**CHAPTER OPENING CAPTIONS AND CREDITS** xxix

## **SECTION 1: PERSPECTIVES** 1

### **Chapter 1 INTRODUCTION** 3

- 1.0 Perspectives of Nanotechnology 4
  - 1.0.1 *Review of Definitions* 5
  - 1.0.2 *Technology Revolution or Evolution?* 6
  - 1.0.3 *Outlook* 9
  - 1.0.4 *The Nano Perspective* 10
- 1.1 The Business of Nanotechnology 10
  - 1.1.1 *Background* 11
  - 1.1.2 *Companies* 12
  - 1.1.3 *Sources of Nanotechnology Inventions* 13
  - 1.1.4 *Founding a Company—What to Do First?* 14
  - 1.1.5 *Business Structures* 16
  - 1.1.6 *Registering a Company—Where?* 18
  - 1.1.7 *Finances* 20
  - 1.1.8 *Managing the Company* 20
  - 1.1.9 *Developing and Manufacturing a Product* 21
  - 1.1.10 *Marketing* 22
  - 1.1.11 *Exits* 22
- 1.2 Education and Workforce Development 23
  - 1.2.1 *Technological Revolutions—The Workforce Point of View* 24
  - 1.2.2 *The State of Education and Workforce Development* 25
  - 1.2.3 *Current Workforce and Education Programs* 27
  - 1.2.4 *The Workforce of the Future* 27
  - 1.2.5 *Planning Ahead and Potential Career Paths* 28

| 2.5.1 | <i>Lithographies</i>                     | 102 |
| 2.5.2 | <i>Nanomanipulators and Grippers</i>     | 103 |
| 2.5.3 | <i>Bottom-Up Manufacturing</i>           | 105 |
| 2.5.4 | <i>Molecular Scale Assembly Lines</i>    | 107 |
| 2.6   | Concluding Remarks                       | 112 |
|       | References                               | 112 |
|       | Problems                                 | 119 |

## SECTION 2: ELECTROMAGNETIC NANOENGINEERING 121

### Chapter 3 NANO-ELECTRONICS 123

|       |  |     |
|-------|--|-----|
| 3.0   | Electronics and Nanoelectronics  | 124 |
| 3.0.1 | <i>Basic Electronic Terminology and Symbols</i>                                  | 124 |
| 3.0.2 | <i>Fundamental Types of Electronic Materials<br/>(and Nanomaterials)</i>         | 124 |
| 3.0.3 | <i>Fundamental Kinds of Electronic Devices</i>                                   | 126 |
| 3.0.4 | <i>The Nano Perspective</i>  | 129 |
| 3.1   | Microelectronics   | 130 |
| 3.1.1 | <i>Introduction to Band Structure</i>  | 130 |
| 3.1.2 | <i>Basic Conductor and Semiconductor<br/>Physics</i>                             | 135 |
| 3.1.3 | <i>Transistors</i>   | 149 |
| 3.2   | Nanoscale Electronics  | 150 |
| 3.2.1 | <i>Background</i>  | 150 |
| 3.2.2 | <i>The Current State of Microelectronics and<br/>Extensions to the Nanoscale</i> | 150 |
| 3.2.3 | <i>Nanotechnology-Based Strategies:<br/>Single-Electron Tunneling</i>            | 151 |
| 3.2.4 | <i>Nanotechnology-Based Strategies:<br/>Molecular Wires</i>                      | 157 |
|       | References   | 163 |
|       | Problems   | 164 |

### Chapter 4 NANO-OPTICS 165

|       |   |     |
|-------|---|-----|
| 4.0   | Introduction to Optics  | 166 |
| 4.0.1 | <i>Interactions of Light with Matter</i>                          | 169 |
| 4.0.2 | <i>The Nano Perspective</i>                                       | 172 |
| 4.1   | The Surface Plasmon   | 173 |
| 4.1.1 | <i>The Surface Plasmon Resonance</i>                              | 173 |
| 4.1.2 | <i>Scattering</i>   | 179 |
| 4.1.3 | <i>Color Generation from Nanoparticles and<br/>Nanostructures</i> | 181 |
| 4.1.4 | <i>Applications of Nanoplasmonics</i>                             | 182 |

