Professional Societies in Materials Science and Engineering	1
American Ceramic Society (AcerS)	2
ASM International (ASM)	3
American Society for testing and Materials (ASTM)	4
The Materials Research Society (MRS)	5
The Minerals, Metals & Materials Society (TMS)	6
Society of Plastics Engineers (SPE)	8
Accreditation Board for Engineering and Technology (ABET) and ABET Accredited Engineering Programs in Materials Science and Engineering and Related Areas	9
ABET Definition of Engineering	10
Accreditation Board for Engineering and Technology (ABET)	10
ABET Accredited Engineering Programs	11
Ceramic Group (NICE)	11
Geological and Geophysical Group (SME-AIME)	12
Materials Group (TMS Lead Society, with AIChE, ASME, and NICE)	13
Metallurgical Group (TMS Lead Society, with SME-AIME)	14
Mineral Group (SME-AIME Lead Society, with TMS)	15
Mining Group (SME-AIME)	15
Other (EAC of ABET)	16
Welding Group (TMS Lead Society, with ASME and SME)	16
Education and Employment Trends in Materials Science and Engineering and Related Areas	17
Bachelors Degrees Awarded In Engineering	18
Undergraduate Degrees in Engineering by Curriculum	19
Masters and Professional Engineering Degrees by Curriculum	22
Doctorate Degrees in Engineering by Curriculum	25
States Awarding Most Engineering Degrees	28
Schools Awarding Most Engineering Degrees	30
Average Yearly Salary Offers in Engineering	32
Average Yearly Salary Vs. Years of Education	33
Average Yearly Salary Vs. Years in Field	33
Average Yearly Salary Vs. Age	34
Selecting Metals	35
Periodic Table of Elements in Metallic Materials	38
Thermodynamic Properties	39
Selecting Diffusion Activation Energy in Metallic System	40
Thermal Properties	57
Selecting Thermal Conductivity of Metals	58
Selecting Thermal Conductivity of Metals at Temperature	91
Selecting Thermal Conductivity of Alloy Cast Irons	126
Selecting Thermal Expansion of Tool Steels	127
Selecting Thermal Expansion of Tool Steels at Temperature	130
Selecting Thermal Expansion of Alloy Cast Irons	133
Mechanical Properties	135
Selecting Tensile Strength of Tool Steels	137
Selecting Tensile Strength of Gray Cast Irons	139
Selecting Tensile Strength of Ductile Irons	140

Selecting Tensile Strength of Malleable Iron Castings	141
Selecting Tensile Strength of Aluminum Casting Alloys	142
Selecting Tensile Strength of Wrought Aluminum Alloys	145
Selecting Compressive Strengths of Gray Cast Iron Bars	153
Selecting Yield Strengths of Tool Steels	154
Selecting Yield Strengths of Ductile Irons	156
Selecting Yield Strengths of Malleable Iron Castings	157
Selecting Yield Strengths of Cast Aluminum Alloys	158
Selecting Yield Strengths of Wrought Aluminum Alloys	161
Selecting Shear Strengths of Wrought Aluminum Alloys	169
