

**CONTENTS**

1	Introduction to Polymeric Materials	1
2	Single Crystals	21
3	Melt-Crystallized Polymers	141
4	The Degree of Crystallinity	210
5	Polymerization	228
6	Methods of Measuring Molecular Weight Averages and Stereoregularity	260
7	The Mechanics of Amorphous Polymers	293
8	Time-Dependent Mechanical Behavior	359
9	Crystallization Kinetics and Mechanism	380
10	Electrical and Electro-Optical Behavior	419
11	Mechanical Behavior of Semicrystalline Polymers	466
	Index	513
