

CONTENTS

	Page
Introduction	ix
Historical Note on Vimeiro	xi
Contributing Authors	xiii
I. MICROSTRUCTURE AT THE MOLECULAR LEVEL	
Dislocations in Wave Trains, with Special Reference to the Information They Carry about Microstructure	3
Microphase Separation in Densely Crosslinked Polymers	19
Probing the Mesophase Layer in Polymeric Composites	31
Discussion	59
II. MOLECULAR ORIENTATION	
Contribution of Neutron Scattering to the Determination of Chain Trajectory in Semi-Crystalline Isotactic Polystyrene	67
Molecular Extension and Orientation in a Crystalline Polymer	81
Discussion	91
III. NDE OF LAMINATES	
Quality Control and Lifetime Prediction of Rubber Fabric Composites	95
Feasibility of Useful Real-time In-process Evaluation of Laminates	104
Discussion	117
IV. ACOUSTIC EMISSION	
The value of In-Process Monitoring of Acoustic Emission during Partial Pressurization of Pressure Vessels	123
The Strain Rate Dependence of Acoustic Emission, Including the Detection and Non-Detection of Defects Known to Be Subjected to Internal Stress	137
Qualitative and Quantitative Evaluation of Damage in CFRP by Acoustic Emission during Structural Loading	146
Discussion	161
V. CONTROL OF FIBRE ORIENTATION IN SHORT FIBRE COMPOSITES	
A Non-Destructive Control of Fiber Content and Orientation in SMC-Articles	165
Orientation Mapping	178
Discussion	191
VI. ELECTROMAGNETIC WAVE PROPAGATION IN COMPOSITE MATERIALS	
The Propagation of Light Through Fibre Reinforced Composites	195
Microwave Propagation in Carbon Fibre Reinforced Composites	213
Potential of Holographic Interferometry for Non-Destructive Testing of Polymer Composites	222
Discussion	237
VII. FRACTURE MECHANICS AS A METHOD FOR QUALITY CONTROL	
UPVC – The State of the Art	241
The Fatigue Damage Mechanics of Fibrous Laminates	250
Discussion	261
VIII. VIBRATIONS, ELASTIC WAVES AND ULTRASONICS	
Variable Frequency Ultrasound Detection of Physical Changes in Gels and Solids	265
Ultrasound Reflection Tomography of Cracks in Polyester Resin	275

Discussion	305
IX. RUBBER ELASTICITY AND ANISOTROPY UNDER STRESS	
Chain Orientation Detected with Deuterium NMR in Uniaxially Deformed Polymeric Network	311
Bi-dimensional Compression Testing	322
Discussion	327
INDEX	329
