

CONTENTS

<i>Preface</i>	xi
Part I: Keynote Papers	
Polymer Composites in Fire <i>J. M. Davies, Y. C. Wang and P. M. H. Wong UMIST, Manchester, UK</i>	3
Characterization and Health Monitoring of FRP Bridge Systems <i>V. M. Karbhari, H. Gua and L. Lee, University of California, San Diego, USA, and C. Sikorsky, Department of Transport, Sacramento, USA</i>	18
Durability of Advanced Polymer Composites in the Civil Infrastructure <i>V. M. Karbhari, University of California, San Diego, USA</i>	30
A Prospective View of Adaptive Materials in Bridge Engineering <i>U. Meier, EMPA, Dübendorf, Switzerland</i>	43
Composites: Construction Materials for the New Era <i>A. Mosallam, University of California at Irvine, USA</i>	45
Static and Fatigue Strength of Steel Girders Strengthened with CFRP Laminates <i>M. Tavakkolizadeh, Jackson State University, USA and H. Saadatmanesh, The University of Arizona, USA</i>	59
Understanding and Modelling the Compressive Behaviour of FRP-confined Concrete <i>J. G. Teng and L. Lam, The Hong Kong Polytechnic University, Hong Kong, China</i>	73
Upgrading Concrete Structures using Advanced Polymer Composites <i>T. C. Triantafyllou, University of Patras, Greece</i>	89
A Fair Dinkum Approach to Fibre Composites in Civil Engineering <i>G. Van Erp and S. Ayers, University of Southern Queensland, Australia</i>	101
Part II: FRP Strengthening of Concrete and Masonry Structures	
An Experimental Study on Strain Distributions in FRP in Shear-strengthened RC Beams at Debonding <i>S. Y. Cao, Southeast University, China, J. F. Chen, Edinburgh University, Z. Hao and J. Chen, Southeast University, China</i>	117

Bond Tests on Concrete T-shaped Sections Strengthened with CFRP <i>F. Ceroni, University of Sannio, Italy, S. Matthys, Ghent University, Belgium, M. Pecce, University of Sannio, Italy and L. Taerwe, Ghent University, Belgium</i>	126
Shear Strengthening of Reinforced Concrete Structures Using FRP Composites <i>S. R. Denton, J. D. Shave and A. D. Porter, Parsons Brinckerhoff, Bristol, UK</i>	134
A Theoretical Strategy for Moment Redistribution in Continuous FRP-strengthened Concrete Structures <i>T. Ibell, University of Bath, UK and P. Silva, University of Missouri-Rolla, USA</i>	144
Bond-Slip Models for FRP Sheet/Plate-to-Concrete Interfaces <i>X. Z. Lu, Tsinghua University, Beijing, China, J. G. Teng, The Hong Kong Polytechnic University, Hong Kong, China, L. P. Ye and J. J. Jiang, Tsinghua University, Beijing, China</i>	152
Moment Redistribution in Adhesively Plated RC Beams and Slabs <i>D. J. Oehlers, I. Liu and R. Seracino, University of Adelaide, Australia</i>	162
Arching Action in FRP Reinforced Concrete Slabs <i>S. E. Taylor and B. Mullin, The Queen's University, Belfast, Northern Ireland</i>	170
A View Point of Crack Propagation and Failure Modes of FRP Strengthened Flexural RC Elements <i>E. Andreou, D. B. Tann, R. Delpak, University of Glamorgan, UK</i>	179
Retrofitting of Damaged Concrete Beams with High Performance Polymers <i>R. Y. Xiao and W. B. Almajed, University of Wales, Swansea, UK</i>	187
RC Column Lateral Prestressing with Composites <i>M. A. Ciupala, K. Pilakoutas, A. A. Mortazavi and N. Taranu, University of Sheffield, UK</i>	195
Experimental Behaviour of FRP-confined Slender RC Columns under Eccentric Loading <i>Z. Tao, Fuzhou University, China, J. G. Teng, Hong Kong Polytechnic University, China, L-H. Han, Fuzhou, University, China and L. Lam, Hong Kong Polytechnic University, China</i>	203
Bond Analysis of Masonry Structures Strengthened with CFRP Sheets <i>M. A Aiello and S. M. Sciolti, University of Lecce, Italy</i>	213
Strengthening with FRP Bars of URM Walls Subject to Out-of-Plane Loads <i>N. Galati, University of Missouri-Rolla, USA, G. J. Tumialan, Simpson Gumpertz and Heger, USA, S. Secondin, University of Padua, Italy and A. Nanni, University of Missouri-Rolla, USA</i>	222

