

CONTENTS

Part I. Introduction

Chapter 1. Polymer properties	3
Chapter 2. Typology of Polymers	9
Chapter 3. Typology of numerical properties	27

Part II. Thermophysical properties of Polymers

Chapter 4. Volumetric properties	41
Chapter 5. Latent heat of crystallization and fusion	67
Chapter 6. Cohesive and adhesive properties	85
Chapter 7. Transition temperatures	109
Chapter 8. Solubility	135

Part III. Properties of polymers in fields of force

Chapter 9. Mechanical (viscoelastic) Properties	147
Chapter 10. Ultimate mechanical properties	177
Chapter 11. Optical properties	195
Chapter 12. Electrical properties	211
Chapter 13. Magnetic properties	221

Part IV. Transport properties of polymers

Chapter 14. Transport of thermal energy	233
Chapter 15. Viscosity of polymer solutions	241
Chapter 16. Viscosity of polymer melts	257
Chapter 17. Dissolution and melting of polymers	275
Chapter 18. Permeation of polymers. The diffusive transport of gases, vapours and liquids on polymers	281

Part V. Physical and chemical change in polymers

Chapter 19. Crystallization	301
Chapter 20. Orientation	311
Chapter 21. Thermochemical properties	327
Chapter 22. Degradation	347

Part VI. Retrospect

Chapter 23. Interrelations	359
----------------------------	-----

Appendix 1. Survey of group contributions	378
Appendix 2. Physical properties of polymers	386
Appendix 3. Values of some physical constants	394
Appendix 4. Conversion factors to S.I units	395
Symbols of quantities	406
Subscripts, superscripts and indices	412
Author index	415
Subject index	421
