

CONTENTS

	Page
Chapter 1. Introduction	1
1. Objectives of size enlargement	1
2. Historical perspective	4
3. Classification of methods and scope of the book	5
4. Selection of size enlargement methods	18
5. Literature of size enlargement	20
References	20
Chapter 2. Agglomerate bonding	23
1. Bonding mechanisms	23
2. Theoretical tensile strength of agglomerates	25
3. Strength testing	32
4. Experimental aspects of agglomerate bonding	36
References	49
Chapter 3. Agitation methods – tumbling agglomeration	52
1. Fundamental aspects	52
2. Equipment	63
References	81
Chapter 4. Agitation methods – mixer agglomeration	83
1. Horizontal pans	83
2. Pugmills	84
3. High speed shaft mixers	86
4. Powder blenders and mixers	88
5. Falling curtain agglomerators	92
6. Continuous flow mixing systems	93
References	96
Chapter 5. Pressure methods	97
1. The compaction process	97
2. Equipment	100
References	122
Chapter 6. Thermal methods	123
1. Sintering and heat hardening (or induration)	123
2. Nodulizing	132
3. Drying and solidification	132
References	137
Chapter 7. Spray and dispersion methods	139
1. Spray drying	139
2. Prilling	145
3. Fluid bed spray granulation	149
4. Spouted bed granulation	156
5. Pneumatic conveying of flash drying	158
References	160
Chapter 8. Agglomeration in liquid media	161
1. Introduction	161
2. Agglomeration by immiscible liquid wetting	161
3. Agglomeration by polymeric flocculants	170
