

CONTENTS

1. Introduction	
1.1 General	1
1.2 Plastics Technology: Early History and Development	4
1.3 The Present Range of Materials and Likely Developments	5
1.4 The Present Range of Plastics Processing and Fabrication Techniques and Likely Developments	10
1.5 Rational Design	13
1.6 Further Reading	14
2. Introduction to Plastics Structure and Properties	
2.1 Introduction	15
2.2 The Properties of Polymers	21
2.3 From Polymer to Plastic	24
2.4 The Structure of Some Important Polymers	26
2.5 Further Reading	29
3. Deformational Behaviour	
3.1 Introduction	30
3.2 Viscoelasticity	31
3.3 Engineering Design Data	36
3.4 Concluding Comments	49
3.5 References	49
4. Long-term Durability	
4.1 Introduction	51
4.2 Limits of Durability	52
4.3 Durability Under Continuous Stress	53
4.4 Durability Under Cyclic Stress	59
4.5 Design for Long-Term Durability	65
4.6 References	66
5. Short-term Strength and Impact Behaviour	
5.1 Tensile Tests	68
5.2 Flexural Tests	73
5.3 Deformation Rate	74
5.4 Impact Tests on Notched Specimens	75

5.5	Crack Initiation and Propagation	77
5.6	Fabrication Conditions	78
5.7	Other Approaches to Impact Testing	79
5.8	Comparisons	82
5.9	Further Reading	82
6.	Other Factors Affecting Mechanical Properties	
6.1	Introduction	84
6.2	Added Particles and Fibres	84
6.3	Soluble Additives	91
6.4	Blends and Copolymers	93
6.5	Defects	96
6.6	Crystallinity and Thermal History	101
6.7	Molecular Weight	105
6.8	Orientation and Anisotropy	106
6.9	References	107
7.	Electrical Properties	
7.1	Introduction	109
7.2	Electrical Properties at Low Stress	109
7.3	Electrical Properties at High Stress	119
7.4	Electrical Phenomena and Antistatic Plastics	121
7.5	Electrical Conducting Plastics	122
7.6	References	122
8.	Thermal Properties	
8.1	Introduction	123
8.2	Crystalline Melting Point	123
8.3	Heat Content (Enthalpy)	124
8.4	Thermal Conductivity	133
8.5	Thermodynamic Properties	140
8.6	Thermal Expansion	141
8.7	References	143
8.8	Further Reading	143
9.	Miscellaneous Physical Properties	
9.1	Optical Properties	145
9.2	Friction	155
9.3	Wear	159
9.4	Further Reading	160

10. Miscellaneous Chemical Properties	
10.1 Introduction	161
10.2 Plastics-Liquids Systems: Physical Interaction	161
10.3 Plastics-Liquids Systems: Chemical Interaction	162
10.4 Degradation	164
10.5 Flammability	166
10.6 Permeability	167
10.7 Further Reading	170
11. Processing Methods and Properties of Thermoplastics Melts	
11.1 Processing Methods	171
11.2 properties of Thermoplastic Melts	176
11.3 Analysis of Flow in Some Processing Operations	197
11.4 Conclusions	208
11.5 References	209
12. Principles for Using Data	
12.1 Introduction	211
12.2 Mechanical Design Brief	212
12.3 Two Potential Causes of Trouble	213
12.4 Comparison of the Behaviour of Materials	214
12.5 Prediction of Long-Term Performance	219
12.6 References	240
Index	243
