

CONTENTS

	Page
The In Situ Ply Shear Strength Distributions in Graphite/Epoxy Laminated Composites	1
The Effect of Testing Method on the Shear Strength Distribution in Laminated Composites	27
Adhesion at the Interface in Cured Graphite Fiber Epoxy-Amine Resin Composites	42
Laminated Composites Containing an Elliptical Opening. II. Experiment and Model Modification	52
An Investigation of the Mechanical Properties of Improved Carbon Fibre Composites Materials	72
Radiation Effects on Graphite Fiber Reinforced Composites	99
Acoustic Emission Behavior of Flawed Unidirectional Carbon Fiber-Epoxy Composites	132
Effects of Cure on the Mechanical Properties of Composites	148
On Low-Velocity Impact Testing of Composite Materials	163
Three Dimensional Thermal Stresses in Angle-Ply Composite Laminates	186
Uniaxial Compressive Strength of High Modulus Fibers for Composites	204
Effects of Moisture and Temperature on the Compressive and Short Beam Shear Properties of Fiberite T300/976 Fabric	216
On the Stress Distribution in Laminae	232
Interfacial Properties of Some High-Strain Carbon Fibers in an Epoxy Matrix	241
Tensile Fatigue of Notched Carbon/Epoxy Specimens "Search for Optimum Model"	251
The Mechanics of Prepreg Conformance	265
Torsional Buckling Analysis and Damage Tolerance of Graphite/Epoxy Shafts	285
On Laminate Configurations for Simultaneous Failure	298
Effective Stress Fracture Models for Unnotched and Notched Multidirectional Laminates	314
Failure in Composite Angle Structures Part I : Initial Failure	333
Monitoring Progression of Matrix Splitting During Fatigue Loading Through Acoustic Emission in Notched Unidirectional Graphite/Epoxy	346
Monitoring Acoustic Emission in Cross-Ply Graphite/Epoxy Laminates During Fatigue Loading	366
Relation between Amplitudes and Rupture Mechanisms in Composite Materials	385
Residual Stresses in Carbon Fibre-Thermoplastic Matrix Laminates	401
Mode II Cyclic Delamination Growth	416
Measurements of Matrix Cracking and Delamination Caused by Impact on Composite Plates	441
Hydrostatic Response of Thick Laminated Composite Cylinders	456
Photoelastic Study of Epoxy Resin/Graphite Fiber Load Transfer	476
Damage Characteristics in Notched Carbon fiber Composites Subjected to Fatigue Loading	490
Impact-Induced Delamination – A View of Bending Stiffness Mismatching	507
Crystal Formation on Graphite/Polymer Composites	526
Residual Strength of a Carbon/Epoxy Composite Material Subjected to Repeated Impact	533