Part III: FRP Strengthening of Metallic and Timber Structures	
Elastic Analysis of Adhesion Stresses Between a Beam and a Bonded Strengthening Plate <i>J. Cadei, Independent Consultant, Guildford, UK and T. Stratford, University of Edinburgh, UK</i>	235
Experimental Characterization of Steel Elements Reinforced by Adhesively Bonded CFRP Plates <i>P. Colombi, N. Panzeri and C. Poggi, Polytechnic of Milan, Italy</i>	245
The Strengthening of Wrought Iron Using Carbon Fibre Reinforced Polymer Composites <i>S. S. J. Moy, J. Clark and H. Clarke, University of Southampton, UK</i>	258
Analysis of the Stresses in the Adhesive Interface of Metallic Beams Reinforced with Composite Plates <i>S. S. J. Moy, P. J. Deng and M. M. K. Lee, University of Southampton, UK</i>	266
Strengthening of an Artificially Degraded Steel Beam Utilising a Carbon/Glass Composite System <i>N. Photiou, L. C. Hollaway and M. K. Chryssanthopoulos, School of Engineering, Civil Engineering, University of Surrey, UK</i>	274
Fracture Mechanics 2D-FEA of a Cracked Steel Plate with a CFRP Patch <i>T. D. Righiniotis, E. Aggelopoulos, M. K. Chryssanthopoulos, School of Engineering, Civil Engineering, University of Surrey, UK</i>	284
Flexural Behaviour of Glulam Beams Reinforced with CFRP Rods <i>F Micelli, V Scialpi and A La Tegola, University of Lecce, Italy</i>	292
Use of CFRP Connectors in Glulam Flexural Joints <i>V Scialpi, F Micelli and A La Tegola, University of Lecce, Italy</i>	300
Analytical and Experimental Study on Bonded-in FRP Bars in Glulam Timber <i>L. De Lorenzis, V. Scialpi and A. La Tegola, University of Lecce, Italy</i>	308
Part IV: Development of FRP Materials and Systems	
A New Glass Fibre Reinforcement for Anti-corrosion Composites <i>P. C. Almenara and P. Thornburrow, Saint-Gobain Vetrotex, France</i>	319
Advanced Polymer Composite and Concrete Beam and Slab Systems <i>A. G. Bloodworth and J. R. Szczerbicki, University of Southampton, UK</i>	327
Composite Recycling in the Construction Industry <i>A. Conroy, S. Halliwell and T. Reynolds, BRE, Watford, UK</i>	335

The Use of Advanced Composite Materials in Long Span Civil Engineering Infrastructure <i>H. N. Garden, Taylor Woodrow Technology, Bedfordshire, UK</i>	343
Polymer-layered Silicate Nanocomposites in Civil Engineering <i>I. Hackman and L. C. Hollaway, University of Surrey, UK</i>	353
Modelling a Composite/Concrete T-beam Utilising a Finite Element Technique <i>J. Hulatt, L. C. Hollaway and A. M. Thorne, University of Surrey, UK</i>	361
Static and Fatigue Behavior of GFRP Bridge Decks Adhesively Bonded to Steel Girders <i>T. Keller and H. Gürtler, Swiss Federal Institute of Technology Lausanne, Switzerland</i>	369
Combined Pressure/Tension Behaviour of Adhesive-bonded GFRP Pipe Joints <i>J. M. Lees, University of Cambridge, UK</i>	377
Aspects on the Behaviour of Bolted Joints for Pultruded Fibre Reinforced Polymer Profiles <i>J. T. Mottram, C. Lutz and G. C. Dunscombe, University of Warwick, UK</i>	384
Recycling Technologies for Thermoset Composite Materials <i>S. J. Pickering, The University of Nottingham, UK</i>	392
Innovative Developments for Bridges Using FRP Composites <i>G. Sedlacek and H. Trumpf, RWTH, Aachen, Germany</i>	400
GFRP Composite Rock Bolt with Head of Large Bearing Capacity <i>K. Sekijima, Kurasoku Kensetsu Consultant Co Ltd., K. Ikeda, Shimizu Corp. and T. Nishimoto, Asahi Glass Matex Co. Ltd., Japan</i>	412
Static and Dynamic Behaviour of CFRP Prestressed Concrete Lighting Columns <i>G. P. Terrasi, SACAC Ltd, Switzerland and J. M. Lees, Cambridge University, UK</i>	420
Deployable FRP Tapered Box-beam Bridge <i>R. G. Wight, C. R. Shyu, R. Tanovic, M. A. Erki and P. J. Heffernan, Royal Military College of Canada, Canada</i>	428
Part V: Analysis, Design and Testing	
The Influence of Shear-flexibility on the Elastic Critical Load for Frames of Pultruded Fibre Reinforced Plastic Section <i>A. Abbaker and J. T. Mottram, University of Warwick, UK</i>	437

