<i>Preface to the first edition</i>	ix
<i>Preface to the second edition</i>	x
<i>Symbols used in text</i>	xi
<i>Units</i>	xii
Section A: Materials science	
1 Atomic structure	3
1.1 Introduction; 1.2 Elementary particles; 1.3 Atomic number and atomic weight; 1.4 The gramme atom and Avogadro's number; 1.5 The structure of the atom; 1.6 Quantum numbers; 1.7 The Pauli exclusion principle; 1.8 The periodic table; 1.9 The nucleus and radioactivity; 1.10 Artificial radioactive materials; 1.11 Mass defect and nuclear energy; Questions	
2 Bonding between atoms	20
2.1 Introduction; 2.2 Ionic bond; 2.3 Covalent bond; 2.4 The coordinate bond; 2.5 The metallic bond; 2.6 Secondary bonds; Questions	
3 Chemical reactions and reactivity	29
3.1 Introduction; 3.2 Reactivity; 3.3 The Law of Mass Action; 3.4 Energy change in a reaction; 3.5 Reaction equations; 3.6 Calorific value; 3.7 Air-fuel ratio; 3.8 Combustion problems; 3.9 Metal extraction and refining; 3.10 Polymerisation; 3.11 Ionisation and pH value; 3.12 Water softening; 3.13 Electrolysis; 3.14 Corrosion; Questions	
4 The crystalline state	54
4.1 Introduction; 4.2 Crystal classes; 4.3 Miller notation; 4.4 Metallic crystals; 4.5 Crystals of compounds; 4.6 Glasses; 4.7 Crystallites in polymers; 4.8 Analysis of crystals; Questions	
5 Elastic and plastic behaviour	73
5.1 Stress and strain; 5.2 Elastic constants; 5.3 Thermal stresses; 5.4 Plastic flow in metals; 5.5 Slip planes; 5.6 Deformation by twinning; 5.7 Dislocations; 5.8 Polycrystalline metals; 5.9 Plastic deformation and strain hardening; 5.10 Recrystallisation; 5.11 Solution hardening; 5.12 Dispersion hardening, 5.13 Yield point in mild steel ; 5.14 Diffusion and dislocation climb; 5.15 Behaviour of ceramic materials; 5.16 Glasses; 5.17 Polymeric materials; Questions	

6	Constitution	101
	6.1 Phases; 6.2 Metallic alloy systems; 6.3 Total solid insolubility; 6.4 Interpretation of phase diagrams; 6.5 Solid solubility; 6.6 Phase diagram for total solid solubility; 6.7 Partial solid solubility; 6.8 Peritectic diagram; 6.9 Intermetallic compounds; 6.10 Effect of alloy type on properties; 6.11 Allotropy; 6.12 Polymeric materials; 6.13 Ceramics; 6.14 Silicate structures; Questions	
7	Electrical and magnetic properties	122
	7.1 Conduction; 7.2 Band structure; 7.3 Conduction in metals; 7.4 Semiconductors; 7.5 The <i>p-n</i> junction; 7.6 Insulating materials; 7.7 Magnetic behaviour; Questions; Further reading	
Section B: Materials technology		
8	The shaping of materials	137
	8.1 Introduction; 8.2 Melting furnaces; 8.3 Melting and alloying; 8.4 Melt treatment; 8.5 Casting; 8.6 Sand casting; 8.7 Die casting; 8.8 Other casting processes; 8.9 Ingot casting; 8.10 Hot working; 8.11 Fibre structure; 8.12 Cold working; 8.13 Annealing; 8.14 Powder metallurgy; 8.15 The forming of thermoplastics; 8.16 The forming of thermosetting plastics; 8.17 Expanded plastics; 8.18 The forming of ceramics; Questions	
9	Nan-ferrous metals	178
	9.1 Introduction; 9.2 Aluminium; 9.3 Aluminium alloys; 9.4 Copper; 9.5 Copper alloys; 9.6 Lead; 9.7 Tin; 9.8 Magnesium; 9.9 Nickel; 9.10 Titanium; 9.11 Zinc; Questions	
10	Iron and steel	202
	10.1 Introduction; 10.2 Production of iron; 10.3 Steel production; 10.4 Constituents in steel; 10.5 The iron-carbon phase diagram; 10.6 Structures of plain carbon steel; 10.7 T-T-T diagrams; 10.8 Hard- enability; 10.9 Tempering; 10.10 Heat treatments for steels; 10.11 Types of steels and their uses; 10.12 Surface hardening; 10.13 The effects of alloying elements in steels; 10.14 Alloy steels; 10.15 Cast irons; 10.16 Malleable irons; 10.17 Alloy cast irons; Questions	
11	Thermoplastics	231
	11.1 Introduction; 11.2 Polyethylene – PE; 11.3 Polypropylene – PP; 11.4 Polyolefin copolymers; 11.5 Polyvinyl chloride – PVC; 11.6 Poly- tetrafluoroethylene – PTFE; 11.7 Polystyrene – PS; 11.8 Acrylic materials; 11.9 Polyamides (nylons) – PA; 11.10 Saturated polyesters; 11.11 Polycarbonate – PC; 11.12 Polyacetal; 11.13 Cellulosics; 11.14 Polyphenylenes; 11.15 Polysulphones; 11.16 Elastomers; 11.17 Silicones	
12	Thermosetting materials	250
	12.1 Introduction; 12.2 Phenolic materials; 12.3 Amino-formaldehyde	

