An Overview	181
Composite Flywheel Burst Failure and containment Interactions	187
The Ultimate Strength of Open-Section Composite Material Beams	195
Calculation of the Room-Temperature Shapes of Unsymmetric Laminates	201
Analysis of Stability for the Delamination of Clamped Orthotropic Rectangular Plates	207

Approximate Analyses for the Bending and Vibration of Laminated Plates	214
The Development of Aeroelastic Tailoring in the United States	220
Simple Design Concept of Composite Structural Components with Special	
Reference to Fabrication Ease	228
Optimum Design of Symmetrically Laminated Composites, Considering the	
Stress Peak at an Angle-Plied Interface	233
Effects of Transverse Shear on the Nonlinear Bending of Rectangular Plates	
Laminated of Bimodular Composite Materials	239
Thermal Stresses in Composite Tubes	246
Buckling Load of Fiber Reinforced Composite Laminated Plates	252
Development of Filament Wound S-2 Glass/Epoxy Pressure Vessel	261
Stability of Fiber-Composite Plates with Various Support Conditions	267
Finite Element Analysis of Laminated Plates Under Various Boundary Conditions	274
A Bending Analysis of Laminated Plates Under Various Boundary Conditions	280
On a Third-Order Shear Deformation Theory for Laminated Composite Shells	288
The Catastrophic Failure of Pressurized Graphite/Epoxy Cylindrical Shells	
Flawed with Two Colinear Slits	295
Optimization of Composite Structures by Controlled Insertion of Deletion of	
Diverse Fiber Types	301
Improved Laminated Composite Plate Theory	307
Buckling of Filament-Wound Composite Tubes Under External Pressure Loadings	315
Analysis of Composite Plates	321
Accurate Shear Force Evaluation with a Simple Bi-Linear Plate Bending Element	327
On the Load-Bearing Behaviour of Prestressed and Non-Prestressed	321
Bolted Joints of GRP	333
	339
A Field-Consistent 4-Noned Laminate Anisotropic Plate/Shell Element	
Failure of Buckled Composite Plates	345
Optimization of Laminated-Composite Circular-Cylindrical Shells Subjected to	251
Combined Loads	351
Thermal Buckling and Postbuckling Behavior of Antigymmetric Angle-Ply Laminates	357
Buckling Analysis of Discretely Stiffened Composite Long Curved Panels Under	
Compression and Shear	363
The Analysis of Special Orthotropic GRP Multi-Layered Pipes Subject to Fluid Loading	370
Minimum Weight Web-Core Composite Sandwich Panels Subjected to In-Plane	
Compressive Loads	376
Adhesive Stresses in Bonded Structures	381
Natural Vibrations of Channel-Sectioned Laminated Composite Beams with	
Moderate Thickness	387
The Nonlinear Elastic Buckling Problem of Laminated Cylindrical Panels of	
Composite Materials Under the Action of Axial Load	393
Aeroelastic Divergence of Orthotropic Plates	399
The Solution of Spline Element for Bending Problems of Rectangular	377
Symmetrically Laminated Plates	
Symmetricany Laminated Plates	400
	409
Geometrical Nonlinear Analysis of Laminated Anisotropic Plates by	
Geometrical Nonlinear Analysis of Laminated Anisotropic Plates by Weighted-Residual Method	416
Geometrical Nonlinear Analysis of Laminated Anisotropic Plates by Weighted-Residual Method Effect of Laminate Configuration on Failure of Bolted Composite Joint	
Geometrical Nonlinear Analysis of Laminated Anisotropic Plates by Weighted-Residual Method Effect of Laminate Configuration on Failure of Bolted Composite Joint Influence of Prebuckling Deformations on Instability of Laminated	416 422
Geometrical Nonlinear Analysis of Laminated Anisotropic Plates by Weighted-Residual Method Effect of Laminate Configuration on Failure of Bolted Composite Joint	416
Geometrical Nonlinear Analysis of Laminated Anisotropic Plates by Weighted-Residual Method Effect of Laminate Configuration on Failure of Bolted Composite Joint Influence of Prebuckling Deformations on Instability of Laminated Composite Cylindrical Shells Under Various Boundary Conditions	416 422
Geometrical Nonlinear Analysis of Laminated Anisotropic Plates by Weighted-Residual Method Effect of Laminate Configuration on Failure of Bolted Composite Joint Influence of Prebuckling Deformations on Instability of Laminated	416 422
