

## CONTENTS

1. Introduction to Nanotechnology	1
<b>Part A Nanostructures, Micro/Nanofabrication, and Micro/Nanodevices</b>	
2. Nanomaterials Synthesis and Applications: Molecule-Based Devices	9
3. Introduction to Carbon Nanotubes	39
4. Nanowires	99
5. Introduction to Micro/Nanofabrication	147
6. Stamping Techniques for Micro and Nanofabrication:	185
7. Materials Aspects of Micro-and Nanoelectromechanical Systems	203
8. MEMS/NEMS Devices and Applications	225
9. Microfluidics and Their Applications to Lab-On-a-Chip	253
10. Therapeutic Nanodevices	279
<b>Part B Scanning Probe Microscopy</b>	
11. Scanning Probe Microscopy-Principle of Operation, Instrumentation, and Probes	325
12. Probes in Scanning Microscopies	371
13. Noncontact Atomic Force Microscopy and Its Related Topics	385
14. Low Temperature Scanning Probe Microscopy	413
15. Dynamic Force Microscopy	449
16. Molecular Recognition Force Microscopy	475
<b>Part C Nanotribology and Nanomechanics</b>	
17. Micro/Nanotribology and Materials Characterization Studies Using Scanning Probe Microscopy	497
18. Surface Forces and Nanorheology of Molecularly Thin Films	543
19. Scanning Probe Studies of Nanoscale Adhesion Between Solids in the Presence of Liquids and Monolayer Films	605
20. Friction and Wear on the Atomic Scale	631
21. Nanoscale Mechanical Properties-Measuring Techniques and Applications	661
22. Nanomechanical Properties of Solid Surfaces and Thin Films	687
23. Atomistic Computer Simulations of Nanotribology	717
24. Mechanics of Biological Nanotechnology	739
25. Mechanical Properties of Nanostructures	763
<b>Part D Molecularly Thick Films for Lubrication</b>	
26. Nanotribology of Ultrathin and Hard Amorphous Carbon Films	791
27. Self-Assembled Monolayers for Controlling Adhesion, Friction and Wear	831
28. Nanoscale Boundary Lubrication Studies	861
29. Kinetics and Energetics in Nanolubrication	883
<b>Part E Industrial Applications and Microdevice Reliability</b>	
30. Nanotechnology for Data Storage Applications	899
31. The "Millipede" A Nanotechnology-Based AFM Data-Storage System	921
32. Microactuators for Dual-Stage Servo Systems in Magnetic Disk Files	951
33. Micro-Nanotribology of MEMS/NEMS Materials and Devices	983
34. Mechanical Properties of Micromachined Structures	1023
35. Thermo-and Electromechanics of Thin-Film Microstructures	1030
36. High Volume Manufacturing and Field Stability of MEMS Products	1083
37. MEMS packaging and Thermal Issues in Reliability	1111
<b>Part F Social and Ethical Implication</b>	
38. Social and Ethical Implications of Nanotechnology	1135