|       |  |     |
|-------|--|-----|
| 4.2   | Quantum Dots                                 | 184 |
| 4.2.1 | <i>The Bohr Exciton Radius</i>               | 184 |
| 4.2.2 | <i>Tuning the Gap</i>                        | 185 |
| 4.2.3 | <i>Luminescence</i>                          | 186 |
| 4.2.4 | <i>Applications</i>                          | 187 |
| 4.3   | Near-Field Microscopies                      | 191 |
| 4.3.1 | <i>The Diffraction Limit</i>                 | 191 |
| 4.3.2 | <i>Near-Field Microscopy</i>                 | 192 |
| 4.3.3 | <i>Applications</i>                          | 193 |
| 4.4   | Nanophotonics                                | 194 |
| 4.4.1 | <i>Photonics</i>                             | 194 |
| 4.4.2 | <i>Photonic Structures in Living Systems</i> | 195 |
| 4.4.3 | <i>Photonic Crystals</i>                     | 196 |
| 4.4.4 | <i>Fabrication of Nanophotonic Crystals</i>  | 199 |
|       | References                                   | 200 |
|       | Problems                                     | 202 |

## **Chapter 5**    **NANOMAGNETISM**    203

|       |   |     |
|-------|---|-----|
| 5.0   | Introduction  | 204 |
| 5.0.1 | <i>History</i>  | 204 |
| 5.0.2 | <i>Magnetic Phenomena and Their Classical Interpretation</i>  | 205 |
| 5.0.3 | <i>The Nano Perspective</i>                                   | 207 |
| 5.1   | Characteristics of Nanomagnetic Systems                       | 208 |
| 5.1.1 | <i>Introduction to Nanomagnetism</i>                          | 208 |
| 5.1.2 | <i>Characteristics of Nanomagnetic Materials</i>              | 211 |
| 5.1.3 | <i>Magnetization and Nanostructures</i>                       | 212 |
| 5.2   | Magnetism in Reduced Dimensional Systems                      | 218 |
| 5.2.1 | <i>Two-Dimensional Systems</i>                                | 218 |
| 5.2.2 | <i>One-Dimensional Systems</i>                                | 219 |
| 5.2.3 | <i>Zero-Dimensional Systems</i>                               | 219 |
| 5.3   | Physical Properties of Magnetic Nanostructures                | 220 |
| 5.3.1 | <i>Substrate Effects on Structures and Related Properties</i> | 220 |
| 5.3.2 | <i>Oscillatory Exchange Coupling</i>                          | 220 |
| 5.3.3 | <i>Spin-Polarized Tunneling</i>                               | 220 |
| 5.3.4 | <i>Magnetoresistivity</i>                                     | 221 |
| 5.3.5 | <i>Magnetic Moments of 3d Transition Metal Clusters</i>       | 221 |
| 5.3.6 | <i>The Temperature Dependence of Magnetic Moments</i>         | 222 |
| 5.4   | Recent Progress in Nanoscale Sample Preparation               | 223 |
| 5.4.1 | <i>Epitaxial Methods</i>                                      | 223 |

|       |   |     |
|-------|---|-----|
| 5.5   | Nanomagnetism Applications                              | 223 |
| 5.5.1 | <i>Overview</i>   | 223 |
| 5.5.2 | <i>Current Status of Spin-Based Electronics Devices</i> | 226 |
| 5.5.3 | <i>Sensors</i>  | 229 |
| 5.5.4 | <i>Nanomagnetism for Biomedical Applications</i>        | 230 |
|       | References  | 234 |
|       | Problems  | 234 |

