Preface	v
I. PRESENTATIONS BY EC CONTRACTORS	
Stabilisation of Si photoanodes by silicon oxynitride coatings : attempted synthesis of binuclear Co complexes for (photo)electrochemical reduction of CO ₂	1
Studies on isolated plant pigment-protein complexes	10
Primary reactions in plant photosynthetic reaction centers	20
Immobilized photosynthetic systems for the production of ammonia and photocurrents	28
II. PHOTOCHEMISTRY	
Towards the design of molecular photochemical devices based on ruthenium bipyridine photosensitizer units	41
Photoinduced charge-separation in models for photosynthesis	51
Electron transfer photosensitized by zinc porphyrins in reversed micelles	59
Efficient visible light sensitization of TiO ₂ by surface complexation with transition metal cyanides	69
Photo-induced electron transfer reactions in polymer-bound ruthenium bipyridyl complexes	80
Self organization and photofunctionalization of supramolecular systems: photosensitive polymeric monolayers, multilayers and liposomes	85
Photogeneration of hydrogen: the photochemical way of storing solar energy	97
Inorganic photosynthesis: the photofixation of the atmospheric dinitrogen on transition metal oxides	105
Recent trends in the search for new photosensitizers	115
Reactivity of CO ₂ and related heterocumulenes towards transition metal compounds	122
III. PHOTOELECTROCHEMISTRY	
Medium effects upon the stability of n-GaAs-based photoelectrochemical cells	127
Unpinning of energy bands in photoelectrochemical cells: a consequence of surface chemistry and surface charge	138
H ₂ O ₂ production in a photoelectrochemical cell with TiO ₂ electrodes : reaction mechanisms and efficiency	148
Adsorption experiments for modelling semiconductor / electrolyte interfaces	156
IV. PHOTOBIOLOGY	
Cytochrome b-559 as a transducer of redox energy into acid-base energy in photosynthesis	169
Variations in the carotenoid complement of the pigment-protein complexes of <i>Rhodospirillum rubrum</i>	180
Towards an analogue of the bacterial photosynthetic reaction centre: synthesis of an oblique bis-porphyrin system containing a 1,10-phen-anthroline spacer	189
Location and organisation of the chlorophyll-proteins of photosynthetic reaction centres in higher plants	195
Phosphorylation processes interacting in vivo in the thylakoid membranes from <i>C. reinhardtii</i>	210
Isolation and some properties of photosynthetic membrane vesicles enriched in photosystem I from the cyanobacterium <i>Phormidium laminosum</i> by a non-detergent method	215
Outdoor culture of selected nitrogen-fixing blue-green algae for the production of high-quality biomass	225
Hydrogen peroxide photoproduction by biological and chemical systems	233
Current topics in the biochemistry of Fe-hydrogenases	241
List of Participants	251