Fire Testing of Concrete Beams with Fibre Reinforced Plastic Rebar <i>A. Abbasi and P. J. Hogg, Queen Mary, University of London, UK</i>	445
Experimental and Numerical Approach to Buckling of Laminated Composite Sandwich Panel <i>M. A. Aiello, University of Lecce, Italy, P. Corvaglia, Consorzio CETMA, Italy and L. C. Hollaway, University of Surrey, UK</i>	457
Fire Behaviour of Reinforced Concrete Columns Confined with Fibre-reinforced Polymers <i>L. A. Bisby and M. F. Green, Queen's University, Canada and V. K. R. Kodur, Institute for Research in Construction, National Research Council of Canada</i>	465
Stresses in Simple Shear Test Specimens for Steel or FRP-to-Concrete Bond Strength: A 3D Finite Element Study <i>J. F. Chen, Edinburgh University, UK, and W. K. Pan, Nottingham University, UK</i>	473
Performance of a Fibre-reinforced Polymer Bridge Deck Under Dynamic Wheel Loading <i>A. F. Daly and J. R. Cuninghame, TRL Ltd, UK</i>	483
Global Buckling of FRP Pultruded Thin-walled Members Under Axial Compression <i>L. De Lorenzis and A. La Tegola, University of Lecce, Italy</i>	493
Thermal Effects on Bond Between FRP Rebars and Concrete <i>N. Galati, B. Vollintine, A. Nanni, and L. R. Dharani, University of Missouri-Rolla, USA, and M. A. Aiello, University of Lecce, Italy</i>	501
F E Modelling of Mechanical Interaction of Lugged FRP Rods with Concrete, Comparison Between Experiment and Simulation <i>A. R. Khoei and H. R. Irannejad, Sharif University of Technology, Iran</i>	509
Minimising Damage and Delaying Failure of Composite Laminates <i>L. N. McCartney, NPL Materials Centre, Teddington, UK</i>	517
Dynamic Response of Initially Stressed Composite Sandwich Plates <i>A.K. Nayak, R. A. Shenoi and S. S. J. Moy, University of Southampton, UK</i>	525
Numerical Simulation as a Tool for Manufacturing, Failure and Impact Prediction of Textile Reinforced Composites <i>A. K. Pickett, Cranfield University, UK</i>	535
Euler Buckling of Partially Stiffened Pultruded GRP Columns: A Comparison of Shell Finite Element and Beam-Column Model Predictions <i>G. J. Turvey and A. Afifi, Lancaster University, UK</i>	545