## SECTION 3: MECHANICAL NANOENGINEERING 237

### Chapter 6 NANOMECHANICS 239

|       |   |     |
|-------|---|-----|
| 6.0   | Introduction  | 240 |
| 6.0.1 | <i>Two-Atom Chain Mechanics</i>                         | 240 |
| 6.0.2 | <i>Interaction Potentials</i>                           | 241 |
| 6.0.3 | <i>External Forces</i>                                  | 247 |
| 6.0.4 | <i>Dynamic Motion</i>                                   | 248 |
| 6.1   | Three-Atom Chain  | 249 |
| 6.2   | Lattice Mechanics                                       | 250 |
| 6.3   | Stress and Strain                                       | 253 |
| 6.4   | Linear Elasticity Relations                             | 255 |
| 6.4.1 | <i>Orthotropic and Isotropic Materials</i>              | 256 |
| 6.4.2 | <i>Crystalline Materials</i>                            | 256 |
| 6.5   | Molecular Dynamics                                      | 258 |
| 6.5.1 | <i>Verlet Algorithms</i>                                | 258 |
| 6.5.2 | <i>Nordsieck/Gear Predictor–Corrector Methods</i>       | 259 |
| 6.5.3 | <i>Molecular Dynamics Applications</i>                  | 261 |
| 6.5.4 | <i>Nanomachines</i>                                     | 264 |
| 6.5.5 | <i>Wear at the Nanometer Level</i>                      | 265 |
| 6.6   | Structure and Mechanical Properties of Carbon Nanotubes | 266 |
| 6.6.1 | <i>Structure of Carbon Nanotubes</i>                    | 266 |
| 6.6.2 | <i>Mechanical Properties of Carbon Nanotubes</i>        | 268 |
| 6.7   | Nanomechanical Measurement Techniques and Applications  | 269 |
| 6.7.1 | <i>AFM Measurements: Mechanical Properties of CNTs</i>  | 270 |
| 6.7.2 | <i>Nanoindentation</i>                                  | 272 |
| 6.8   | Nano-Microelectromechanical Systems (NEMS/MEMS)         | 274 |
| 6.8.1 | <i>MEMS Fabrication Techniques</i>                      | 274 |
| 6.8.2 | <i>NEMS Fabrication Techniques</i>                      | 279 |
| 6.8.3 | <i>NEMS/MEMS Motion Dynamics</i>                        | 280 |

|       |                                      |     |
|-------|--------------------------------------|-----|
| 6.8.4 | <i>MEMS Devices and Applications</i> | 282 |
| 6.8.5 | <i>NEMS Devices and Applications</i> | 284 |
| 6.9   | Summary                              | 285 |
|       | Acknowledgments                      | 285 |
|       | References                           | 286 |
|       | Problems                             | 289 |

## Chapter 7

### **NANOSTRUCTURE AND**

### **NANOCOMPOSITE THIN FILMS 293**

|       |   |     |
|-------|---|-----|
| 7.0   | Introduction  | 294 |
| 7.1   | Classification of Nanostructured, Nanocomposite Tribological Coatings | 294 |
| 7.1.1 | <i>Nanoscale Multilayer Coatings</i>                                  | 294 |
| 7.1.2 | <i>Nanocomposite Coatings</i>   | 296 |
| 7.1.3 | <i>Functionally Graded Coatings</i>                                   | 300 |
| 7.2   | Background of Nanostructured Super-Hard Coatings                      | 301 |
| 7.2.1 | <i>Nanoscale Multilayer Coatings</i>                                  | 303 |
| 7.2.2 | <i>Single-Layer Nanocomposite Coatings</i>                            | 304 |
| 7.3   | New Directions for Nanostructured Super-Tough Coatings                | 306 |
| 7.3.1 | <i>Functionally Graded Multilayer Coatings</i>                        | 306 |
| 7.3.2 | <i>Functionally Graded Nanocomposite Coatings</i>                     | 308 |
| 7.4   | Processing Techniques and Principles                                  | 309 |
| 7.4.1 | <i>Plasma Definition</i>  | 310 |
| 7.4.2 | <i>Chemical Vapor Deposition</i>                                      | 311 |
| 7.4.3 | <i>Physical Vapor Deposition</i>                                      | 314 |
| 7.5   | General Considerations and Practical Aspects of Sputtering Deposition | 331 |
| 7.5.1 | <i>Reactive Sputtering Deposition Process Stability</i>               | 332 |
| 7.5.2 | <i>Film Structure Control (Structure Zone Models)</i>                 | 334 |
| 7.5.3 | <i>Sputtering Glow Discharges</i>                                     | 337 |
| 7.5.4 | <i>Energetic Enhanced Deposition</i>                                  | 339 |
|       | References  | 347 |
|       | Problems  | 358 |

