

Contents

<i>Preface</i>	iii
<i>Contributors</i>	ix
Chapter 1 Metallic Glass Materials JOHN J. GILMAN	1
Chapter 2 Semiconductor Materials for Active Devices and Integrated Circuits J. S. BLAKEMORE	29
Chapter 3 Industrial Applications of Ceramics DAVID J. GREEN	81
Chapter 4 Mechanical Behavior of Space Shuttle Thermal Protection System Tiles DAVID J. GREEN	123
Chapter 5 Physical Modification of Properties of Semi-crystalline Polymers ANTON PETERLIN	145
Chapter 6 Developments in Specialty and New Alloys: Conventional Processing, Alloy Systems, and Property Limitations ALAN LAWLEY	199

Chapter 7	Developments in Specialty and New Alloys: New Ingot and Powder Processing Technologies, Alloy Systems, and Properties <i>ALAN LAWLEY</i>	219
Chapter 8	Rapid Solidification Technology: Particulate Production and Consolidation <i>NICHOLAS J. GRANT</i>	243
Chapter 9	Rapid Solidification Technology: Structure-Properties Relationships <i>NICHOLAS J. GRANT</i>	273
Chapter 10	Wear and Related Materials Degradation <i>ARTHUR W. RUFF</i>	299
Chapter 11	Surface Modification of Materials— Ions, Lasers, and Electron Beams <i>SAMUEL THOMAS PICRAUX</i>	353
Chapter 12	Overview of Deposition Technologies with Emphasis on Vapor Deposition Techniques <i>ROINTAN F. BUNSHAH</i>	393
Chapter 13	Optical and Tribological Coatings Produced by Vapor Deposition Techniques <i>ROINTAN F. BUNSHAH and C. V. DESHPANDEY</i>	417
Chapter 14	Advanced In-Situ Composites <i>FRANKLIN D. LEMKEY</i>	441
Chapter 15	Materials Characterization Using Ion, Electron, and Photon Probes <i>A. W. CZANDERNA</i>	471
Chapter 16	Materials Characterization by Analytical Electron Microscopy <i>L. E. MURR</i>	519
Chapter 17	Problems and References <i>L. E. MURR</i>	561
Chapter 18	Problem Solutions and Discussion <i>L. E. MURR</i>	579
	<i>Index</i>	595
