

## CONTENTS

	Page
890358 Hydrogenated Nitrile Rubber—Long Term Aging in Automotive Fluids	1
890359 High Strength elastomers of Hydrogenated NBR Containing Zinc Oxide and Methacrylic Acid	13
890360 The Status of HNBR in the West European Automotive Industry	19
890361 New Elastomers are More Resistant to Many Automotive Fluids	33
890362 The Effects of Aeration of Test Fluids on the Retention of Physical Properties of Fluoroelastomer Vulcanizates	45
890363 Study of the Hydrodynamic and Viscoelastic Properties Affecting the Surface Appearance of Extruded EPDM Compounds	53