## Chapter 8

### **APPLICATIONS OF THIN FILMS 361**

|     |   |     |
|-----|---|-----|
| 8.0 | Technological Applications of Thin Films                | 362 |
| 8.1 | Unbalanced Magnetron Sputtering of Ti-Al-Si-N Coatings  | 362 |
| 8.2 | Unbalanced Magnetron Sputtering of Ti-Si-B-C-N Coatings | 365 |

- 8.3 Pulsed Closed Field Unbalanced Magnetron  
Sputtering of Cr–Al–N Coatings 370
- 8.4 Concluding Remarks 379
- References 380
- Problems 381

## SECTION 4: CHEMICAL NANOENGINEERING 383

### Chapter 9 NANOCATALYSIS 385

- 9.0 Introduction to Catalytic and Nanocatalytic  
Materials 387
  - 9.0.1 *The Importance of Catalysis in a Modern  
Society* 387
  - 9.0.2 *What Is a Catalyst?* 387
  - 9.0.3 *The Nano Perspective* 388
- 9.1 Fundamentals of Catalysis 390
  - 9.1.1 *Adsorption of a Molecule on a Catalyst  
Surface* 390
  - 9.1.2 *Adsorption Theory* 392
  - 9.1.3 *Surface Reactions* 395
- 9.2 Synthesis 398
  - 9.2.1 *Synthesis Requirements* 398
  - 9.2.2 *Example of a Conventional Synthetic Technique* 399
  - 9.2.3 *Nontraditional Methods for Preparing  
Nanocatalysts* 400
- 9.3 Catalyst Characterization 401
  - 9.3.1 *Overview* 401
  - 9.3.2 *Bulk Characterization Techniques* 402
  - 9.3.3 *Surface Characterization Techniques* 404
- Acknowledgments 405
- References 406

### Chapter 10 NANOCOMPOSITES AND FIBERS 407

- 10.0 Nanocomposites and Fibers 408
  - 10.0.1 *Background* 410
  - 10.0.2 *Overview of Engineering Materials* 412
  - 10.0.3 *Types of Composite Materials and Generic  
Structures* 414
  - 10.0.4 *The Nano Perspective* 416
- 10.1 Physical and Chemical Properties of  
Materials 418
  - 10.1.1 *Mechanical Properties* 418
  - 10.1.2 *Thermal Properties* 428
  - 10.1.3 *Electronic Properties* 430
  - 10.1.4 *Chemical Properties* 432

## SECTION 5: BIOLOGICAL AND ENVIRONMENTAL NANOENGINEERING 479

### Chapter 11 NANOBIO TECHNOLOGY 481

|        |   |     |
|--------|---|-----|
| 11.0   | Introduction to Nanobiotechnology       | 482 |
| 11.0.1 | <i>Definitions</i>                      | 483 |
| 11.0.2 | <i>Biotechnology</i>                    | 483 |
| 11.0.3 | <i>Bio-Nanotechnology</i>               | 483 |
| 11.0.4 | <i>Biomolecular Nanotechnology</i>      | 483 |
| 11.0.5 | <i>Biomedical Nanotechnology</i>        | 484 |
| 11.0.6 | <i>Nanobiotechnology</i>                | 484 |
| 11.1   | The Biological Immune System            | 484 |
| 11.1.1 | <i>Natural Molecular Recognition</i>    | 484 |
| 11.1.2 | <i>The Innate Immune System</i>         | 486 |
| 11.1.3 | <i>The Adaptive Immune System</i>       | 486 |
| 11.1.4 | <i>White Blood Cells and Antibodies</i> | 488 |

