<i>List of Contributors</i>	ix
<i>Foreword</i>	xi
<i>Preface to Volume 1</i>	xiii

1 Introduction and Review

Arthur G. Metcalje

I. Introduction	2
II. Review	12
References	28

2 Mechanical Aspects of the Interface

L. J. Ebert and P. Kennard Wright

I. The Nature of the Interface	32
II. The Mechanical Environment of the Interface	38
III. The Nature and Effects of Residual Stresses at Composite Interfaces	53
IV. Interfacial Strength Tests	57
List of Symbols	63
References	63

3 Physical Chemical Aspects of the Interface

Arthur G. Metcalje

I. Types of Interface Bonding	67
II. Interfacial Stability	76
III. Reaction Kinetics	87
IV. Control of Interface Reaction	112
References	121

4 Effect of the Interface on Longitudinal Tensile Properties

Arthur G. Metcalfe and Mark J. Klein

I. Theories for Strong Interfaces	127
II. Theories for Weak Interfaces	128
III. Effect of Reaction on Strength of Class III Systems	141
IV. Effect of Interface on Strength of Pseudo-Class I Systems	154
V. Effect of Interface on Strength of Class II Systems	163
VI. Relations of Interface Condition and Longitudinal Strength	164
References	166

5 Effect of the Filament–Matrix Interface on Off-Axis Tensile Strength

Mark J. Klein

I. Theoretical Analyses of Off-Axis Strength	170
II. Off-Axis Failure of Composites	185
III. Discussion and Summary	208
References	210

6 Role of the Interface on Elastic–Plastic Composite Behavior

A. Lawley and M. J. Koczak

I. Introduction	212
II. Micromechanics of Elastic and Plastic Deformation	213
III. Interfacial Effects on Mechanical Behavior–Structure Relationships	218
IV. Summary	241
References	242

7 Effect of Interface on Fracture

Elliot F. Olster and Russel C. Jones

I. Introduction	245
II. Fracture Toughness Testing	246
III. Fracture of Composites	256
IV. Summary	281
References	282

8 Interfaces in Oxide Reinforced Metals

Richard E. Tressler

I. Bulk Thermodynamic Considerations for Oxide–Metal Compatibility	286
II. Liquid Metal–Oxide Interactions	291
III. Solid State Bonding and Interface Development	309
IV. Interface Sensitive Mechanical Properties	315
V. Conclusion	326
References	327

9 Interfaces in Directionally Solidified Eutectics

Richard W. Hertzberg

I. Introduction	329
II. Characterization of Eutectic Interfaces	330
III. Interface Control of Mechanical Behavior	346
References	359

10 The Effect of Impurity on Reinforcement–Matrix Compatibility

W. Bonfield

I. Introduction	364
II. Impurity in the Reinforcement	365
III. Impurity in the Matrix	389
IV. Impurity in the Environment	397
V. Conclusion	404
References	405
