<b>Chapter 1</b>	<b>MECHANICAL TESTS AND POLYMER TRANSITIONS</b>	<b>1</b>
	I Introduction	1
	II Mechanical Tests	3
	A. Creep Tests	4
	B. Stress Relaxation Tests	5
	C. Stress-Strain Tests	5
	D. Dynamic Mechanical Tests	11
	E. Other Tests	17
	III Glass Transitions	18
	A. Chemical Structure and T <sub>g</sub>	20
	B. Structural Factors Affectin T <sub>g</sub>	22
	IV Crystallinity	26
	A. Melting Points	27
	V Problems	31
	VI References	32
 <b>Chapter 2</b>	 <b>ELASTIC MODULI</b>	 <b>39</b>
	I Isotropic and Anisotropic Materials	39
	A. Isotropic Materials	39
	B. Anisotropic Materials	39
	II Methods of Measuring Moduli	43
	A. Young's Modulus	43
	B. Young's and Shear Moduli from Vibration Frequencies	47
	III Relation of Moduli to Molecular Structure	48
	A. Effect of Molecular Weight	51
	B. Effect of Crosslinking	52
	C. Effects of Crystallinity	54
	D. Copolymerization and Plasticization	56
	E. Block and Graft Polymers and Polyblends	58
	IV Problems	59
	V References	62
 <b>Chapter 3</b>	 <b>CREEP AND STRESS RELAXATION</b>	 <b>67</b>
	I Introduction	67
	II Models	68
	III Distribution of Relaxation and Retardation Times	75
	IV Superposition Principles	77
	V Effect of Temperature	84
	VI Stress Dependence of Creep	87
	VII Strain Dependence of Stress Relaxation	92
	VIII Effect of Pressure	93
	IX Thermal Treatments	94
	X Effect of Molecular Weight: Rheology	95
	XI Effect of Plasticizers on Melt Viscosity	104
	XII Crosslinking	106
	XIII Crystallinity	111
	XIV Copolymers and Plasticization	118
	XV Effect of Orientation	119
	XVI Block Polymers and Polyblends	121
	XVII Summary	123
	XVIII Problems	125

	XIX	References	128
<b>Chapter 4</b>		<b>DYNAMIC MECHANICAL PROPERTIES</b>	<b>139</b>
	I	Introduction and Instruments	139
	II	Temperature and Frequency Effects	143
	III	Stress or Strain Amplitude Effects	161
	IV	Thermal History	165
	V	Effect of Molecular Weight	170
	VI	Effect of Crosslinking	174
	VII	Effects of Plasticizers and Morphology	181
	VIII	Effects of Plasticizers and Copolymerization	189
	IX	Effect of Molecular Orientation	197
	X	Effect of Strength of Intermolecular Forces	205
	XI	Polyblends, Block, and Graft Polymers	208
	XII	Secondary Glass Transitions	215
	XIII	Summary	229
	XIV	Problems	231
	XV	References	235
