<i>Preface</i>	<i>xxi</i>
Part I Preparation of graphene	1
1 Epitaxial growth of graphene on silicon carbide (SiC)	3
H. HUANG, National University of Singapore, Singapore, S. CHEN, Nanyang Technological University, Singapore and A. T. S. WEE and W. CHEN, National University of Singapore, Singapore	
1.1 Introduction	3
1.2 Ultrahigh vacuum (UHV) thermal decomposition of single-crystal SiC	4
1.3 Thermal decomposition of single-crystal SiC under ambient pressure conditions	15
1.4 Thermal decomposition of single-crystal SiC thin films and polycrystalline SiC substrates	18
1.5 Epitaxial graphene formed by intercalation	20
1.6 Conclusion	21
1.7 Acknowledgements	22
1.8 References	22
2 Chemical vapor deposition (CVD) growth of graphene films	27
O. FRANK and M. KALBAC, J. Heyrovsky Institute of Physical Chemistry of the AS CR, v. v. i., Czech Republic	
2.1 Introduction	27
2.2 Chemical vapor deposition (CVD) on nickel	28

vi	Contents	
2.3	Graphene with large domain sizes on copper	31
2.4	Growth on copper single crystals	34
2.5	Periodically stacked multilayers	36
2.6	Isotope labeling of CVD graphene	38
2.7	Conclusion	42
2.8	Acknowledgment	42
2.9	References	42
3	Chemically derived graphene	50
	R. S. SUNDARAM, Max Planck Institute for Solid State Research, Germany and University of Cambridge, UK	
3.1	Introduction	50
3.2	Synthesis of graphene oxide (GO)	52
3.3	Reduction of graphene oxide (GO)	53
3.4	Physicochemical structure of graphene oxide (GO)	54
3.5	Electrical transport in graphene oxide (GO)	60
3.6	Applications of graphene oxide/reduced graphene oxide (GO/RGO)	64
3.7	Conclusion	72
3.8	Acknowledgements	72
3.9	References	72
4	Graphene produced by electrochemical exfoliation	81
	S. BOSE, T. KUILA, N. H. KIM and J. H. LEE, Chonbuk National University, Republic of Korea	
4.1	Introduction	81
4.2	Synthesis of graphene by electrochemical exfoliation: a basic concept	83
4.3	Applications of graphene and graphene-based materials	93
4.4	Conclusion	94
4.5	Acknowledgments	95
4.6	References	95
	Part II Characterisation of graphene	99
5	Transmission electron microscopy (TEM) of graphene	101
	J. C. MEYER, University of Vienna, Austria	
5.1	Introduction	101
5.2	Graphene structure basics	104
5.3	Electron diffraction analysis of graphene	105

5.4	Graphene and defects in graphene observed by aberration-corrected transmission electron microscopy (TEM) and scanning transmission electron microscopy (STEM)	107
5.5	Insights from electron microscopic studies of graphene	112
5.6	Conclusion	118
5.7	References	119
6	Scanning tunneling microscopy (STM) of graphene A. L. VÁZQUEZ DE PARGA and R. MIRANDA, Autonomous University of Madrid, Spain and Madrid Institute for Advanced Studies in Nanoscience, Spain	124
6.1	Introduction	124
6.2	Morphology, perfection and electronic structure of graphene flakes deposited on inert substrates	125
6.3	Morphology, perfection and electronic structure of graphene epitaxially grown on semiconductor and metallic substrates	131
6.4	Scanning tunneling microscopy (STM)/scanning tunneling spectroscopy (STS) of point defects	146
6.5	STM/STS on graphene nanoribbons (GNR)	148
6.6	Conclusion	150
6.7	References	150
7	Raman spectroscopy of graphene M. HULMAN, International Laser Center and Danubia NanoTech, Slovak Republic	156
7.1	Introduction	156
7.2	Principles of Raman scattering	157
7.3	Phonons in graphene	160
7.4	Electronic structure of graphene	162
7.5	Raman spectrum of graphene	165
7.6	Conclusion	181
7.7	Acknowledgement	181
7.8	References	181
8	Photoemission of low-dimensional carbon systems P. AYALA, University of Vienna, Austria	184
8.1	Introduction	184
8.2	Photoemission spectroscopy	185

viii	Contents	
8.3	Accessing the electronic properties of carbon sp^2 hybridized systems: the C1s core level	190
8.4	Chemical state identification: inspection of bonding environments	193
8.5	Valence-band electronic structure	194
8.6	Conclusion	194
8.7	Acknowledgement	195
8.8	References	195
Part III Electronic transport properties of graphene and graphene devices		197
9	Electronic transport in graphene: towards high mobility K. I. BOLOTIN, Vanderbilt University, USA	199
9.1	Introduction	199
9.2	Metrics for scattering strength	200
9.3	Methods of graphene synthesis	204
9.4	Sources of scattering in graphene	205
9.5	Approaches to increase carrier mobility	211
9.6	Physical phenomena in high-mobility graphene	219
9.7	Conclusion	221
9.8	Acknowledgments	221
9.9	References	222
10	Electronic transport in bilayer graphene R. ASGARI, Institute for Research in Fundamental Sciences (IPM), Iran	228
10.1	Introduction	228
10.2	Historical development of bilayer graphene	230
10.3	Transport properties in bilayer graphene systems	235
10.4	Many-body effects of transport properties in bilayer graphene	246
10.5	Conclusion	260
10.6	References	261
11	Effect of adsorbents on electronic transport in graphene Y. C. LIN and P. W. CHIU, National Tsing Hua University, Republic of China	265
11.1	Introduction	265
11.2	Interaction of adsorbates with graphene	266

11.3	Transfer-induced metal and molecule adsorptions	268
11.4	Influence of adsorbates on graphene field-effect transistors	274
11.5	Removal of polymer residues on graphene	279
11.6	Conclusion	287
11.7	References	287
12	Single-charge transport in graphene D. S. LEE, Korea Institute of Science and Technology (KIST), South Korea	292
12.1	Introduction	292
12.2	Single-charge tunneling	293
12.3	Electrical properties of graphene	296
12.4	Single-charge tunneling in graphene	302
12.5	Charge localization in graphene	311
12.6	Conclusion	317
12.7	References	317
13	Graphene spintronics M. SHIRAISHI, Osaka University, Japan	324
13.1	Introduction	324
13.2	Theories and important concepts	326
13.3	Experiments for generating pure spin current and the physical properties of pure spin current	330
13.4	Conclusion and future trends	337
13.5	References	339
14	Graphene nanoelectromechanics (NEMS) Z. MOKTADIR, Southampton University, UK	341
14.1	Introduction	341
14.2	Graphene versus silicon	342
14.3	Graphene mechanical attributes	343
14.4	Fabrication technology for graphene microelectromechanical systems (MEMS)	346
14.5	Graphene nanoresonators	349
14.6	Graphene nanomechanical sensors	356
14.7	Conclusion and future trends	358
14.8	References	358
