

Series Editor's Preface	ix
Preface	xi
Acknowledgments	xiii

Part I Fluoroelastomers Overview

1 Fundamentals	3
1.1 Introduction 3
1.2 Scope: Fluorocarbon Elastomers 4
1.3 Nature of Fluoroelastomers 5
1.4 Fundamental Properties 6
1.4.1 VDF Copolymers 6
1.4.2 TFE/Olefin Copolymers 6
1.4.3 Perfluoroelastomers 6
1.4.4 Other Compositions 6
1.5 Developmental History: Compositions, Cure Technology 7
1.6 Major Uses of Fluoroelastomers 9
1.7 Producers of Fluoroelastomers	11
REFERENCES	12
2 Fluoroelastomer Composition and Properties	
2.1 Major Families of Fluorocarbon Elastomers	13
2.2 VDF/HFP/(TFE) Elastomers	15
2.3 VDF/PMVE/TFE Elastomers	17
2.4 TFE/PMVE Perfluoroelastomers	17
2.5 TFE/P Elastomers	19
2.6 E/TFE/PMVE Elastomers	20
REFERENCES	22

Part II Fluoroelastomers Technology

3 Fluoroelastomer Monomers	25
3.1 Introduction	25
3.2 Vinylidene Fluoride (VDF)	25
3.2.1 VDF Properties	25
3.2.2 VDF Synthesis	26
3.3 Tetrafluoroethylene (TFE)	26
3.3.1 TFE Properties	27
3.3.2 TFE Synthesis	27

3.4	Hexafluoropropylene (HFP)	29
3.4.1	HFP Properties	29
3.4.2	HFP Synthesis	29
3.5	Perfluoro(methyl vinyl ether) (PMVE)	31
3.5.1	PMVE Properties	31
3.5.2	PMVE Synthesis	31
3.6	Olefins: Ethylene and Propylene	32
3.7	Cure-site Monomers	32
3.7.1	Types of Cure-site Monomers	32
3.7.2	Halogenated Vinyl Monomers	32
3.7.3	Functional Vinyl Ethers	33
3.8	Safety Aspects of Monomer Handling	33
3.8.1	Toxicity Considerations	33
3.8.2	Flammability	34
3.8.3	Explosivity	34
	REFERENCES	35

4 Production of Fluoroelastomers 37

4.1	Introduction	37
4.2	General Process Description	37
4.3	Free Radical Copolymerization	38
4.3.1	General Reaction Scheme	38
4.3.2	Copolymer Composition Relationships	39
4.3.3	Monomer Reactivity Ratios	40
4.4	Emulsion Polymerization	41
4.4.1	Emulsion Polymerization Kinetics	42
4.4.2	Continuous Emulsion Polymerization	49
4.4.3	Semibatch Emulsion Polymerization	53
4.5	Suspension Polymerization	59
4.5.1	Polymer Compositions	61
4.5.2	Polymerization Mechanism and Kinetics	61
4.5.3	Reactor Design and Operation	63
4.5.4	Polymerization Control	63
4.6	Process Conditions and Polymer Characteristics	65
4.6.1	Molecular Weight Distribution	65
4.6.2	End Groups	68
4.6.3	Composition and Monomer Sequence Distributions	68
4.7	Monomer Recovery	71
4.8	Isolation	71
4.9	Process Safety	73
4.10	Commercial Process Descriptions	74
	REFERENCES	75

5 Cure Systems for Fluoroelastomers 77

5.1	Introduction	77
5.2	VDF/HFP/(TFE) Copolymers: Diamine, Bisphenol, Peroxide	77
5.2.1	Diamine Cure	77
5.2.2	Bisphenol Cure	78
5.2.3	Peroxide Cure	83

5.3	VDF/PMVE/TFE Elastomers: Peroxide (Bisphenol)	89
5.4	Perfluoroelastomers—Various Systems	93
5.5	TFE/Propylene Elastomers: Peroxide, Bisphenol	95
5.6	Ethylene/TFE/PMVE Elastomers: Peroxide, Bisphenol	99
	REFERENCES	101

