PREFACE	vi
1. INTRODUCTORY	1
PART I. THE RUBBER-LIKE STATE	
2. THE RUBBER-LIKE STATE	5
PART II. THE GENERAL PROPERTIES OF RUBBER	
3. THE MECHANICAL PROPERTIES OF RUBBER	20
4. THE EFFECT OF STRESS, FLUCTUATION OF STRESS AND TEMPERATURE	54
5. CHANGE OF PROPERTIES WITH AGE AND SERVICE	105
6. THEORY OF SWELLING IN NON-POLAR LIQUIDS	126
7. THE CONDUCTIVITY OF RUBBER (HEAT, SOUND AND ELECTRICITY)	138
8. THE DIFFUSION OF GASES THROUGH RUBBER	148
PART III. RUBBER TECHNOLOGY	
9. OUTLINE OF RUBBER TECHNOLOGY	160
10. COMPATIBILITY AND INCOMPATIBILITY OF PROPERTIES	166
11. BONDING OF RUBBER TO METAL, INCLUDING A NOTE ON MOULDING	175
PART IV. PRINCIPLES OF THE DESIGN OF RUBBER ENGINEERING COMPONENTS	
12. THE FACTOR OF OIL RESISTANCE IN DESIGN	184
13. THE RELATIVE MERITS OF COMPRESSION AND SHEAR IN DESIGN AND SHAPE FACTOR	204
14. SHOCK ABSORPTION AND VIBRATION INSULATION	225
15. DESIGNING THE RUBBER COMPONENT	237
16. SPECIFICATIONS	254
