

## CONTENTS

Preface	xi
OVERVIEWS	
1. Degradability of Commodity Plastics and Specialty Polymers : An Overview	2
2. Biodegradative Processes and Biological Waste Treatment : Analysis and Control	13
3. Insect Symbionts : A Promising Source of Detoxifying Enzymes	33
4. Plastics Recycling Efforts Spurred by Concerns About Solid Waste	38
5. Plastic Degradability and Agricultural Product Utilization	52
<b>DEGRADABILITY OF COMMODITY PLASTICS AND SPECIALTY POLYMERS</b>	
6. Polyethylene Degradation and Degradation Products	60
7. Biodegradation of Starch-Containing Plastics	65
8. Constraints on Decay of Polysaccharide-Plastic Blends	76
9. Biodegradation Pathways of Nonionic Ethoxylates : Influence of the Hydrophobe Structure	96
10. Biodegradation of Polyethers	110
11. Biodegradable Poly (carboxylic acid) Design	124
12. Biodegradation of Synthetic Polymers Containing Ester Bonds	136
13. Biodegradable Polymers Produced by Free-Radical Ring-Opening Polymerization	149
14. Biodegradable Polymers Produced by Free-Radical Braided Multifilament Yarns	161
15. Bioabsorbable Fibers of <i>P</i> -Dioxanone Copolymers	167

## **AGRICULTURAL POLYMER UTILIZATION : MONOMER SOURCE**

- |   |     |
|---|-----|
| 16. Monomers and Polymers Based on Mono-and Disaccharides | 176 |
| 17. Polymers and Oligomers Containing Furan Rings         | 195 |

## **AGRICULTURAL POLYMER UTILIZATION : ALTERNATE CROP STRATEGIES**

- |  |     |
|--|-----|
| 18. Microbial Fructan : Production and Characterization  | 210 |
| 19. Coatings Based on Brassylic Acid (An Erucic Acid<br>Derivative)                                  | 220 |
| 20. Synthesis and Characterization of Chlorinated Rubber<br>from Low-Molecular-Weight Guayule Rubber | 230 |
| 21. Chemical Modification of Lignocellulosic Fibers To Produce<br>High-Performance Composites        | 242 |
| 22. Cellulose and Cellulose Derivatives as Liquid Crystals   | 259 |

## **AGRICULTURAL POLYMER UTILIZATION : CORN-BASED FEED STOCKS**

- |  |     |
|--|-----|
| 23. Specialty Starches : Use in the Paper Industry   | 274 |
| 24. Saponified Starch-g-poly Zacrylonitrile-co-2acrylamido-2-<br>methylpropanesulfonic acid ) : Influence of Reaction Variables<br>on Absorbency and Wicking | 304 |

## **INDEXES**

- |                   |     |
|-------------------|-----|
| Author Index      | 313 |
| Affiliation Index | 313 |
| Subject Index     | 313 |
