

CONTENTS

CHAPTER 1 INTRODUCTION

CHAPTER 2 CONSTITUTIVE EQUATIONS

PHENOMENOLOGICAL THEORY	5
Stress Relaxation	6
Interrelation between Viscoelastic Responses	13
Stress-Strain Behavior	16
Dynamic Behavior	26
Creep	29
STRUCTURAL THEORIES	30
Introduction	30
Historical Review	32
Static Stress-Strain Behavior	33
Yield Stress	47
Viscoelasticity and Damping	49
REFERENCES	56

CHAPTER 3 EXPERIMENTAL FINDINGS

INTRODUCTION	59
MORPHOLOGICAL VARIABLES	59
Cell Structure	59
Cell Size	63
Cell Geometry	65
MATRIX MATERIAL VARIABLES	67
Polystyrene	68
Polyurethane	71
Polyolefins	73
Other Materials	79
REFERENCES	82

CHAPTER 4 IMPACT BEHAVIOR

HISTORICAL REVIEW	83
EQUATIONS FOR THE PREDICTION OF IMPACT BEHAVIOR	85
Foams with Rate-Independent Modulus	85
Foams with Rate-Dependent Modulus	86
Use of Stress-Relaxation Data	88
COMPARISON OF THEORY WITH EXPERIMENTAL DATA	89
Foams with Rate-Independent Modulus	89
Foams with Rate-Dependent Modulus	92
IMPACT BEHAVIOR OF FLUID FILLED SYSTEMS	94
EXPERIMENTAL TECHNIQUES	95
REFERENCES	96

CHAPTER 5 EXPERIMENTAL TECHNIQUES

INTRODUCTION	97
STANDARDIZED TESTING METHODS	97
EQUIPMENT	103
REFERENCES	105
