

CONTENTS

	Page
CHAPTER ONE. INTRODUCTION	1
1.1 What Is Concrete?	1
1.2 Ingredients of Concrete and Their Roles	3
1.3 Cements, Water, and Admixtures	4
1.4 Aggregates	7
1.5 Variability of Concrete Properties	15
1.6 Characteristics of the Variability	17
References	24
CHAPTER TWO. RHEOLOGY OF THE FRISHLY MIXED CEMENT PASTE	27
2.1 Fresh Cement Paste	27
2.2 Rheological Properties of the Fresh Paste	30
2.3 Effect of Water Content on Rheological Properties of Paste	34
2.4 Approximation by Power Function	36
2.5 Other Factors Influencing Rheological Properties	45
References	47
CHAPTER THREE. CONSISTENCY WORKABILITY AND RHEOLOGY OF FRESH CONCRETE	51
3.1 Freshly Mixed Concrete	51
3.2 Workability and Other Related Terms	53
3.3 Slump and Flow Tests	57
3.4 Remolding and Penetration Tests	63
3.5 Test of Compactability and Other Methods	68
3.6 Rheological Measurements of Fresh Concrete	72
3.7 Tests with Mixers	79
3.8 Evaluation and Selection of Methods for Measuring Consistency	81
References	85
CHAPTER FOUR. FACTORS AFFECTING CONCRETE CONSISTENCE	92
4.1 Effect of Water Content on Consistency—Approximation by Power Function	92
4.2 Justification of the <i>K</i> Procedure	99
4.3 Effect of Water Content on the Consistency—Other Approximations	104
4.4 Other Factors Influencing the Consistency	109
4.5 Calculation of the Water Requirement of Mortar and Concrete	114
4.6 Relationships Between Various Consistency Measurements	125
4.7 Poor Workability and Its Correction	131
4.8 Symbols For Tables 4.4 through 4.7	140
References	141
CHAPTER FIVE. AIR CONTENT—SEGREGATION AND BLEEDING	146
5.1 Air in Fresh Concrete	146
5.2 Methods for Measuring Air Content in Fresh Concrete	152
5.3 Air-Entrained Concrete	160
5.4 Segregation	163
5.5 Bleeding	169
References	178

CHAPTER SIX. COMPOSITION OF CONCRETE. UNIT WEIGHT.	
OTHER PROPERTIES	183
6.1 Characterization of Concrete Composition	183
6.2 Formulas for the Relationship Between Mix Proportion and Cement Content	188
6.3 Testing the Composition of Fresh Concrete by Non-Nuclear Means	198
6.4 Testing the Composition of Fresh Concrete by Nuclear Means	204
6.5 Unit Weight of Fresh Concrete	212
6.6 Lateral Pressure of Fresh Concrete	218
6.7 Temperature of Fresh Concrete	226
References	229
 CHAPTER SEVEN. PROPORTIONING OF CONCRETE	 235
7.1 Selection of Concrete Ingredients	235
7.2 Basics of Concrete Proportioning	240
7.3 Proportioning for Simple Cases	248
7.4 Proportioning for Compressive Strength Along with Consistency	253
7.5 Required Strength of Batch for a Specified Concrete Strength in Structure	264
7.6 Trial Mix Adjustments	281
7.7 Proportioning for Durability	283
7.8 Proportioning of Structural Lightweight Concretes	289
7.9 Proportioning with Flyash	296
7.10 Proportioning for Mass Concrete	300
7.11 Proportioning for Other Cases	302
7.12 Optimization of Concrete Composition	308
7.12 Discussion Topics	315
References	321
 CHAPTER EIGHT. PRODUCTION OF CONCRETE	 326
8.1 General	326
8.2 Batching	328
8.3 Mixing	333
8.4 Transportation of Concrete	338
8.5 Ready-Mixed Concrete	340
8.6 Concrete for Extreme Weather	346
8.7 Maximization of Profit of Concrete Production	352
References	362
 CHAPTER NINE. PUMPING, PLACEMENT, AND VIBRATION OF FRESH CONCRETE	 365
9.1 Pumping of Concrete	365
9.2 Other Methods for Placement of Concrete	376
9.3 Principles of Consolidation by Vibration	386
9.4 Behavior of Fresh Concrete Under Vibration	389
9.5 Research Results	394
9.6 Vibrators	401
9.7 Execution of Vibration	408
9.8 Special Cases of Vibration	415
References	419
 CHAPTER TEN. SETTING. SAMPLING	 427
10.1 Setting and Stiffening of Portland Cement Pastes	427
10.2 Setting of Concrete	433
10.3 Factors That Affect Setting	437
10.4 Formulas for setting	450
10.5 Sampling of Fresh Concrete	457
References	459
