

## CONTENTS

	Page
Overview of wind/diesel systems	1
Control and load management system on wind power plants connected to diesel based grids	26
The demonstration of a 100 kW vertical axis wind turbine	38
Karpathos Island wind project	48
The Shetland wind demonstration project	56
A 100 kW wind turbine system concept	64
A 100 kW Darrieus wind turbine system	75
Two, small and medium power rated, autonomous wind-diesel systems	84
Development of autonomous wind energy power plant	93
Development and construction of a modular system for an autonomous electrical power supply on the Irish island of Cape Clear	100
Wind energy converter for aerobic treatment of sewage	109
Mykonos Island wind project	119
Wind/diesel electricity supply, Anholt Island	130
Complementary electricity at Amsterdam Island with a VAWT Darrieus type, 10 m diameter	135
Hibrid wind-diesel system for commercial exploitation	145
Autonomous wine-diesel pump system	153
Foula wind-pump-hydro system, the development of a control	162
Wind diesel project in China	175
A SURVEY OF THE PAPERS PRESENTED	184
CONCLUDING REMARKS	187