Geometrical Nonlinear Analysis of Laminated Anisotropic Plates by Weighted-Residual Method Effect of Laminate Configuration on Failure of Bolted Composite Joint Influence of Prebuckling Deformations on Instability of Laminated Composite Cylindrical Shells Under Various Boundary Conditions	416 422
Geometrical Nonlinear Analysis of Laminated Anisotropic Plates by Weighted-Residual Method Effect of Laminate Configuration on Failure of Bolted Composite Joint Influence of Prebuckling Deformations on Instability of Laminated Composite Cylindrical Shells Under Various Boundary Conditions FRACTURE AND DAMAGE Determination of the Fracture Toughness Parameters for an MDF Cement Composite	416 422 428
Geometrical Nonlinear Analysis of Laminated Anisotropic Plates by Weighted-Residual Method Effect of Laminate Configuration on Failure of Bolted Composite Joint Influence of Prebuckling Deformations on Instability of Laminated Composite Cylindrical Shells Under Various Boundary Conditions FRACTURE AND DAMAGE Determination of the Fracture Toughness Parameters for an MDF Cement Composite The Relationship Between Resin Ductility and Composite Under Influence of	416 422 428 439
Geometrical Nonlinear Analysis of Laminated Anisotropic Plates by Weighted-Residual Method Effect of Laminate Configuration on Failure of Bolted Composite Joint Influence of Prebuckling Deformations on Instability of Laminated Composite Cylindrical Shells Under Various Boundary Conditions FRACTURE AND DAMAGE Determination of the Fracture Toughness Parameters for an MDF Cement Composite The Relationship Between Resin Ductility and Composite Under Influence of Clod Climate Factors	416 422 428
Geometrical Nonlinear Analysis of Laminated Anisotropic Plates by Weighted-Residual Method Effect of Laminate Configuration on Failure of Bolted Composite Joint Influence of Prebuckling Deformations on Instability of Laminated Composite Cylindrical Shells Under Various Boundary Conditions FRACTURE AND DAMAGE Determination of the Fracture Toughness Parameters for an MDF Cement Composite The Relationship Between Resin Ductility and Composite Under Influence of Clod Climate Factors Strength of Polymer Fibrous Composite Structures Under Influence of	416 422 428 439 445
Geometrical Nonlinear Analysis of Laminated Anisotropic Plates by Weighted-Residual Method Effect of Laminate Configuration on Failure of Bolted Composite Joint Influence of Prebuckling Deformations on Instability of Laminated Composite Cylindrical Shells Under Various Boundary Conditions FRACTURE AND DAMAGE Determination of the Fracture Toughness Parameters for an MDF Cement Composite The Relationship Between Resin Ductility and Composite Under Influence of Clod Climate Factors Strength of Polymer Fibrous Composite Structures Under Influence of Cold Climate Factors	416 422 428 439 445 451
Geometrical Nonlinear Analysis of Laminated Anisotropic Plates by Weighted-Residual Method Effect of Laminate Configuration on Failure of Bolted Composite Joint Influence of Prebuckling Deformations on Instability of Laminated Composite Cylindrical Shells Under Various Boundary Conditions FRACTURE AND DAMAGE Determination of the Fracture Toughness Parameters for an MDF Cement Composite The Relationship Between Resin Ductility and Composite Under Influence of Clod Climate Factors Strength of Polymer Fibrous Composite Structures Under Influence of Cold Climate Factors Delamination of Continuous Carbon Fibre Reinforced Thermoplastic Composites	416 422 428 439 445
Geometrical Nonlinear Analysis of Laminated Anisotropic Plates by Weighted-Residual Method Effect of Laminate Configuration on Failure of Bolted Composite Joint Influence of Prebuckling Deformations on Instability of Laminated Composite Cylindrical Shells Under Various Boundary Conditions FRACTURE AND DAMAGE Determination of the Fracture Toughness Parameters for an MDF Cement Composite The Relationship Between Resin Ductility and Composite Under Influence of Clod Climate Factors Strength of Polymer Fibrous Composite Structures Under Influence of Cold Climate Factors Delamination of Continuous Carbon Fibre Reinforced Thermoplastic Composites A New Statistic Model of Crack Propagation in a Unidirectionally	416 422 428 439 445 451 458
