

CONTENTS

	Page
STRUCTURE : THEORY AND EXPERIMENT	
Current Model for Amorphous SiO ₂	1
Structural Similarities and Dissimilarities Between SiO ₂ and H ₂ O	15
Geometrical Methods in the Theory of Glasses	37
Low Lying Excitations in Silica	47
New Methods of IR Spectroscopic Investigation of Amorphous Insulating Films	55
Vibrational Studies of Amorphous SiO ₂	63
Raman Spectra of SiO ₂ Fibers at High Tensile Strain	71
A Comparison of the Structure of a-SiO ₂ Prepared by Different Routes	77
NMR Studies of Neutron – Irradiated Crystalline and Vitreous SiO ₂	83
INTRINSIC AND EXTRINSIC DEFECTS : THEORY	
Electronic Structure of Defects in Amorphous SiO ₂	91
Electron and Hole Traps Related to π Bonded Oxygen Vacancy Centers in SiO ₂	103
Theory of Oxygen-Vacancy Defects in Silicon Dioxide	107
Total Energy Calculations for Intrinsic Defects in Amorphous SiO ₂	113
Boron Impurity Centers in SiO ₂ : a Tight Binding Consideration	119
INTRINSIC AND EXTRINSIC DEFECTS : EXPERIMENT	
Intrinsic and Extrinsic Point Defects in a-SiO ₂	125
Self-Trapped Excitons in Amorphous and Crystalline SiO ₂	135
Identification of Native Defects in a-SiO ₂	141
UV and VUV Optical Absorption due to Intrinsic and Laser Induced	153
Incommensurate Phase of Quartz : Microscopic Origin and Interaction with Defects	161
Gamma Ray Induced 2 eV Optical Absorption Band in Pure Silica Core Fibers	165
On the Decay of X-Ray Induced Luminescence of SiO ₂	171
On the Role of O ₂ in the Luminescence of Amorphous and Crystalline SiO ₂	175
Transformation of Radiation Induced Defect Centers as a Probe of Molecular Diffusion in a-SiO ₂	181
Observation of the Neutral Oxygen Vacancy in Silicon Dioxide	187
New Insight Into the Structure of SiO ₂ Glass from a Point Defect Study	193
Hydrogen Bonds Between Peroxy Radicals and Hydrogen Molecules in SiO ₂ Glass	199
ESR Studies of Paramagnetic Defects Formed in Amorphous SiO ₂ by High Energy Heavy Ions	205
On the Radiation Induced Coloration of SiO ₂	211
Effects of Processing on Radiation Damage Thresholds in Silica Glass	215
The Structure of Defects in Doped SiO ₂	223
Electrical and Optical Characteristics of Vanadium Doped Amorphous Silicon Dioxide Prepared by CVD	231
INTERFACES	
Theory of Dangling Orbital Defects at the <111> Si/SiO ₂ Interface	237
Structure and Hyperfine Interaction of Si = Si• Defect Clusters	249
On the Relationship Between Thermal Growth and Thickness Inhomogeneities in Very Thin SiO ₂ Films	255
The Pb Center at the Si-SiO ₂ Precipitate Interfaces in Buried Oxide Materials : ²⁹ Si Hyperfine Interactions and Linewidths	259
Metastable and Multiply-Charged Individual Defects at the Si : SiO ₂ Interface	267
The Influence of disorder on the Si2p XPS Lineshape at the Si-SiO ₂ Interface	273
Si-SiO ₂ Interfaces – a HRTEM Study	279
Electrical and Interface Properties of MOS Structures of Getter Treated Silicon	285

Influence of Different Preparation Methods on Interfacial (Si/SiO ₂) Parameters of Very Thin Layers	291
OXIDATION, OXYNITRIDES AND DEPOSITED FILMS	
Thermal Oxidation of Silicon	297
A Framework for Incorporating Memory Effects of Structural Relaxation in Models for Thermal Oxidation of Silicon	307
Analysis of Stress Relaxation and Growth Kinetics for Two-Step Thermal Oxidation of Silicon	315
Photo-Induced Oxidation Processes in Silicon	321
Growth and Structure of Argon Laser Grown SiO ₂	331
Transport Properties of Plasma Enhanced CVD Silicon Oxynitride Films	337
Characteristics of SiO ₂ and SiO _x N _y Obtained by Rapid Thermal Processes	345
Evidence for Oxygen Bubbles in Fluorine Doped Amorphous Silicon Dioxide Thin Films	353
Low Temperature PECVD Silicon Rich Silicon Dioxide Films Doped With Fluorine	359
TRANSPORT, TRAPPING AND BREAKDOWN	
High Field Transport in SiO ₂	365
Hot Electrons in SiO ₂ : Ballistic and Steady State Transport	375
Electronic Charge Transport in Thin SiO ₂ Films	391
The Role of Hole Traps in the Degradation of Thermally Grown SiO ₂ Layers	411
The Influence of Temperature Nitrogen Annealing on the Electrical Properties of Plasma Nitrided Oxides	421
High-Field Positive-Charge Generation and Its Relation to Breakdown in a-SiO ₂	427
Breakdown Mechanisms of Thermally Grown Silicon Dioxide at High Electric Fields	443
Field Dependence of Time to Breakdown Distribution of Thin Oxides	449
RADIATION EFFECTS	
Radiation Effects in MOS VLSI Structures	445
Relationship Between Hole Trapping and Interface State Generation the Si/SiO ₂ System	465
Radiation Induced Conductivity of Thin Silicon Dioxide Films on Silicon	473
Interface Degradation in Short Channel MOSFETs: Comparison Between the Effects of Radiation and Hot Carrier Injection	481
BURIED DIELECTRIC LAYERS AND NOVEL APPLICATIONS	
Synthesis of Buried Dielectric Layers in Silica by Ion Implantation	487
Electrical Properties of SIMOX Material and Devices	517
Formation Mechanisms and Structures of Thin Buried Layers of SiO ₂ Fabricated Using Ion Beam Synthesis	531
Low Temperature ESR Study of SIMOX Structures	539
Defects in Silicon-on-Insulator Structures Formed by O ⁺ Implantation : Their Dependence on Implantation Temperature	547
Interface Properties and Recombination Mechanisms in SIMOX Structures	553
Porous Silica Sol-Gel Coatings for Nd : Glass High Power Pulsed Laser Laser Uses	561
Vacuum Re-Emission of Positrons from a-SiO ₂ Layers	569
AUTHOR INDEX	575
SUBJECT INDEX	577
