

## CONTENTS

### Session 1: Biodegradation of Polymers and Plastics

Similarities and Differences between Biodegradation and Non-Enzymatic Degradation	3
The Complexity of the Biodegradation of Poly(2-hydroxy acid) Type Aliphatic Polyesters	11
Biodegradation of Polyethers and Polyacrylate	24
Biodegradation of Biosynthetic and Chemosynthetic Polyhydroxyalkanoates	39
Purification and Characterization of Extracellular Poly(2-hydroxybutyrate ) Depolymerases	52
Monitoring of Polymer Biodegradabilities in the Environment by a DNA Probe Method	65

### Session 2: Environmental Degradation of Plastics

Environmental Biodegradation of Hydrocarbon Polymers: Initiation and Control	79
Effects of Soil Conditions on Biodegradation of Plastics and Responsible Microorganisms	92

### Session 3: Synthesis and Properties of New Biodegradable Plastic Materials

Bacterial Synthesis of Poly-B-Hydroxyalkanoates with Functionalized Side Chains	109
Properties and Applications of Polyhydroxyalkanoates	120
Plastid Targeting of the Enzymes Required for the Production of Polyhydroxybutyrate in Higher Plants	136
“BIONOLLE”, Biodegradable Plastic through Chemical Synthesis	150

### Session 4: Biodegradation and Morphologies of Polymer Blends

Biodegradable Plasticizers: Miscible Blends of Poly(B-hydroxybutyrate-co-B-hydroxyvalerate) with Poly(E-caprolactone) and Poly(ethylene glycol)	177
Enzymatic Degradation of Polymer Blends	190
Starch/Vinyl-Alcohol Copolymer Interactions	200

### Session 5: Development of Biodegradation Test Methods

Strategy for Biodegradability Testing in OECD	217
Expectations for Biodegradation Testing Methods	228
The Development and Modification of Some Special Test Methods and the Progress in Standardisation of Test Methods in Germany	237
Perspectives on Standard Test Methods for Biodegradable Plastics	250

## Session 6: Governmental Policy, Regulations and Standards

Impact of Governmental Policies, Regulations, and Standards Activities on an Emerging Biodegradable Plastics Industry	261
Status of Government Policy, Regulation and Standards on the Issue of Biodegradable plastic Materials in Italy	273
Current Status of Biodegradable Plastics in Korea: Research, Commercial Production and Government Policy	286
Field Testing of Biodegradable Plastics	298
Governmental Policy, Regulations and Standards	313

## Session 7: Poster Communications

Standard Test Methods for Polymer Biodegradation in Solid Waste Treatment Systems	323
Evaluation of Biodegradability of Biodegradable Plastics in Activated Sludge	331
A Study on Methods of Testing Biodegradable Plastics in Soil: Aerobic and Anaerobic Gas Evolution Test: Petri Dish Test in various Soils	337
A Simple Method for Detection of Polymeric Degrading Microorganisms on Agar Plates	345
An Extracellular Poly(3-hydroxybutyrate) Depolymerase from the Activated Sludge	351
Cloning and Nucleotide Sequencing of the Poly(3-hydroxybutyrate) Depolymerase Gene from <i>Pseudomonas pickettii</i>	357
'Biopol' Properties and Processing	362
Molecular Weight Distribution Control and Mole Fraction Control in Poly(D(-)-3-hydroxyalkanoate) (PHS) Production by <i>Alcaligenes eutrophus</i>	365
Production of Copolyesters from Organic Acids by Mutant Strains of <i>Alcaligenes eutrophus</i>	373
A New Kinetic Model for the Accumulation of Poly-3-hydroxybutate in <i>Alcaligenes eutrophus</i>	379
Production of Poly(3-hydroxybutate) by Photosynthetic Microorganisms	387
Biosynthesis and characterization of Poly (3-hydroxybutate-co-4-hydroxyrate) by <i>Comamonas acidovorans</i>	394
Isolation and Characterization of <i>Pseudomonas putida</i> BM01 Accumulating High Amount of PHA <sub>MCL</sub>	400
Biosynthesis and Characterization of Poly(3-hydroxybutate-co-3-hydroxyhexanoate) from Oils and Fats by <i>Aeromonas</i> sp. OL-338 and <i>Aeromonas</i> sp. FA-440	410
Production of Poly(3-hydroxybutate) from Plant Oils by <i>Alcaligenes</i> sp.	417
Biosynthesis of Poly( $\gamma$ -glutamic acid) in <i>Bacillus subtilis</i> IF03335 and Crosslinking Reaction by $\gamma$ -Irradiation of Poly( $\gamma$ -glutamic acid)	425
Studies on Biodegradability of Low Density Polyethylene (LDPE) to Which a Biodegradation Inducing Agent Has Been Added	433
Development of Polycaprolactone/Gelatinized Starch Blends and Their Enzymatic Degradation	437

Properties and Applications of “Mater-Bi”	443
New Application of Cellulose and Chitosan for Biodegradable Polymer Material	451
Development of Biodegradable Material for Loose Fill Packaging	459
Biodegradable Star-Shaped Poly-L-Lactide	464
Cellular Response to Phagocytized Particles of Poly-L-Lactic Acid	470
L-Lactic Acid Production by a CSTR with Cross-Flow Membrane Filter on Pilot Scale	479
Purification Process of L-Lactic Acid for Bio-Degradable Poly-L-Lactate	486
Recycle of Polylactide in Natural Circumstances: Mechanism of Degradation	492
Synthesis of Copolyester Containing Poly(ethylene terephthalate) and Poly(E-caprolactone) Units, and Its Biodegradability	498
An Attempt to Make Poly(vinyl acetate) Biodegradable	505
Synthesis and Biodegradability of Polyesters Based on 1,4: 3,6-Dianhydrohexitols and Succinic Acid Derivatives	511
Studies of the Hydrolytic Degradation of Some Aliphatic Polyesters	519
Synthesis of Polydepsipeptide with Pendant Carboxylic Acid Groups and Its Hydrolysis Behavior	528
Tailor-Making of Multimeric Poly(B-malic acid) Derivatives: Property Adjustment through Ester Pendant Groups	534
Biodegradation of Optically Active New-Polyesters	541
Ring-Opening Copolymerization of Optically Active B-Butyrolactone with Several Lactones: Synthesis of New Biodegradable Polyesters	549
Biodegradability of Poly(L/DL-lactide-co-DL-B-Methyl-S-Valerolactone)	557
Novel Biodegradable Copolyamides Based on Adipic Acid, 1,6 Hexane Diamine and Aminoacids: Synthesis and Study of Properties; Part 1	562
Polytransesterification of C <sub>4</sub> -Diacids and 1,4-Butanediol with Various Lipases in organic Solvent	570
Physical Properties and Processabilities of Biodegradable Plastics “BIONOLLE”	577
Biodegradation of BIONOLLE	584
Morphology and Enzymatic Degradation of Poly[(R)-3 hydroxybutyrate] Plasticized with Acylglycerols	591
Synthesis of Dimethyl Succinate Using Carbon Monoxide and Its Application to Biodegradable Polymers	596
Biodegradation and Composting Studies of Polymeric Materials	601
List of Contributors	611
Subject Index	623
