PART I ENVIRONMENTAL AND HEALTH IMPACTS OF NANOMATERIALS: OVERVIEW AND CHALLENGES	1
1. Nanomaterials and the Environment	3
<i>Mai A. Ngo, Suzette Smiley-Jewell, Peter Aldous, and Kent E. Pinkerton</i>	
1.1 Introduction	3
1.2 Nanomaterials and the Environment	5
1.2.1 Exposure	6
1.2.2 Fate and Transport	6
1.2.3 Transformation	7
1.3 Nanomaterials and Biological Systems	8
1.3.1 Exposure and Absorption	9
1.3.2 Distribution	10
1.3.3 Metabolism	11
1.3.4 Excretion	12
1.4 Conclusions and Directions for the Future	12
References	13
2. Assessing the Life Cycle Environmental Implications of Nanomanufacturing: Opportunities and Challenges	19
<i>Vikas Khanna, Yi Zhang, Geoffrey Grubb, and Bhavik R. Bakshi</i>	
2.1 Introduction	19
2.2 Life Cycle Assessment and Challenges	20
2.2.1 LCA Approach	20
2.2.2 Nanotechnology LCA Challenges	23
2.3 Life Cycle Assessment of Nanotechnology	24
2.3.1 Expected Benefits	24
2.3.2 Existing Work	24
2.3.3 Inventory for LCA of Nanotechnology	25
	vii

2.4	Carbon Nanofibers: A Case Study	26
2.4.1	Life Cycle Energy Analysis	27
2.4.2	Environmental LCA of Carbon Nanofibers	28
2.5	Discussion of Nanotechnology LCA	29
2.6	Future Directions: Predictive Approaches for LCA of Nanotechnology	32
2.6.1	Input Side Indicators of Life Cycle Environmental Impact	32
2.6.2	Predictive Toxicology and Applications for Nanotechnology	35
2.7	Summary	39
	References	40
3.	An Integrated Approach Toward Understanding the Environmental Fate, Transport, Toxicity, and Health Hazards of Nanomaterials	43
	<i>John M. Pettibone, Sherrie Elzey, and Vicki H. Grassian</i>	
3.1	Introduction	43
3.2	Importance of an Integrated Approach Toward Understanding the Environmental Fate, Transport, Toxicity, and Health Hazards of Nanomaterials	46
3.2.1	Recommendations from Recent Workshop and Agency Reports	46
3.2.2	Nanoparticle Characterization: Bulk and Surface Properties	47
3.2.3	Nanoparticle Characterization in Air and Water	53
3.2.4	Testing Strategies and Commonly Used Markers for Inflammation and Response, the Need for Additional <i>In Vivo</i> Measurements for Nanoparticles	57
3.2.5	Example of a Combined Characterization and Toxicological Study Design for Inhaled Nanomaterials and a Review of Some Recent Results	61
3.3	Future Issues and Needs	62
	Acknowledgments	63
	References	63
PART II	FATE AND TRANSPORT OF NANOMATERIALS IN THE ENVIRONMENT	69
4.	Properties of Commercial Nanoparticles that Affect Their Removal During Water Treatment	71
	<i>Paul Westerhoff, Yang Zhang, John Crittenden, and Yongsheng Chen</i>	
4.1	Introduction	71
4.2	Nanoparticle Properties	71
4.2.1	Types of Nanoparticles	71

4.2.2 Particle Size	72
4.2.3 Surface Charge	75
4.2.4 Quantification of Nanoparticles in Water	75
4.3 Nanoparticle Removal Mechanisms During Water Treatment	76
4.3.1 Coagulation	77
4.3.2 Flocculation and Sedimentation	81
4.3.3 Filtration	84
4.4 Conclusions	85
Acknowledgments	86
References	86
5. Transport and Retention of Nanomaterials in Porous Media	91
<i>Kurt D. Pennell, Jed Costanza, and Yonggang Wang</i>	
5.1 Introduction	91
5.2 The Subsurface Environment	92
5.3 Nanomaterial Transport and Retention in Porous Media	92
5.3.1 Nanoparticle Transport and Filtration	95
5.3.2 Nanoparticle Aggregation	99
5.3.3 Nanoparticle–Solid Interactions	102
5.3.4 Nanoparticle Retention	103
5.4 Summary	104
Acknowledgments	105
References	105
6. Transport of Nanomaterials in Unsaturated Porous Media	107
<i>Lixia Chen and Tohren C.G. Kibbey</i>	
6.1 Introduction	107
6.2 Major Mechanisms Influencing Saturated and Unsaturated Transport of Colloids and Nanomaterials	108
6.2.1 Transport of Colloids and Nanomaterials in Saturated Porous Media	108
6.2.2 Transport of Colloids and Nanomaterials in Unsaturated Porous Media	112
6.3 Capillary Pressure–Saturation (P_c – S) Relationships and Air–Water Interfacial Area in the Unsaturated Zone	115
6.3.1 Capillary Pressure–Saturation (P_c – S) Relationships of Porous Media	115
6.3.2 Air–Water Interfacial Areas in Porous Media	117
6.4 Mobilization and Transport of Colloids During Drainage and Imbibition	118
6.5 Experimental Materials and Methods	119
6.5.1 Materials	119

