CHAPTER 1: Introduction to the ram pump	1
Components of a ram pump system	1
The ram pump	2
General characteristics of ram pump systems	4
Efficiency and power	4
Pump size	6
Water quality	6
Life and reliability	7
Tuning to suit site conditions	8
Economic factors	8
Social factors	9
CHAPTER 2: Ram pumps in water supply systems	11
Renewed interest	11
Local manufacture	12
Other technologies for water supply	13
Water-powered pumping	13
Gravity feed	14
Rainwater harvesting	14
Wind-and solar-powered pumping	15
Manual and animal-powered pumping	15
The place of ram pumps	16
CHAPTER 3: Preliminary system design	19
Suitable areas	19
What to look for	19
Allowing for floods	20
Site surveying	21
Pump selection	22
Intake design	23
Spring intakes	23
Stream intakes—dams and weirs	24
Run-of-river intakes	25
Settling tank	26
Drive system	27
Feed pipe	29
Drive tank	29
Drive pipe	31
Pump	32
Pump base	32
Pump house	33
Delivery manifold	33
Delivery pipe	33
Distribution system	35
CHAPTER 4: Design assessment procedure	37
Notes on stage A	38
Flow chart of system design process	40
Notes on stage B	42
Notes on stage C	43
Notes on stage D	44
Notes on stage E	47

CHAPTER 5: System construction	49
Spring intakes	49
Foundations	50
Construction	50
Stream intakes using dams	52
Rock and cement dam	52
Gabion dam	53
Components of a dam	53
Run-of-river intake	54
Feed pipe	54
Flood overflow	55
Settling tank	56
Size	56
Pipe connections to the settling tank	58
Drive tank construction	58
Foundations of the drive tank	59
The overflow of the drive tank	59
Pipe connections to the drive tank	60
Screens and covers	61
Types of tank	62
Drive pipes	64
Pump base and pump house	65
Pump installation	67
Fixing details	67
Connection to delivery manifold	67
Delivery pipe and manifold	68
Distribution system	69
Storage tanks	69
Standpipes	70
Pipe joints	70
Plastic to plastic	70
Steel to steel	70
Plastic to steel	70
Flexible hose	71
CHAPTER 6: System Commissioning and operation	73
Before starting a ram pump	74
Starting a ram pump	74
If all else fails	75
Stopping a ram pump	76
Measuring pump performance	76
Measuring the drive flow	77
Tuning for best performance	77
Routine inspection and maintenance	78
Checking the pump(s) monthly	78
Checking the pump(s) quarterly	79
Checking the system monthly	79
Annual system maintenance	80
Pump repair	80
Problem solving and fault finding	81
CHAPTER 7: Local pump manufacture	83
Buy or make?	83
The manufacture of the DTU steel ram pumps	83
Workshop facilities	85
Quality control	85
Assembly of the DTU pumps	85
Assembly, step-by-step	86
Designing a customised ram pump	88

	The air vessel	88
	Delivery valve design	89
	Types of delivery valve	90
	Impulse valve design	91
CHAPTER 8:	Case studies – Nepal and Zaire	93
	Nepal	93
	Organisation and community participation	94
	Sample DCS (Nepal) Survey Form	95
	Zaire	96
