

CONTENTS

The Elements	1
Engineering Compounds	47
Bonding, Thermodynamic, and Kinetic Data	125
Carbon Bond lengths (Periodic Table Presentation)	150
Carbon bond Lengths	151
Bond Length Values between Elements	154
Bond Angle Values between Elements	158
Heat of Formation of Selected Inorganic Oxides	160
Melting Points of Selected Elements and Inorganic Compounds	174
Melting Points of Ceramics	198
Heat of Fusion for Selected Elements and Inorganic Compounds	206
Surface Tension of Liquid Elements	218
Vapor Pressure of the Elements	235
Specific Heat of Selected Elements at 25 °C (Listed by specific Heat)	243
Heat Capacity of Selected Ceramics	253
Specific Heat of Selected Polymers	255
Phase Change Thermodynamic Properties	260
Thermodynamic Coefficients	281
Thermal Conductivity of Metals	305
Structure, Compositions, and Phase Diagram Sources	425
Mechanical Properties	511
Electrical, Magnetic, and Optical Properties	705
Chemical Properties	781