6.5.2	Air–Water Interfacial Area Measurement	120
6.5.3	Unsaturated Transport of SnO ₂ and Latex Nanoparticles During Primary Drainage	120
6.5.4	Saturated Transport of SnO ₂ and Latex Nanoparticles	122
6.6	Results and Discussion	122
6.6.1	Saturated Transport of SnO ₂ and Latex Nanoparticles	122
6.6.2	Dynamic Unsaturated Retention of SnO ₂ and Latex Nanoparticles During Primary Drainage	124
6.6.3	The Dependence of Dynamic Unsaturated Retention of SnO ₂ and Latex Nanoparticles on the Air–Water Interfacial Area During Primary Drainage	125
6.7	Conclusions	126
	Acknowledgments	127
	References	127

7. Surface Oxides on Carbon Nanotubes (CNTs): Effects on CNT Stability and Sorption Properties in Aquatic Environments 133

Howard Fairbrother, Billy Smith, Josh Wnuk, Kevin Wepasnick, William P. Ball, Hyunhee Cho, and Fazlullah K. Bangash

7.1	Overview	133
7.2	Background	134
7.2.1	Oxidation of Carbon Nanotubes	135
7.2.2	Influence of Surface Chemistry on the Environmental Impact of Carbon Nanotubes	136
7.3	Preparation of Oxidized MWCNTs	137
7.3.1	Source of CNTs	137
7.3.2	Oxidative Treatment	137
7.4	Characterization of Oxidized Carbon Nanotubes	138
7.4.1	Effects of Oxidation on the Physical Characteristics of MWCNTs	138
7.4.2	Effects of Oxidation on the Chemical Composition of MWCNTs	140
7.5	Influence of Surface Oxides on the Aquatic Stability of MWCNTs	145
7.6	Influence of Surface Oxides on the Sorption Properties of MWCNTs	149
7.6.1	Effects of Surface Oxides on Naphthalene Sorption with MWCNTs	149
7.6.2	Effects of Surface Oxides on Zinc Sorption with MWCNTs	150
7.7	Summary	151
	References	152

8. Chemical and Photochemical Reactivity of Fullerenes in the Aqueous Phase 159

John D. Fortner, Jaesang Lee, Jae-Hong Kim, and Joseph B. Hughes

8.1	Introduction	159
8.2	C ₆₀ Properties	160
8.2.1	Structure	160
8.2.2	Solid C ₆₀	161
8.2.3	Solubility	162
8.2.4	Spectroscopic Properties	163
8.2.5	Aromaticity	164
8.2.6	Reactivity	168
8.3	Fullerenes in Water	171
8.3.1	Water-Stable C ₆₀ Aggregates	172
8.3.2	Formation and Properties	173
8.3.3	Surface Chemistry	174
8.4	Photochemical Reactivity of Fullerene in the Aqueous Phase	176
8.4.1	Introduction	176
8.4.2	Experimental	177
8.4.3	Comparing Photochemical Production of ¹ O ₂ by C ₆₀ in Organic Solvent and Water-stable C ₆₀ Aggregates	178
8.4.4	Photochemical Production of ¹ O ₂ by C ₆₀ Associated with Polymer and Surfactant in Aqueous Phase	180
8.4.5	Photochemical Production of O ₂ ^{•-} by nC ₆₀ and C ₆₀ Associated with PVP and TX 100 in Aqueous Phase	182
8.4.6	Environmental Significance	182
8.5	Reaction of Water-stable C ₆₀ Aggregates with Ozone	183
8.5.1	Introduction	183
8.5.2	Experimental	183
8.5.3	Reaction Kinetics	184
8.5.4	Product Characterization	185
8.5.5	Environmental Significance	188
8.6	Conclusions	188
	References	189

