PREFACE.	vii
------------------	-----

Some New Developments in Wood as a Material

CARL DE ZEEUW

I. Introduction and General Concepts.	1
II. The Nature of Wood as a Material.	4
III. Limitation of Variability in Wood	54
References.	59

Synthetic Rubbers for Special Service Conditions

F. A. BOVEY

I. Introduction.	66
II. Diene Polymers and Copolymers.	68
III. Mono-olefin Polymers and Copolymers	90
IV. Acrylic Elastomers	106
/V. Polysulfide Rubbers.	118
VI. Silicone Elastomers.	122
VII. Polyester and Diisocyanate-Polyester Elastomers.	128
References.	135

Fiber Materials

T. D. CALLINAN

I. Organic Fiber Developments.	143
II. Inorganic Fiber Developments.	148
References.	182

High Voltage Insulation Papers

WM. A. DEL MAR

I. Scope.	188
II. Moisture Adsorption and Content	189
III. Deterioration by Heat	191
IV. Volume Capacity of Paper for Oil	194
V. Permittivity, Dielectric Constant, Specific Inductive Capacity, or Capacitivity.	195
VI. Resistivity.	196

VII. Power Factor and Dielectric Loss	198
VIII. Electric Strength.	202
IX. Papers from Synthetic Fibers	213
References.	213

Special Glasses for Nuclear Engineering Applications

N. J. KREIDL AND J. R. HENSLEY

I. Introduction.	217
II. Glasses for Nuclear Engineering	218
III. Survey of Fundamental Literature	237
References.	239

Characteristic Properties of Modern Ceramics

JOHN H. KOENIG AND EDWARD J. SMOKE

I. Introduction.	243
II. Refractoriness	245
III. Hardness	248
IV. Thermal Conductivity	250
V. Thermal Expansion.	251
VI. Strength.	253
VII. Electrical Properties	256
VIII. Nuclear Properties and Applications	268
References.	270

Germanium and Silicon

GUSTAV SZEKELY

I. Introduction.	273
II. Electrical Properties	274
III. Chemical Properties.	277
IV. Further Refining by Zone Melting and Crystal Growth	291
V. Determination of Trace Impurities	294
VI. Devices.	299
References.	303

Zirconium

G. L. MILLER

Introduction.	308
I. Occurrence	309
II. Uses of Zirconium	310
III. Extraction of Zirconium from the Ore.	315
IV. Separation of Hafnium from Zirconium	318
V. Production of Zirconium Metal.	321

VI. Melting.	339
VII. Furnace Explosions.	353
VIII. Fabrication	354
IX. Powder Metallurgy of Zirconium.	366
X. Physical Properties.	370
XI. Electrical Properties	372
XII. Crystallographic Properties	372
XIII. Atomic and Nuclear Properties.	374
XIV. Mechanical Properties.	375
XV. Impact Properties	375
XVI. Creep Properties	376
XVII. Corrosion Properties	377
References.	382
 AUTHOR INDEX.	 387
SUBJECT INDEX.	397
