Part 1.	HEAT AND MASS TRANSPORT IN SINGLE AND MULTIPHASE	
	SYSTEMS	1
	On the Concept and Size of a Representative elementary Volume (REV)	3
	Advective and Diffusive Fluxes in Porous Media	21
	Pore Scale Physical Modeling of Transport Phenomena in Porous Media	47
	Natural Convection in Porous Media	77
	Heat and Mass Transport in Geothermal Reservoirs	143
	Thermohydraulics of an Aquifer Thermal energy Storage System	185
	Mechanics of Fluids in Layered Soils	239
Part 2.	PARTICLE TRANSPORT IN POROUS MEDIA	267
	Governing Equations for Particle Transport in Porous Media	269
	Theory of Filtration	343
		515
Part 3.	TRANSPORT PHENOMENA IN FRACTURED ROCKS	403
	Transport Equations for Fractured Porous Media	405
	Chemical Transport in Fractured Rock	473
	Multiphase Flow in Fractured Reservoirs	551
	1	
Part 4.	UNCERTAINTY AND THE STOCHASTIC APPROACH TO TRANSPORT	
	IN POROUS MEDIA	631
	Non Stationary Geostatistics	633
	Stochastic Analysis of Solute Transport in Saturated and Unsaturated	
	Porous Media	657
	Uncertainty Assessment for Fluid Flow and Contaminant Transport Modeling in	
	Heterogeneous Groundwater Systems	701
	An Overview of the Stochastic Modeling of Dispersion in Fractured Media	727
	Sensitivity Analysis of Ground-water Models	751
Part 5.	ADVANCES IN NUMERICAL METHODS	819
1 41 0 01	Mathematical Modeling of the Behavior of Hydrocarbon Reservoirs –	01/
	The Present and the Future	821
	Numerical Modeling of Multiphase Flow in Porous Media	849
	Advection-Dispersion with Adaptive Eulerian – Lagrangian Finite Elements	921
	Moving Point Techniques	953
		100