9. Bacterial Interactions with CdSe Quantum Dots and Environmental Implications 197

Jay L. Nadeau, John H. Priester, Galen D. Stucky, and Patricia A. Holden

9.1	Introduction	197
9.1.1	Nanoparticles	197

9.1.2	CdSe Quantum Dots	198
9.1.3	Bacteria	200
9.2	Effects of Abiotic Factors on QD Fluorescence and Stability	201
9.3	Bacterial Microenvironments and Physical Associations with Nanoparticles	204
9.4	Biophysiochemical Interactions Between Bacteria and Quantum Dots	207
9.4.1	QD Labeling, Uptake, Breakdown, and Toxicity in Bacteria	207
9.4.2	Electron Transfer from Bacteria to Nanoparticles	213
9.4.3	Nanocrystal Formation in Cells	214
9.5	Microbial Ecological Implications	215
9.6	Environmental Implications	216
9.7	Research Needs	218
9.8	Conclusions	220
	Acknowledgments	221
	References	221

PART III TOXICITY AND HEALTH HAZARDS OF NANOMATERIALS **233**

10. Potential Toxicity of Fullerenes and Molecular Modeling of Their Transport across Lipid Membranes **235**

Dmitry I. Kopelevich, Jean-Claude Bonzongo, Ryan A. Tasseff, Jie Gao, Young-Min Ban, and Gabriel Bitton

10.1	Introduction	235
10.1.1	Toxicity of Environmental Contaminants at the Organismal Level	236
10.1.2	Molecular Modeling of Interaction of Carbon-based MN with Cell Membranes	237
10.2	Methods	238
10.2.1	Determination of the Potential Toxicity of Fullerenes (C ₆₀) Using Microbiotests	238
10.2.2	Impacts of C ₆₀ on Microbial Degradation of Organic Matter in Sediment Slurries	240
10.2.3	Model Development for the Assessment of MNs' Ability to Cross Cell Membranes	240
10.3	Results	247
10.3.1	Experimental Assessment of the Toxicity of C ₆₀ Using Microbiotests and Sediment Indigenous Microorganisms	247
10.3.2	Modeling Results	249

10.4 Discussion and Conclusions	255
Acknowledgments	256
References	256
11. <i>In Vitro</i> Models for Nanoparticle Toxicology	261
<i>John M. Veranth</i>	
11.1 Introduction	261
11.1.1 Benefits of <i>In Vitro</i> Testing for Particle Toxicology	262
11.1.2 Cells and Methods	264
11.1.3 Commonly Studied Toxicology End Points	265
11.2 Cell Responses to Nanomaterials	267
11.2.1 Effect of Particle Size	267
11.2.2 Comparisons of Different Nanoparticle Types and Toxicity Mechanisms	268
11.2.3 Particle Uptake Studies	269
11.2.4 Cell Model Differences	270
11.2.5 Comparisons of <i>In Vitro</i> and <i>In Vivo</i> Results	271
11.2.6 Summary	272
11.3 Quantitative Considerations in Designing <i>In Vitro</i> Studies	272
11.3.1 Length Scale Issues	272
11.3.2 Timescale Issues	274
11.3.3 Dose and Concentration Issues	276
11.4 Particle-induced Artifacts <i>In Vitro</i>	279
11.4.1 Adsorption of Assay Reagents	280
11.4.2 Adsorption of Cytokines	280
11.4.3 Adsorption of Nutrients	281
11.5 <i>In Vitro</i> Assay Development and Validation	281
References	282
12. Biological Activity of Mineral Fibers and Carbon Particulates: Implications for Nanoparticle Toxicity and the Role of Surface Chemistry	287
<i>Prabir K. Dutta, John F. Long, Marshall V. Williams, and W. James Waldman</i>	
12.1 Correlation of Biological Properties of Natural Minerals with Structure	287
12.1.1 Characteristics of Zeolites	289
12.1.2 Cell–Fiber Interactions	289
12.1.3 Chemical Studies: Fenton Chemistry	295
12.1.4 Mutagenicity	298
12.1.5 Discussion: Correlation of Biological Activity with Structure	300