materials; 12.4 Polyester materials; 12.5 Epoxide materials; 12.6 Polyimides; 12.7 Polyurethanes; Questions on Chapters 11 and 12

13 Ceramics	258
13.1 Introduction; 13.2 Building stone; 13.3 Clay products; 13.4 Refractories; 13.5 Cement and concrete; 13.6 Newer industrial ceramics; 13.7 Aluminium oxide; 13.8 Silicon nitride; 13.9 Glass ceramics	
14 Composite materials	266
14.1 Introduction; 14.2 Timber and plywood; 14.3 Fibre reinforced materials; 14.4 Dispersion-strengthened metals; 14.5 Cermets and 'hard metal'; 14.6 Sandwich structures; Questions	
15 The behaviour of materials in service	273
15.1 Fracture; 15.2 Temperature effects and the ductile–brittle transition; 15.3 Fatigue; 15.4 Creep; 15.5 Oxidation and degradation; 15.6 Corrosion; 15.7 Corrosion protection; 15.8 Attack on polymeric materials; 15.9 Radiation damage; 15.10 Machineability; Questions	
16 Testing of materials	300
16.1 Introduction; 16.2 Tensile testing machines; 16.3 Measurement of strain; 16.4 The tensile test – metals; 16.5 The tensile test – plastics; 16.6 The compression test; 16.7 Modulus of rupture; 16.8 Torsion testing; 16.9 Notch impact testing; 16.10 Hardness tests; 16.11 Fatigue testing; 16.12 Creep testing; 16.13 Non-destructive testing; 16.14 Vibration testing; Questions; Further reading	
17 Metal-joining processes	321
17.1 Introduction; 17.2 Soldering and brazing, 17.3 Fusion welding; 17.4 Other fusion-welding processes; 17.5 Pressure welding; 17.6 Metallurgical considerations for welding; 17.7 Defects in welds; Questions	
Appendixes	
Appendix A Macroscopical and microscopical examination of metals	345
A.1 Macro-examination; A.2 Micro-examination; A.3 The electron microscope	
Appendix B Data tables	350
Table B1 Physical properties of some pure metals Table B2 Comparison of properties of metals, plastics and ceramics	
Appendix C Cost data	352
Table C1 Some raw-material costs Table C2 Cost build-up (steel products) Table C3 Cost build-up (aluminium products) Table C4 Cost build-up (plastics industry)	

Appendix D A note on materials selection	355
Appendix E Fracture mechanics	359
E.1 Introduction; E.2 Griffith's crack relationship; E.3 Stress distribution at a crack tip; E.4 Applications of K_{Ic} ; E.5 Yielding fracture mechanics; E.6 Determination of fracture toughness; E.7 Conclusions; Further reading
