

CONTENTS

PART ONE Selection of Materials	3
PART TWO Mechanical Properties of Metals in Design	
1. Significance of Mechanical-properties Data	11
2. Temperature Consideration in Design	20
3. Plasticity Considerations in Design	123
4. Residual Stresses	135
5. Vibration Considerations in Design	156
6. Plates and Shells	174
7. Fatigue Characteristics in Design	190
8. Fatigue Considerations Resulting from Processing	249
9. Bearing Friction Wear and Lubrication Considerations in Design	355
PART THREE Other Physical Properties Affecting Design	
1. Corrosion	381
2. Radiation properties	403
3. Electrical Properties	418
PART FOUR Nondestructive Testing	
1. Magnetic-particle Inspection	447
2. Ultrasonic Testing and Inspection	455
3. X-ray Examination	468
4. Electrical Methods	479
5. Core-loss Principle	486
6. Magnetic and Electromagnetic Methods	489
PART FIVE Design Considerations	
1. Design Practice	497
2. Design Theory	506
3. Experimental Design	532
4. Surface-finish Requirements in Design	593
Index	607
