CONTENTS

	Preface Acknowledgments Abbreviations	ix xiii xv
I.	Differential Thermal Analysis Technique	1
II.	Theory and Typical Applications II.1 Theoretical Considerations II.2 Typical Applications	28 28 34
III.	Formation of Portland Cement Clinker and Polymorphism of C ₃ S and C ₂ S III.1 Formation of Portland Cement Clinker III.2 Polymorphism of C ₃ S 71 III.3 Polymorphism of C ₂ S 75	54 54 71 75
IV.	 Hydration of Portland Cement IV.1 Systems Containing CaO, Al₂O₃, SiO₂, and H₂O at Ordinary Temperatures IV2. Hydration of Portland Cement 	81 81 88
V.	 Hydration of Individual Phases in Portland Cement V.1 Hydration of C₃A V.2 Hydration of C₃S and α-C₂S V.3 Hydration of the Ferrite Phase 	111 111 127 135
VI.	 Hydration of C3A in Presence of Salts VI.1 Hydration of C₃A in Presence of Gypsum VI.2 Hydration of C₃A In Presence of Lignosulfonate VI.3 Hydration of C₃A in Presence of Calcium Chloride VI.4 Hydration of C₃A in Presence of Calcium Carbonate 	139 139 155 159 160
VII.	Autoclaved Cementitious Products	165
VIII.	 Non-Portland Cements Based on Silicates and Aluminates VIII.1 Slags and Slag Cements VIII.2 High Alumina Cements VIII.3 Pozzolanas and Pozzolanic Cements VIII.4 Oil Well Cement VIII.5 Hydraulic Lime VIII.6 Expanding Cement VIII.7 Acid-Proof Cement 	196 196 206 213 222 223 227 230
IX.	Other Non-Portland Cements IX.1 Magnesium Oxychloride and Oxysulfate Cement IX.2 Gypsum Plaster IX.3 Sand-Lime Mortar IX.4 Phosphate Cement	231 231 251 271 275
Х.	Aggregates	276
	Subject Index Author Index	297 303
