CONTENTS

		Page
Part One	Introduction	
Chapter 1.	Quasi-Elastic Light Scattering of Macromolecules	
	and Particles in Solution and Suspension	3
Chapter 2.	Theory and Practice of Correlation Spectroscopy	31
Part Two	Essentials of Size Distribution Measurement	
Chapter 3.	Extraction of Distributions of Decay Times in Photon	0.1
	Correlation of Polydisperse Macromolecular Solutions	81
Chapter 4	Analysis of Polydisperse Scattering Data II	107
Chapter 5	Polydispersity Analysis of QELS Data by a Smoothed Inverse	
	Laplace Transform	129
Chapter 6	Determination of Particle Size and Speed Distributions by Use of Photon Correlation Spectroscopy and First-Order	
	Splines	159
Chapter 7	Particle Size Distributins from Analyses of Quasi-Elastic	10)
	Light-scattering Data	199
Chapter 8	Applications of the Histogram Method for Determination of	
	Size Distributions of Suspended Spherical Particles	237
Part Three	Extended and Complementary Methods	
Chapter 9	Electrophoretic and Frictional Properties of Particles in	
	Complex Media Measured by Laser Light Scattering and	
	Fluorescence Photobleaching Recovery	255
Chapter 10	Utility of Multi-Detector Methods in Quasi-Elastic Light-Scattering	201
Chapter 11	Spectroscopy Simultaneous Measurements of Agradynamic Diameter and	291
	Simultaneous Measurements of Aerodynamic Diameter and Electrostatic Charge on a Single-Particle Basis	327
Chapter 12	Measurement of Diffusion Diameter Distribution on a Single-Particle	321
	Basis by Use of Dual-Beam Laser Doppler Velocimetry	343
Chapter 13	The Bigger They Are, the Harder They Fall: Accurate Aerosol	
	Size Measurements by Doppler Shift Spectroscopy	361
Chapter 14	Dynamic Depolarized Light-Scattering Studies of Rodlike Particles	377
Chapter 15	Transient Electric Birefringence of DNA Restriction Fragments and	401
Chapter 16	the Filamentous Virus Pf3 Particle Size Distribution by Optical Transients and Quasi-Elastic	401
Chapter 16	Light Scattering	439
Chapter 17	A Photon Correlation Spectroscopy Study of Size Distributions of	737
	Polystyrene Initiated in a Microemulsion	461
Chapter 18	Measurement of Ciliary Activity by Quasi-Elastic Light	
	Scattering	483
Part Four	Particle Interaction Effects	
Chapter 19	Effects of Interparticle Interactions on Particle Size Determinations	
	by QELS	501
Chapter 20	Effects of Critical-Type Behavior on Droplet Sizing in	
	Microemulsions	529
Index		557