- 11.2 Using Antibodies in Biosensors: Immunoassays 490
  - 11.2.1 *Antibodies in Molecular Recognition Sensors* 490
  - 11.2.2 *Production of Antibodies* 490
  - 11.2.3 *Monoclonal Antibodies* 490
  - 11.2.4 *Reverse Transcriptase* 491
  - 11.2.5 *Recombinant DNA* 491
  - 11.2.6 *Antibodies as Selection Tools for Biosensors* 491
- 11.3 Cantilevers as Nano-Biosensors 492
  - 11.3.1 *Sensing Physical Properties* 492
  - 11.3.2 *Cantilevers and Selective Binding* 493
  - 11.3.3 *Active Cantilever Sensors* 493
  - 11.3.4 *Passive Cantilever Sensors* 493
  - 11.3.5 *Surface Effects on Nanocantilevers* 494
  - 11.3.6 *Steric Effects* 494
  - 11.3.7 *Surface Free Energy at the Nanoscale* 495
- 11.4 Micro- and Nanosensors and Applications 495
  - 11.4.1 *Biomedical Cantilever Applications* 495
  - 11.4.2 *Cantilever Sensor for Cancer Screening* 496
  - 11.4.3 *Biotechnology Applications of Cantilevers* 496
  - 11.4.4 *Surface Acoustic Wave Nanosensors* 497
  - 11.4.5 *Electrochemical Nanosensors* 498
- 11.5 Optical Nanosensors 500
  - 11.5.1 *Photonic Nanosensors* 500
  - 11.5.2 *Surface Plasmon Nanosensors* 501
  - 11.5.3 *Nanoscale Optical Resonance Grids—Using the Butterfly Wing Effect* 503
  - 11.5.4 *Guided-Mode Resonance Sensors* 503
  - 11.5.5 *Applications of Guided Mode Sensors* 504
- 11.6 Nanotechnology for Manipulation of Biomolecules 506
  - 11.6.1 *Optical Tweezers* 506
  - 11.6.2 *Dielectrophoresis* 507
  - 11.6.3 *Some Dielectrophoresis Applications* 508
  - 11.6.4 *Micro- and Nanofluidics* 510
  - 11.6.5 *Biochips, Labs on Chips, and Integrated Systems* 511
- 11.7 Summary 513
- Acknowledgments 513
- References 513
- Problems 519

**Chapter 12**    **BIOMIMETICS**    521

- 12.0 The Bio Sciences and Technologies 522
  - 12.0.1 *Biomimetics, Bioengineering, and Other Bioengineering Fields* 522
  - 12.0.2 *Biomimetics as an Emerging Science and Engineering Discipline* 526
  - 12.0.3 *Biomimetic Systems* 526
  - 12.0.4 *The Nano Perspective* 527
- 12.1 Biomimetic Design of Molecules 528
  - 12.1.1 *Design and Discovery of Drugs* 529
  - 12.1.2 *Targeting with Magic Bullets* 530
  - 12.1.3 *Aspirin: Signaling Pathways Revealed by the Willow* 532
  - 12.1.4 *Taxol: Novel Drug Actions on the Nanolevel* 536
  - 12.1.5 *Pyrethrum: Learning from the Daisy* 538
- 12.2 Biomimetic Nanomaterials 540
  - 12.2.1 *Biomimetic Mineral Nanoparticles* 541
  - 12.2.2 *Shell as a Biomodel* 542
  - 12.2.3 *Nanoengineering Bone* 546
  - 12.2.4 *Sponge Fiber Photonics* 548
  - 12.2.5 *The Lesson of the Lotus—Nanocontrol of Surfaces* 551
  - 12.2.6 *Gecko Glue and Other Biomimetic Nanoadhesives* 554
  - 12.2.7 *Biomimetic Membranes and Nanocapsules* 565
  - 12.2.8 *Some Other Biomimetic Materials* 567
- 12.3 Biomimetic Nanoengineering 568
  - 12.3.1 *Artificial Muscles* 568
  - 12.3.2 *Viral Energy Storage* 571
  - 12.3.3 *Photosynthesis* 572
  - 12.3.4 *Sensors Based on Biomimetic Moieties* 582
  - 12.3.5 *Biomimetic Molecular Nanoengines* 583
- 12.4 Conclusion 586
- References 587
- Problems 603

**Chapter 13**    **MEDICAL NANOTECHNOLOGY**    605

- 13.0 Introduction to Medical Nanotechnology 607
  - 13.0.1 *Definitions: Medicine and Medical Nanoscience* 607
  - 13.0.2 *Historical Origins: Medical Breakthroughs* 608
  - 13.0.3 *Medical Nanoscience: Roots in Medical Science* 611

