	Page
Studies of Type 301 Stainless Steel Columns	
1	
Discussion	21
Shotpeening Effects and Specifications	22
The Effect of Forming on Mechanical Properties	33
Discussion	43
Axial Stress Fatigue, Creep, and Rupture Properties of Unnotched and Notched Specimens of Heat Resistant Alloys	45
Discussion	61
Determination of Young's Modulus Under Conditions of Relaxation	63
Discussion	75
Effect of a Number of Variables on the Fatigue Properties of High Strength Steels	77
Discussion	92
The Effect of Temperature, Frequency, and Grain Size on the Fatigue Properties of High Purity Aluminum	94
Discussion	106
Determination of Fatigue-Crack Initiation and Propagation in a Magnesium Alloy	111
Discussion	119
Uni-Directional Axial Tension fatigue Tests of Beryllium Copper and Several Precipitation Hardening Corrosion Resistant Steels	123
Discussion	137
The Properties of Beryllium Copper Strip as Affected by Cold Rolling and Heat Treatment	143
Pit Depth Measurements as a Means of Evaluating the Corrosion Resistance of Aluminum in Sea Water	157
