

CONTENTS

Chapter 1. The Kinetics of Degradation reactions	1
Chapter 2. HCN evolution from polyamides, polyurethanes, and polyimides and a survey of their thermal and oxidative degradation	66
Chapter 3. Photodegradation and photo-oxidation of polymers	162
Chapter 4. Antioxidants	193
Chapter 5. Degradation and mobility of polymers	235
Chapter 6. High-temperature pyrolysis of thermoplastic polymers	289
Chapter 7. The role of hydroperoxides in the oxidative degradation of polymers	337
Chapter 8. High energy degradation and stabilization of polymers	358
Chapter 9. Mechanical degradation	388
Chapter 10. Survey and Critique of thermo-analytical methods and results	506
Chapter 11. Factor-jump thermogravimetry as applied to the study of polymer degradation	554
Chapter 12. Advances in degradation and stabilization of polymers	600
Chapter 13. Application of broad line and pulsed NMR to the study of degradation and stabilization of polymers	629
Author Index	650
Subject Index	663