6 Processing of Fluoroelastomers 103

6.1	Introduction	103
6.2	Mixing	103
	6.2.1 Compounding Ingredients	103
	6.2.2 Mill Mixing	103
	6.2.3 Internal Mixers	105
6.3	Extrusion	106
6.4	Molding	110
	6.4.1 General Considerations	110
	6.4.2 Compression Molding	111
	6.4.3 Transfer Molding	112
	6.4.4 Injection Molding	113
6.5	Calendering	117
6.6	Other Processing Methods	119
	6.6.1 Latex	119
	6.6.2 Thermoplastic Elastomers	119
	REFERENCES	122

Part III Environmental Resistance and Applications of Fluoroelastomers

7 Fluid Resistance of VDF-Containing Fluoroelastomers 125

7.1	Introduction	125
7.2	Fluid Resistance Data	125
7.3	Discussion of Results	125
7.4	Fluid Service Recommendations ...	126
	REFERENCES	193

8 Fluid and Heat Resistance of Perfluoroelastomers 195

8.1	Introduction	195
8.2	Fluid Resistance Data	195
8.3	Heat Resistance Data	195
8.4	Resistance to Special Environments	196
8.5	Major Applications	196
	REFERENCES	226

9 Fluid Resistance of TFE-Olefin Fluoroelastomers 227

9.1	Introduction	227
9.2	Fluid Resistance of TFE/Propylene Elastomers	227
	9.2.1 TFE/P Dipolymer	227
	9.2.2 TFE/P/VDF Terpolymers	233

9.2.3	TFE/P/TFP Terpolymers	234
9.2.4	Service Recommendations	236
9.3	Fluid Resistance of Ethylene/TFE/PMVE Elastomer	236
9.3.1	Fluid Resistance Data	237
9.3.2	Resistance to Oil Field Environments	237
9.3.3	Cure System Effects	237
9.3.4	Service Recommendations	237
	REFERENCES	239
10 Fluoroelastomer Applications		241
10.1	Introduction	241
10.2	Major End Uses	241
10.3	Fabrication Methods	241
11 Compounds for O-Rings and Molded Goods		
11.1	O-Rings	243
11.1.1	Specifications	243
11.1.2	Compression Set Measurement	243
11.1.3	VDF/HFP Dipolymer Compounds	245
11.2	VDF/HFP/TFE Compounds	253
11.3	VDF/PMVE/TFE Compounds	259
11.4	Seal Design Considerations	260
11.5	Additional Fluoroelastomer Molding Compounds	260
	REFERENCES	277
12 Compounds for Auto Fuel Systems		279
12.1	Introduction	279
12.2	Fuel Line Veneer	280
12.3	Fuel Tank Components	287
12.4	Fuel Injector Seals	288
12.5	Development Trends	289
	REFERENCES	290
13 Compounds for Auto Power Train Service		291
13.1	Introduction	291
13.2	Oil Seal Requirements	291
13.3	Compounds for Oil Seals	294
13.3.1	FKM Elastomers	294
13.3.2	FEPM Elastomers	295
13.4	Compounds for Transmission Seals	296
	REFERENCES	298
14 Compounds for Power Plant Service		
14.1	Introduction	299
14.2	Flue Duct Expansion Joints	299
14.3	High-Fluorine Terpolymers	299
	REFERENCES	302

15 Other Fluoroelastomer Applications and Processing	303
15.1 Introduction	303
15.2 Latex and Coatings	303
15.3 Thermoplastic Processing	303
15.4 Fluoroelastomer Caulks	304
15.5 Processing Aids for Hydrocarbon Plastics	304
REFERENCES	305
16 Fluoroelastomer Safety and Disposal	307
16.1 Introduction	307
16.2 Safety in Production ..	307
16.3 Safety in Applications	308
16.4 Disposal	308
REFERENCES	309
Appendix: PDL Ratings	311
Glossary	313
Trademarks	347
Index	349