Geometrical Nonlinear Analysis of Laminated Anisotropic Plates by Weighted-Residual Method Effect of Laminate Configuration on Failure of Bolted Composite Joint Influence of Prebuckling Deformations on Instability of Laminated Composite Cylindrical Shells Under Various Boundary Conditions FRACTURE AND DAMAGE Determination of the Fracture Toughness Parameters for an MDF Cement Composite The Relationship Between Resin Ductility and Composite Under Influence of Clod Climate Factors Strength of Polymer Fibrous Composite Structures Under Influence of Cold Climate Factors Delamination of Continuous Carbon Fibre Reinforced Thermoplastic Composites A New Statistic Model of Crack Propagation in a Unidirectionally Fiber-Reinforced Composite	416 422 428 439 445 451 458 465
Geometrical Nonlinear Analysis of Laminated Anisotropic Plates by Weighted-Residual Method Effect of Laminate Configuration on Failure of Bolted Composite Joint Influence of Prebuckling Deformations on Instability of Laminated Composite Cylindrical Shells Under Various Boundary Conditions FRACTURE AND DAMAGE Determination of the Fracture Toughness Parameters for an MDF Cement Composite The Relationship Between Resin Ductility and Composite Under Influence of Clod Climate Factors Strength of Polymer Fibrous Composite Structures Under Influence of Cold Climate Factors Delamination of Continuous Carbon Fibre Reinforced Thermoplastic Composites A New Statistic Model of Crack Propagation in a Unidirectionally Fiber-Reinforced Composite On Fracture Analysis of Unidirectional Composites	416 422 428 439 445 451 458 465 471
Geometrical Nonlinear Analysis of Laminated Anisotropic Plates by Weighted-Residual Method Effect of Laminate Configuration on Failure of Bolted Composite Joint Influence of Prebuckling Deformations on Instability of Laminated Composite Cylindrical Shells Under Various Boundary Conditions FRACTURE AND DAMAGE Determination of the Fracture Toughness Parameters for an MDF Cement Composite The Relationship Between Resin Ductility and Composite Under Influence of Clod Climate Factors Strength of Polymer Fibrous Composite Structures Under Influence of Cold Climate Factors Delamination of Continuous Carbon Fibre Reinforced Thermoplastic Composites A New Statistic Model of Crack Propagation in a Unidirectionally Fiber-Reinforced Composite	416 422 428 439 445 451 458 465

Failure Mechanisms in Thermally Loaded Models of Fibrous Composites	
with a Brittle Matrix	483
Fracture Behaviour in Filament-Wound Tube with Notch Under Lateral	
Compressive Loading	489
Mixed-Mode Fracture in Graphite/Epoxy Laminates	495
Tensile Fracture of Glass Fiber Reinforced Laminates with Central Hole	505
Analysis of Fracture in Fibre Composites	511
Analysis of Progressive Damage Accumulation in Composites	516
Stress Intensity Factors of Orthotropic Laminate Composite Containing Cracks	510
on the Interface	522
Anisotropic Damage in Orthotropic Fiber-Reinforced Composite Plate	530
The Effect of Damage Development on the Compression Failure of Fatigued	330
Multidirectional Graphite/Epoxy Laminates	537
Delamination Analysis of Composites with Distributed Damage Using a J Integral	543
An Anisotropic Damage Model for Anisotropic Material	549
Failure in Quasi-Isotropic Composite Fiber Composites	556
A Fracture criterion of Crossply Fiber Composties Effects of Visid and Fiber Contests on Fracture Touchuses of P. PIM Polymethouses	564
Effects of Void and Fiber Contents on Fracture Toughness of R-RIM Polyurethanes	570
On Fracture Mechanice of Matrix Cracking in Composite Laminates	576
Study on the Characteristics of Delamination in Composite Laminates	585
Buckling and Growth of a Strip Delamination in a General Laminate	592
