

CONTENTS

<b>1. Chemical Structure of Polymers</b>	
1.1 Introduction	1
1.2 Shapes and Energy Considerations	2
1.3 Copolymers	10
1.4 Heteroatomic Polymers	11
1.5 References	16
<b>2. Physical Structure of Polymers</b>	
2.1 Introduction	19
2.2 Melt Viscosity	19
2.3 Interchain and Intrachain Forces	20
2.4 Glass Transition Temperature	23
2.5 Crystallinity	26
2.6 Elastomers	29
2.7 Fibers	30
2.8 Plastics	30
2.9 References	30
<b>3. Tests for Properties of Polymers</b>	
3.1 Introduction	31
3.2 Thermal Tests	32
3.3 Solubility Tests	36
3.4 Tests for Diffusion and Permeability	36
3.5 Tests for Mechanical Properties	37
3.6 Tests for Optical Properties	44
3.7 Flammability Tests	44
3.8 Tests for Electric Properties	44
3.9 Tests for Chemical Resistance	45
3.10 Weatherability	45
3.11 References	46
<b>4. Optical Properties of Polymers</b>	
4.1 General	47
4.2 Refractive Index	48
4.3 Optical Clarity	

<b>5. Mechanical Properties of Polymers</b>	
5.1 Introduction	57
5.2 Molecular Weight	57
5.3 Crystallinity	59
5.4 Temperature	62
5.5 Polar Substituents	64
5.6 Additives	64
5.7 Pressure	66
5.8 Physical Models	66
5.9 Viscoelasticity	71
5.10 References	72
<b>6. Electric Properties of Polymers</b>	
6.1 Dielectric Properties – Contributions	73
6.2 Delocalization	76
6.3 Direct Current Measurements	77
6.4 Dielectric Constant	78
6.5 Alternating Current	78
6.6 General	80
6.7 References	81
<b>7. Thermal Properties of Polymers</b>	
7.1 Glass Transition and Melting Range	83
7.2 Copolymers	86
7.3 Additives	87
7.4 Thermal Conductivity	88
7.5 Heat Capacity	89
7.6 Thermal Linear Expansivity	89
7.7 Thermal Stability	90
7.8 References	92
<b>8. Solubility</b>	
8.1 Solubility Parameter	95
8.2 Polymer Compatibility	97
8.3 Viscosity	101
8.4 References	105
<b>9. Diffusion and Permeation of Gas and Vapors in Polymers</b>	
9.1 Introduction	107
9.2 References	111

## **10. Chemical Resistance of Polymers**

10.1	Rate of Attack	113
10.2	Chemical Oxidation	114
10.3	Stress Cracking and Crazeing	116
10.4	Combustion	116
10.5	Polyolefins	118
10.6	Halogenated Aliphatic Polymers	119
10.7	Hydroxyl-Containing Polymers	119
10.8	Condensation Polymers	119
10.9	Aromatic Polymers	120
10.10	References	120

## **11. Effect of Additives on Polymers**

11.1	Introduction	121
11.2	Fillers	122
11.3	Reinforcements	125
11.4	Coupling Agents	125
11.5	Antioxidants	126
11.6	Ultraviolet Light Stabilizers	127
11.7	Flame Retardants	128
11.8	Plasticizers	129
11.9	Heat Stabilizers	130
11.10	Impact Modifiers	131
11.11	Other Additives	131
11.12	References	132

## **12. Properties of Polyolefins**

12.1	Introduction	133
12.2	High-Density Polyethylene	133
12.3	Low-Density Polyethylene	135
12.4	Copolymers of Ethylene	136
12.5	Crosslinked Polyethylene	137
12.6	Polypropylene	138
12.7	Copolymers of Propylene	139
12.8	Polyisobutylene	140
12.9	Poly-1-butene	140
12.10	Poly-4-methylpentene-1	141
12.11	Polyalkadines	142
12.12	References	145

### **13. Polymeric Hydrocarbons with Pendant Groups**

13.1	Polystyrene	147
13.2	Styrene Copolymers	148
13.3	Substituted Styrene Polymers	150
13.4	Polyvinyl Chloride and Chlorinated Polyvinyl Chloride	151
13.5	Copolymers of Vinyl Chloride and of Vinylidene Chloride	153
13.6	Fluorine-Containing Polymers and Copolymers	154
13.7	Polymers and Copolymers of Acrylonitrile	155
13.8	Polymers and Copolymers of Acrylamide and Methacrylamide	157
13.9	Polymers and Copolymers of Acrylic Acid and Methacrylic Acid	157
13.10	Polymers and Copolymers of Alkyl Acrylates	158
13.11	Polyalkyl-2-cyanoacrylates	158
13.12	Polymers and Copolymers of Alkyl Methacrylates	158
13.13	Polyvinyl Acetate	160
13.14	Polyvinyl Alcohol and Polyvinyl Acetals	160
13.15	Polyvinyl Methyl Ether	161
13.16	Polyvinyl-2-pyrrolidone	161
13.17	Poly-N-vinylcarbazole	162
13.18	Polychloroprene	162
13.19	References	162

### **14. Aliphatic Polymers with Heteroatom Chains**

14.1	Introduction	165
14.2	Polyethers	165
14.3	Polyolefin Polysulfides	167
14.4	Aliphatic Polyesters	167
14.5	Nylons	168
14.6	Polyurethanes and Polyureas	172
14.7	Polypeptides – Proteins	174
14.8	Polysaccharides	177
14.9	Modified Cellulosics	179
14.10	Silicones (Siloxanes)	180
14.11	Polyosphazenes	182
14.12	References	183

### **15. High-Performance Polymers**

15.1	Introduction	185
15.2	Alkyds, Polyesters, and Alkylic Resins	185
15.3	Phenolic Resins	190
15.4	Amino and Amido-Derived Resins	192

15.5	Epoxy Resins	194
15.6	Furan Resins	197
15.7	Polycarbonates	197
15.8	Polyarylether Ketones	199
15.9	Polyaryl Sulfones	199
15.10	Polyphenylene Oxide and Phenoxy Resins	200
15.11	Polyphenylene Sulfide	202
15.12	References	203
<b>16.</b>	<b>Selection of Polymers for Special Applications</b>	
16.1	Introduction	205
16.2	Water-Soluble Polymers	205
16.3	Oil-Soluble Polymers	207
16.4	Oil-Insoluble Polymers	208
16.5	Flame-Retardant Polymers	208
16.6	Flexible Polymers	209
16.7	Water-Repellent Polymers	209
16.8	Heat-Resistant Polymers	210
16.9	Polymers with Resistance to Gaseous Permeation	210
16.10	Transparent Polymers	211
16.11	Insulating Polymers	211
16.12	Adhesive Polymers	211
16.13	Coatings	214
16.14	Corrosion-Resistant Polymers	214
16.15	References	215
	Appendix: Acronyms and Abbreviations	217
	Index	221