Shear Failure Strength of Web-Flange Junctions in Pultruded GRP Profiles <i>G J Turvey and Y Zhang, Lancaster University, UK</i>	553
Use of FBG Sensors for Matrix Crack Detection in GFRP Composites <i>M. Ussorio, H. Wang, S. L. Ogin, A. M. Thorne and G. T. Reed, University of Surrey, UK and S. C. Tjin, Nanyang Technological University, Singapore</i>	561
Use of an FFT Band Pass Filter for Crack Detection by an Embedded Polarimetric Sensor <i>H. Wang, S. L. Ogin, A. M. Thorne and G. T. Reed, University of Surrey, Guildford, UK</i>	567
The Importance of Dynamic Behaviour in the Design of Laminated Composite Beams <i>S. H. R. Eslimy-Isfahany, Isfahan University of Technology, Isfahan, Iran, J. R. Banerjee, City University, London, UK</i>	575
Part VI: Durability and Long-term Performance	
Effect of Fatigue Cycling on the Strength of RC Beams Externally Strengthened with CFRPs <i>C. Gheorghiu, P. Labossière and J. Proulx, University of Sherbrooke, Canada</i>	585
The Role of Durability in Reliability-based Design of Composite Materials for Civil Structures <i>N. L. Post, J. V. Bausano, J. J. Lesko, S. W. Case and J. C. Duke, Virginia Tech, USA</i>	593
Numerical Simulation of Long-term Behaviour of Concrete Structures with Externally Bonded Continuous Fibre Sheet <i>T. Shimomura, H. Kasahara and K. Maruyama, Nagaoka University, Japan</i>	602
Influences of Freeze and Thaw Cycles and Elevated Temperature on the Properties of FRP Composites <i>D. B. Tann and R. Delpak, University of Glamorgan, UK</i>	611
Environmental Effects on Tensile Properties of FRP Laminates Made Using Wet-lay-up Method <i>M. Tavakkolizadeh, Jackson State University, USA and H. Saadatmanesh, The University of Arizona, USA</i>	619
Behaviour of FRP-confined Concrete Stub Columns under Long-term Sustained Loads <i>Q. Yu, L-H. Han and Z. Zhang, Fuzhou University, China</i>	633
Fatigue Behavior of Double-lap Joints from Pultruded GFRP Laminates <i>A. Zhou, T. Tirelli and T. Keller, Swiss Federal Institute of Technology, Lausanne, Switzerland</i>	641

Part VII: Certification, Inspection and Quality Assurance**Strengthening Concrete Structures with Fibre Composite Materials:
Updating Technical Report 55**

*J. Clarke, The Concrete Society and A. Darby and T. Ibell,
University of Bath, UK*

651

**Near Surface Mounted Reinforcement for Strengthening – UK Experience
and Development of Best Practice**

N. Farmer, Tony Gee and Partners, Cobham, UK

659

**A Performance-based Qualification Scheme for Composite Materials
Systems to be Used in the Civil Infrastructure**

*A. R. Hutchinson and J. G. Broughton, Oxford Brookes University, S. Frost and
R. J. Lee, AEA Technology, N. Farmer and I. Smith, Tony Gee & Partners,
S. Luke and L. Canning, Mouchel Parkman, UK*

667

**A Review of the Use of Fibre Reinforced Composites by the UK Highways
Agency**

N. Loudon, Highways Agency, UK

675

Field Testing and Long-term Monitoring of West Mill Bridge

*L. Canning and S. Luke, Mouchel Consulting, West Byfleet, B Täljsten,
Skanska Teknik AB, Sweden and P. Brown, Oxfordshire County Council,
Oxfordshire, UK*

683

**CIRIA C595 – Strengthening Metallic Structures using Externally-
bonded FRP**

*T. Stratford, University of Edinburgh, UK., J. Cadei, Independent Consultant,
Guildford, UK. L. C. Hollaway, University of Surrey, UK*

693

**Structural Health Monitoring of CFRP-strengthened Beams Using Dynamic
Testing**

*C. M. Tan, Mouchel Parkman, Manchester, J. S. Owen, University of Nottingham,
S. R. Pearson, AEA Technology Rail, Derby and S. Luke, Mouchel Parkman,
Manchester UK*

701

Part VIII: Case Studies**Maunder Road Overbridge – The Behaviour and In-service Performance of
Cast Iron Bridge Girders Strengthened with CFRP Reinforcement**

I. Smith, Tony Gee and Partners, Cobham, UK

711

In-service Performance of FRP Structures

S. Halliwell, BRE, Watford, UK

719

Fibre Composites in Coastal and River Defences

C. K. Jolly, Cranfield University, UK

727

Rehabilitation Design and Evaluation of the Hawthorne Street Bridge FRP Deck Installation <i>K. Kessler, J. Lesko and T. Cousins, Virginia Tech, USA</i>	738
Strengthening Highway and Railway Bridge Structures with FRP Composites – Case Studies <i>S. Luke and L. Canning, Mouchel Parkman, West Byfleet, UK</i>	747
The Development of Composite Materials for Strengthening Structures <i>M. Richardson, Sika Ltd, Welwyn Garden City, UK</i>	755
FRP Strengthening of Building and Civil Structures in Sweden – A Review and Future Aims <i>B. Täljsten, Luleå University of Technology and Skanska Teknik AB, Sweden and A. Carolin, Skanska Teknik AB, Sweden</i>	763
<i>Index of Authors</i>	771
