

**CONTENTS**

<b>PART I: INTRODUCTORY REMARKS</b>	<b>1</b>
Chapter 1 The Origin of Surface Properties	3
1.1 Van der Waals' forces	6
1.2 Electrostatic forces	14
1.3 The DL VO theory	24
1.4 Structural interactions	32
1.5 Short-range interactions (hydrogen, acid – base, covalent)	43
References	45
Chapter 2 Dynamics of Polymer Surfaces	49
2.1 Fundamental aspects of polymer surface dynamics	50
2.2 Experimental evidence of polymer surface dynamics	57
References	65
<b>PART II: CHARACTERIZATION METHODS</b>	<b>67</b>
Chapter 3 Spectroscopic Methods	69
3.1 Ion scattering spectroscopy	69
3.2 Secondary ion mass spectroscopy	75
3.3 X-ray photoelectron spectroscopy	92
3.4 Internal reflection spectroscopy	113
3.5 Diffuse reflectance spectroscopy	122
3.6 Photoacoustic spectroscopy	128
3.7 Other vibrational techniques	133
3.8 Transmission spectroscopies	143
3.9 Nuclear magnetic resonance spectroscopy	144
3.10 Comparison of spectroscopic methods	148
References	150
Chapter 4 Surface Energetics and Contact Angle	161
4.1 Contact angles and the Young equation	164
4.2 Experimental measurement of contact angles	166
4.3 Contact hysteresis	171
4.4 From contact angle to surface tension	182
4.5 Surface thermodynamic parameters by inverse gas chromatography	193
References	195

Chapter 5	New and Emerging Methods	200
5.1	Surface force measurements	200
5.2	The evaluation of electrostatic interactions	207
5.3	Reflectivity of neutrons	216
	References	217
<b>PART III. MODIFICATION TECHNIQUES</b>		<b>221</b>
Chapter 6	Physical Modifications	223
6.1	Flame treatments	223
6.2	Corona treatments	225
6.3	'Cold' plasma treatments	226
6.4	'Hot' plasma treatments	229
6.5	UV treatments	230
6.6	Laser treatments	231
6.7	X-ray and v-ray treatments	232
6.8	Electron beam treatments	232
6.9	Ion beam treatments	233
6.10	Metallization	234
6.11	Sputtering	237
	References	235
Chapter 7	Chemical Modifications	242
7.1	Wet treatments	242
7.2	Surface grafting	257
	References	269
Chapter 8	Bulk Modifications	274
8.1	Polymer Blend surfaces	275
8.2	Block copolymer surfaces	285
	References	296
<b>PART IV. APPLICATIONS</b>		<b>299</b>
Chapter 9	Wettability	301
9.1	Hydrophilic surfaces	305
9.2	Hydrophobic surfaces	319
	References	329
Chapter 10	Adhesion	332
10.1	Theories of adhesion	332
10.2	Measurement of adhesion	340
10.3	Methods for modifying adhesion	348
	References	373

Chapter 11	Barrier Properties	379
11.1	Coating	379
11.2	Sulphonation and fluorination	382
11.3	Evaporation	385
11.4	PPECVD and sputtering	389
References		390
Chapter 12	Biomedical Materials	395
12.1	Blood contacting devices	396
12.2	Contact lenses	416
References		430
Chapter 13	Friction and Wear	436
13.1	Compounding	437
13.2	Chemical coating	442
13.3	High energy density technologies	445
References		446
Index		455