12.2. Correlations of Structure with Biological Response of Particulates	303
12.2.1 Internalization and Toxicity of Particulates	304
12.2.2 Particulate-induced Macrophage Oxidative Burst	304
12.2.3 Macrophage-mediated Endothelial Activation by Particulates	304
12.2.4 Quantitation of Particulate-induced TNF- α Production by Macrophages	308
12.2.5 Determination of Fenton Activity of Particles	310
12.2.6 Discussion: Correlation of Biological Activity with Structure	311
Acknowledgments	312
References	312
13. Growth and Some Enzymatic Responses of <i>E. Coli</i> to Photocatalytic TiO₂	319
<i>Ayca Erdem, Dan Cha, and Chin Pao Huang</i>	
13.1 Introduction	319
13.2 Factors Affecting the Photocatalytic Activity of TiO ₂ with Respect to Bacterial Inactivation	320
13.2.1 Light Intensity	320
13.2.2 Light Source and Wavelength	321
13.2.3 pH	323
13.2.4 Temperature	324
13.2.5 O ₂ /N ₂ Atmosphere	325
13.3 Target Organism	326
13.3.1 Type of Bacteria	326
13.3.2 Growth Phase	327
13.3.3 Growth Media	327
13.4 Toxicological Effects of Nanoparticles	329
13.4.1 Ecotoxicity	329
13.4.2 Toxicity on Human Health	330
13.5 Killing Mechanisms	332
13.5.1 TiO ₂ /UV Process	332
13.5.2 Cell Membrane Damage	333
13.5.3 Enzymatic Response: Glutathione S-Transferase Activity	335
13.5.4 Genetic Response: DNA Damage	336
13.5.5 Overall Killing Mechanisms	338
13.6 Summary	339
Acknowledgments	340
References	340

14. Bioavailability, Trophic Transfer, and Toxicity of Manufactured Metal and Metal Oxide Nanoparticles in Terrestrial Environments	345
<i>Jason Unrine, Paul Bertsch, and Simona Hunyadi</i>	
14.1 Introduction	345
14.2 Metal and Metal Oxide Nanoparticles, Their Uses, and Properties	347
14.3 Chemical Speciation, Bioavailability, and Toxicity of Metals	349
14.4 Factors Likely to Influence Bioaccumulation and Trophic Transfer of Nanoparticles	352
14.5 The Surface and Environmental Modifications of the Surface	356
14.6 Summary and Research Needs	359
Acknowledgments	360
References	360
15. Health Effects of Inhaled Engineered Nanoscale Materials	367
<i>Amy K. Madl and Kent E. Pinkerton</i>	
15.1 Introduction	367
15.1.1 What is a Nanoparticle?	367
15.2 Considerations for Studying Inhaled Engineered Nanomaterials	368
15.2.1 Potential Inhalation Exposure of Nanoparticles	368
15.2.2 General Concepts of Pulmonary Deposition and Clearance of Nanoparticles	369
15.2.3 Instillation Versus Inhalation Studies	371
15.2.4 Aerosol Characterization for Inhalation Studies	373
15.3 Respiratory Toxicology Studies of Engineered Nanomaterials	374
15.3.1 Nanoscale Titanium Dioxide Particles	377
15.3.2 Nanotubes	379
15.3.3 Nanowires	381
15.3.4 Nanosized Model Particles	382
15.3.5 Extrapulmonary Transport of Inhaled Nanosized Particles	385
15.4 Bridging the Knowledge Gap Between Experimental Studies and Human Exposures	387
15.4.1 Human Clinical Studies of Nanoparticles	387
15.4.2 Correlating Nanoparticle Exposure, Dosimetry, and Health Effects	388
15.5 Considerations of Product Safety of Nanomaterials	390
15.6 Conclusion	392
Acknowledgment	393
References	393

16. Neurotoxicity of Manufactured Nanoparticles	405
<i>Jaime M. Hatcher, Dean P. Jones, Gary W. Miller, and Kurt D. Pennell</i>	
16.1 Introduction	405
16.1.1 Nanoparticle Inhalation and Pulmonary Response	407
16.1.2 Nanoparticle Translocation to the Central Nervous System	408
16.2 Neurotoxicity	411
16.2.1 Neuroinflammation	411
16.2.2 Oxidative Stress	413
16.3 Implications for Neurodegeneration	420
16.4 Summary and Conclusions	420
References	421
17. Occupational Health Hazards of Nanoparticles	429
<i>Patrick T. O'Shaughnessy</i>	
17.1 Introduction	429
17.2 Nanoparticle Hazards	430
17.2.1 Historical Perspective	430
17.2.2 Nanoparticle Properties	432
17.3 Nanoparticle Detection Instruments and Assessment Strategies	438
17.3.1 Overview of Available Instruments and Methods	438
17.3.2 Nanoparticle Characterization	444
17.3.3 Site Assessments	446
17.4 Nanoparticle Control	447
17.4.1 Filter Media Tests	448
17.4.2 Respirator Tests	449
17.5 Nanoparticle Risk Management	449
17.5.1 Risk Assessment Methods	451
17.6 Summary	452
References	452
Index	461