- 13.0.4 *Future Possibilities for Medical Nanotechnology: Nanomedicine* 612
- 13.0.5 *Putting Medical Nanoscience into Practice: Medical Nanotechnology* 616
- 13.1 Nanoparticles and Nanoencapsulation for Medical Applications 617
  - 13.1.1 *Nanoparticles for Medical Imaging* 618
  - 13.1.2 *Nanoparticles for Targeting Cancer Cells* 619
  - 13.1.3 *Nanoencapsulation for Drug Delivery to Tumors* 620
  - 13.1.4 *Nanoencapsulation for Penetration of the Blood–Brain Barrier* 621
  - 13.1.5 *Nanoparticles and Nanoencapsulation for Insulin Delivery* 623
  - 13.1.6 *Nanoencapsulation for Protection of Implants from the Immune System* 626
- 13.2 Guiding and Stimulating Tissue Function and Growth 627
  - 13.2.1 *Nanoguides for Neural Growth and Repair* 627
  - 13.2.2 *Neuronal Stimulation and Monitoring* 634
  - 13.2.3 *Neurostimulation for Pain and Nervous Disorders* 635
  - 13.2.4 *Neuroprosthetics* 636
  - 13.2.5 *Neuroprosthetics for the Ear* 653
  - 13.2.6 *Vision Prosthetics* 658
- 13.3 Summary 662
- Acknowledgments 663
- References 663
- Problems 682

## **Chapter 14 ENVIRONMENTAL NANOTECHNOLOGY 683**

- 14.0 The Environment (and Technology) 684
  - 14.0.1 *Background* 685
  - 14.0.2 *Traditional Methods of Detecting Environmental Contaminants* 686
  - 14.0.3 *Types of Environmental Sensors* 687
  - 14.0.4 *Introduction to Environmental Mitigation* 695
  - 14.0.5 *National Security and Defense* 700
  - 14.0.6 *The Nano Perspective* 706
- 14.1 Water and Soil Quality, Monitoring, and Mitigation 708
  - 14.1.1 *Traditional Water Treatment* 709
  - 14.1.2 *Nanomaterial Contamination in Aqueous Environments* 711

|        |   |     |
|--------|---|-----|
| 14.1.3 | <i>Activated Carbon—A Simple Traditional Nanotechnology</i> | 713 |
| 14.1.4 | <i>Membranes and Separation Technology</i>                  | 716 |
| 14.1.5 | <i>Oil Spills</i>   | 721 |
| 14.1.6 | <i>Chemical and Biological Sensors and Detectors</i>        | 722 |
| 14.2   | <i>Air Quality, Monitoring, and Mitigation</i>              | 722 |
| 14.2.1 | <i>Gas Separation: Advanced Membrane Technology</i>         | 723 |
| 14.2.2 | <i>CO<sub>2</sub> Mitigation</i>                            | 726 |
| 14.2.3 | <i>Hydrogen Production and Purification</i>                 | 727 |
| 14.2.4 | <i>Chemical Sensing and Detection</i>                       | 728 |
| 14.3   | <i>Energy</i>   | 728 |
| 14.3.1 | <i>Solar Energy and Nano</i>                                | 730 |
| 14.3.2 | <i>Batteries</i>  | 739 |
| 14.3.3 | <i>Hydrogen Production and Storage</i>                      | 742 |
| 14.3.4 | <i>Fuel Cells</i>   | 748 |
| 14.3.5 | <i>Solar Heating and Power Generation</i>                   | 751 |
| 14.4   | <i>Epilogue</i>   | 751 |
| 14.4.1 | <i>SAMMS</i>  | 752 |
| 14.4.2 | <i>One More Pass at Hydrogen Storage</i>                    | 753 |
| 14.4.3 | <i>Concluding Thoughts</i>                                  | 755 |
|        | <i>Acknowledgments</i>                                      | 755 |
|        | <i>References</i>   | 755 |
|        | <i>Problems</i>   | 767 |
|        | <b>INDEX</b>  | 769 |
