

CONTENTS

1. Raymond B. Seymour: Coming of Age with Polymers	1
INTRODUCTION AND OVERVIEW	
2. Degradation of Polymers in Hostile Environments	11
3. Effects of Radiation Environments on Plastics	17
4. Thermal Analysis of Metal-Containing Polymers: Generalizations	25
SPECIFIC EXAMPLES OF POLYMERS	
5. New Styrene-Maleic Anhydride Terpolymer Blends	49
6. Polyphenylene Sulfide (PPS) in Harsh Environments	65
7. Advances in High-Performance Polymers	87
8. Model Fungicidal Monomers, Polymers, and Latices for Paints	99
BULK EFFECTS OF ENVIRONMENTS	
9. Typical Uses and Durability of Various Plastics in Hostile Environments	141
10. Water Permeation Through Elastomers	153
11. Polyurethane Aging Water and Methanol Environments	173
12. Hostile Effects of Oxygenated Solvent Interaction with Type II Rigid Poly (vinyl Chloride)	193
13. Chemical and Solvent Resistance of Selected Styrene-Maleic Anhydride Copolymers	205
14. Effects of Ethanol/Gasoline and Methyl t-Butyl Ether/Gasoline Mixtures on Elastomers	225
15. Effects of Ozone Exposure on the Physical Properties of Butadiene and Styrene/Butadiene Copolymers	261
16. x-Ray Photoemission Spectroscopic Study of the Effect of Ozone on Various Styrene/Butadiene Copolymers	279
17. Environmental Corrosion of Polymers: Causes and Main Reactions	291
18. Influence of Sulfur Dioxide on Organic Coatings	309
19. Photochemical Degradation and Biological Defacement of Polymers	317
Index	331
