

CONTENTS

HISTORY/BACKGROUND

The Evolution of Plastics in Automotive Applications	3
Application Technology of Plastics to Automotive Components	9
Recent Developments in Automotive Plastic Components	21
Automotive Developments in Reinforced Plastics	31

PLASTIC MATERIALS

Structural RIM for Automotive Applications	45
Thermoplastic Composites for High Performance Automotive Applications	49
Evolution of Polycarbonate for Automotive Applications	63
The Evolution of Nylon Plastics in U.S. Automotive Applications	71
Structural SMC-Material, Process and Performance Review	77

EXTERIOR AUTOMTIVE APPLICATIONS

Plastic Exterior Body Panels – Material/Process Requirements	93
Improved RRIM Polyurethane Composites for Automotive Body Panels	99
Reinforced Polyureas; High Temperature Performance and Dimensional Stability	107
Quality in SMC Body Panels	113
The In-Mold Coating Process and It’s Contribution to Improved SMC Surface Quality	121
A Study of the Costs of a Production Deck Lid Optimized for Steel, Aluminum and Sheet Molding Compound	125

BUMPER SYSTEM APPLICATIONS

Ford Escort All-Thermoplastic Bumper	135
Improvement in Dimensional Stability of Polyurethane Automotive Fascia through Glass Fiber Reinforcement	143
Automation – The Next Revolution in the Reaction Injection Molding Process	151
High Performance Safety Parts Stampable Thermoplastic Sheets (GMT-Glass Mat reinforced Thermoplastics) Interpretation for Automotive Application	161
Olefinic Thermoplastic Elastomer – A New Choice for Bumper Systems	173

INTERIOR APPLICATIONS

Interior Composite Materials	185
All-MDI Flexible Foams in Automotive Applications	189
Application of PU for Steering Wheel Production	195
Plastic Materials for Late 80’s Instrument Panel Design	201
What is New in Automotive Headliners?	211
Application of High-Crystallinity Polypropylene to Automobile Interior Trim Parts	215

FASTENING AND JOINING

Welding Plastics for the Automotive Industry	227
Advances in Vibration Welding Technology	237
The 40KHz Advantage – Exciting New Opportunities for Ultrasonic Plastics Assembly in the Automotive Industry	243
Bonding of Automotive Plastics – Technology and Application	249
Adhesives for Bonding Plastic Automotive Components	257
Thermoplastic Hot Melt Web Adhesives in Automotive Soft Trim	263
Index	265
